# **THE STELLAR HORARY ASTROLOGY**

There are several books on horary astrology and there are classic works on this subject by great sages. Despite volumes of work, there was a need for a straight forward method to answer a question through horary astrology, in line with modern socioeconomic evolution. This was done by a great scholar Prof. K.S. Krishnamurti. His logic of Division of Static Zodiac houses by a Dynamic Dasha Bhukti stellar sequence is a novel attempt. The Zodiac with stellar division was available ready on hand. Historical approach based on division of signs though in vogue, had difference of opinion in the methodology and use of such divisional charts. Confusion confounded as a result of different approaches introduced by recent authors of traditional astrology. At this point of time, Prof. Krishnamurti introduced the further division to stellar Division of Zodiac in the same order that existed, to arrive at 249 divisions.

## **The purpose of this division:**

The Division of Houses in Zodiac as prescribed by a system called "Sripathi" was modified and western cusp system was adopted. In this method a cusp that rises at any point of sign not necessarily end in that sign. Similarly, two houses may occupy a single sign. This unequal distribution of house in zodiac leads drifting of sign lords. The Sign lord may or may not have control on full house. At times he even may not have a house to rule. Therefore a reference point was needed to a cusp that commences and ends in the same sign to attribute the responsibility of a house. A sub lord commences and ends in the same sign. Thus the point of rising of this cusp lord attributed with utmost power to decide the matter of the cusp for which he

is a sub lord. Since this sub lord is a divisional lord of a star in that zodiac, the star lord is attributed the power to indicate the nature of the cusp for which he is a Star lord.

### **Cusp Linking originated in K.P.**

Activation of sub lord or a star lord of a cusp is done by a planet which is in the stars of above Sub lord or Star lord. In the event of no planet situated in their stars, the Sub and Star lord themselves entitled to decide the cusp results. Prof. Krishnamurti advocates this convincing logic in his reader III in page 148 while discussing an example chart on "Overseas".

This cusp linking originated in the KP itself. This is a vital point, which if applied in total will enhance the predictive perfection. Magnifying this beyond its simple application and claiming research credits is fashion for selfish projection.

### **Planets signification is subject to modification by its Sub Lord indications.**

In most of the examples discussed in the works of Prof. KSK, he points out importance of the sub lord's indication for a Significator. It was evident as he proclaimed repeatedly, that if the sub lord of a planet is not favourable the results will not fructify. The indication of sub lord is of utmost importance in deciding the matter of a significator. Indication means the positional and lordship dignities of either the sub or the star where the sub lord is posited.

Sub negates a significator means, the negative results of the sub is effective. If that sub is positive, the positive results will be effective. It ultimately means that the sub lord is most important in giving positive or negative results. **Therefore it is**

**a powerful signicator to modify the results.** There is no question on inventing this theory or claim any credit to this. But any methodology of application of the available provision is worth appreciation.

This book advocates fundamentals and does not deviate the original concept of the inventor.

This work does not introduce any new concept or claim any research points. It is a humble modified presentation of a perfect system existing already. It is an effort to make it a useful guide and tool to derive the benefit of Horary Astrology in KP.

The desk board introduced here will help easy identification of required Significators covering all the rules.

We hope the KP. fraternity will welcome this effort and use this work for their further research.

Thanking you

## ABOUT THE BOOK AND AUTHOR

We are asked to write introduction to this book titled "K.P.-DYNAMICS" written by Sri Satyanarayana Naik. He is one of our close family friends. It is really a matter of pride to write introduction to his book. But to comment on any work we must be fair and frank and should have sufficient knowledge about the subject matter. Sri Naik had given us his material for proof reading and correction. Having basic working knowledge in astrology and with the explanations given by Sri Naik during the proof reading sessions we could grasp the central idea of his book. We find that this book is neither a beginners' guide nor an experts' hand book in K.P.-Astrology but an essential tool to all students of astrology. It is based on core fundamentals on which the K.P. astrology is developed, and is essential to astrological fraternity who practice the Krishnamurti Paddathi.

His logical explanations are convincing in attributing the importance to Sub lord and Star Lord both at Cusp and Planet level. He has dealt with clarity about the role of retrograde planets. He had precisely talked about the horary in K.P. In order to maintain continuity of the subject, he has not split the book in chapters but discussed the several subjects under different headings. True to the proverb "a picture is worth a million words", he has freely used visual media to express his views with great clarity and avoided running texts. He has avoided most of the general topics which are available in most of the books on K.P. astrology. But he has not ignored the tables which are essential to be a part of the K.P. book. As usual he has made his unique

Desk Board for K.P. This will enable the K.P. followers to arrive at *Significations* just by filling up the blanks in the Board.

Apart from K.P, Shri naik introduces the Naadi astrology also in this book. He restricts this to the signification of planets and recommends for cross verification and confirmation of the results arrived through K.P.

We are sure the readers will not only get benefited by the content of his book but also enjoy the subject matter while reading.

We wish him all success throughout his life and expect more such works to come from his desk.

# **INTRODUCTION TO K.P. DYNAMICS**

## ***Stellar Horary Astrology Redefined***

Astrology in India is not just a subject to study but a religious accomplishment which has influence on every one of us irrespective of caste, creed and religion. There are volumes of classical texts written by sages each producing unique methods of analysing horoscopes for delineation. But the texts were written in Sanskrit language and over a period of time several such works were lost for many historical reasons. However with the available monumental works, many scholars of later dates have contributed their knowledge to this subject and made praise worthy efforts to bridge the gap. But the subject of astrology was originally in the hands of traditional priests and was being handed over to the next generation religiously. Subsequently several scholars had made efforts not only to preserve this treasure but to bring out this subject to the benefit of society. With their efforts today we have volumes of works in treasure. But still there exist certain missing links to establish a sequential analysis method. However the modern authors have shouldered this responsibility and brought out their different methods of analysis. The new avenue was opened up by introducing this subject to the English speaking community across the world. The classic texts were translated into English. The doors were opened for the intellectual from different walks of life to take up research work on Astrology.

During that period, Prof. K.S.Krishnamurti from Madras introduced a new system for predictive astrology. This has created a history in the field of astrology and his system was known as "K.P." which was simple in application and accurate in getting results. He has made his principle known across the world through his magazine

"Astrology and Athrista". He has authored several books on his new method. Gradually many traditional followers shifted to this system. The most attractive element in K.P. was its simple application process and the universal applicability of rules.

During his lectures Prof. KSK made astonishing predictions by simple method of horary astrology which he had introduced. He preferred horary astrology which was based on his 249 divisions of Zodiac. He advocated the new comers to further research on the subject. The marvel of his theory was, 1) Introduction of 249 subs in horary astrology, 2) Grouping of houses for a particular matter, 3) Method of arriving signifier and confirmation of matter.

Subsequently his theory has become world famous and today it is considered as one of the best system of prediction. It is so famous that just hit any website naming 'K.P. astrology" you get 100's of sites across the world catering information and services on this subject. There are many groups that have started discussion on this subject. Research on this subject is still going on with the present generation for fine tuning K.P. principles.

But to conduct any research work, the fundamentals must be very strong. It is not the principle on which the research to be conducted. The research must be on the source on which the principle is built upon. One such effort is made by Sri Satyanarayana Naik, a research oriented non commercial astrologer, who has studied the traditional astrology, Naadi Astrology and K.P. He has to his credit two books on Naadi Astrology 1) PREDICTION SECRETS- NAADI ASTROLOGY 2) CELESTIAL MATRIX. He has also written a book on K.P. in Telugu. One of His Naadi book is translated into Telugu language. He is a visiting faculty to Potti Sreeramulu University to teach

astrology. He also regularly teaches Naadi astrology in the classes conducted by "Jyotirvaastu Vignana Samstha".

His books are well received by the readers. He does not believe in writing volumes of texts. He presents only those rules and principles which stand for repeated applications and supports his presentation with reasoning. He is also involved in research work on traditional dictums. In this present work, he is highlighting the logic behind certain rules introduced by Prof. KSK. He has dealt with the subject at its core fundamentals and has proved that KP. rules are complete in its original form and find place in the books written by Prof. KSK. He does not claim any invention or research credit to his writing.

He has presented this book in a horoscope analysis method. Identify the components analyse them and advocate remedies ultimately. Therefore we do not find any chapter wise divisions in this book. The subject begins with Static and Dynamic divisions of Zodiac and ends with Remedial measures at the end. He explains each component under different heads like:

- a) House division and Authentication for stellar division.  
Under this head he addresses the logic of Static and Dynamic divisions of Sage "Parasara".
- b) Concept of House system  
In this he deals with the Cusps' credentials.
- c) Birth of 249 subs  
He endorses the purpose for which these divisions were made by Prof: KSK.
- d) Static Cusp Dignities:  
He differentiates the cusp dignities as Static and Dynamic and gives logical explanations of their linking factor.

With the visual aid he clearly illustrates the connecting factors of Cusps and Planetary dignities.

- e) Under Astronomical phenomenal factor he elaborate the inbuilt theory of "Aspects", "Dispositor", "Retrograde" and "Significators".
- f) Further he talks of horary system in K.P. and the importance of Sub lord.
- g) He introduces and links the Naadi system and the signification of planet on which the prediction is based.
- h) He deals with a practical horary chart and demonstrates the involvement of Lagna and Moon relations to the matter representing the question.
- i) He then introduces the remedial measures.
- j) The entire work has several visuals which makes readers to understand the concept at a glance.
- k) He provides many details in the form of tables which are interlinked to the subject under different headings.
- l) It is his style to introduce a Desk Board for the readers to use it as a tool by which they can get the Astrological results, just by filling up the blanks.

I have given a few hints about this book and its presentation style.

It is a book consisting of rich material with convincing logic.

Therefore this book, not only serves as an informative tool but also a practical guide to K.P. astrological fraternity:

I wish him all success in his future endeavors.

# K.P. DYNAMICS

## 1. HOUSE DIVISION

A house, in stellar astrology, according to Krishnamurti padhati, is not restricted to signs. Depending upon the beginning of cusp the house drifts. Due to this there is possibility of a sign skipping the house leaving its lord deprive of a particular house signification. Due to this phenomenon, the star level and further division of its sub level are considered as major signifying factor to a particular house under consideration.

### Authentication for Stellar division

Fundamentals of division of house in stellar astrology, is based on the ancient works. For this purpose we need to know a few fundamentals from Sage Parasara's "Brihat Parasara Hora Sastra". Here the great maharshi has presented two sets of division. One is a Static Division based on the Signs and the other is stellar division which is Dynamic division based on the Stars. The Static Divisions are represented by sign lords. This will facilitate to assess the strengths of the planet. However in order to identify divisional lords several charts are cast. The purpose of these charts though, fundamentally to assess the strength of planets, the great author also recommend to study of such divisional charts for specific areas of life. However, it does not deal with the methodology of studying these charts. Subsequently scholars in this field have dealt with this subject with diverse opinion. But the common utility to assess the strength of the planet is well accepted universally in traditional astrology. This static analysis of chart with various divisional dignities will describe the quality of significations of the house and planets.

## 2. DYNAMIC DIVISION

Having arrived at the qualitative significations of houses and planets, it is essential to time the events (**fructification of signified results.**) For timing the events there should be a progressive component which should not only be dynamic but also sequential with appropriate changes in life. For this purpose, the stellar division is used. Every star which is sequentially distributed in each sign is taken into consideration. 27 stars were grouped in to 3 sets of 9 in a zone of 120 degrees in zodiac. Three stars from zone were assigned a planet as ruler. For example, the Star Ashwini, Makha and Moola are ruled by Ketu and Bharani, Pubba, and Uttaraashada were ruled by Venus. **Similarly** all the nine planets were allotted in the order of stellar sequence. Then each planet was allotted a number of years as ruling period.

Note: The number of years allotted to each planet as per Parasara is as follows:

- a. Sun-6 years, Moon-10 Years, Mars-7 Years, Rahu-18 years, Jupiter-16 years, Saturn-17 years, Mercury-17 years, Ketu-7 years and Venus-20 years. Total 120 years allotted to all the 9 planets. These periods of each planet is called as Dasha.
- b. Further division based on the same number of years were repeated to each planet which would give the sub division period. This is called Bhukti (some calls it Antardasha).
- c. To time the event still closer, divisions like Antra, Sookshma, etc., were also introduced.

But none of the classical texts reveal the basis of allotment of number of years allotted to the planet.

But many scholars off late have presented this by several metaphysical and/or life cycle theories.

Our sages had understood the creation and were experts in astronomy. They wrote astrological texts based on astronomical facts. Therefore, none of their dictums were a myth.

With this firm belief, we at Hyderabad, have started research in this field and have been successful in deriving at the astronomical phenomena to support many of the astrological dictums propounded by sage Parasara and Jaimini. The distribution of Zodiac signs, the Lordship allotted to them, the term Exaltation, Debilitation, Retrogression, and their impact were all based on the most advanced scientific temper. These led us to further probe into the orbital theory and derive the astronomical solution to the allotment of Dasha period to planets.

Our research team will come out with their Magnum opus on this subject with astronomical details supporting the astrological theory.

*This note is to establish the fact that, the great astrological works of our sages were highly technical and based on the scientific facts. The sages were high intellectuals. Nothing was hypothesis or myth. They presented their works for high intellectuals who mastered the technicalities of the universe and understood creation.*

To time an event, the stellar Dynamic divisions were adopted. Further, to arrive at closer timing of an event fine tuning of planetary transits were introduced.

There were great astrologers who had adopted this system perfectly to give detailed predictions of charts. However down the line somewhere the thread was de-linked. Many corrupted versions crept in and the dictums were way led to confusion confounded.

In late 60's when the astrologers were struggling to find a linking factor to the missing links in astrological works, Some selfless astrological stalwarts like Sri C.G. Rajan, Meena I, Meena II, and Sri K.S. Krishnamurti have contributed their yeomen services in this field. Prof. K.S. Krishnamurti found that the stellar divisions closely related to the events in human life. With his experiments, he considered only the Dynamic analysis of Dasha Bhukti and extended it to the Static Analysis of chart.

### **3. CONCEPT OF HOUSE SYSTEM**

Though there was a system of unequal house and Bhava-arambha, Bhava-Madhya and Bhava-Sandhi, this concept was further fine tuned with western concept of division of houses, by Prof. KSK. Here the houses were computed by Placidus method. Due to different time span of each sign, a house computed by this system need not necessarily be confined to a sign. It may extend to other sign. Even two houses may fall in one sign leading to its opposite sign to contain two more houses. This will deprive Lordship to certain planets of their house lordship. The lordships drifting and extending to other signs and some signs loosing ruler ship lead to uncertainty of ruler ship of houses by sign lords. It was essential to have a strong ruler to lead the matter of the house. The beginning point of a house is considered as Cusp of the House. Therefore a cusp should be assigned to

a static stellar body. For this purpose the only way is to seek the help of Stars assigned in each sign. But the distribution of stars was based on 4 quarters of 3 degrees 20 minutes span. With this, certain stars repeat in the subsequent sign. It is here Prof. KSK, brought out his wonderful concept which did not deviate from the fundamentals of ancients. The Star distribution is the basis for sequence of Dasha system. Further division will make it a Bhukti division. He has therefore divided each stars in a particular sign into 9 sub divisions and maintained the same Dasha sequence. A sub begins in a sign and ends in the same sign. But a nakshatra begins in a sign and may or may not end in the same sign. It is appropriate and also convincing to empower a sub with the matter of the house. For all practical purpose this Sub lord is considered as the chief of this house. In other words this sub lord is the powerful lord of the house.

The Chart Below for Kp no: 2 is drawn to explain the above concept

#### 4. BIRTH OF 249 SUBS

To identify a Cusp, it's Star Lord and Sub Lord, each sign in the zodiac was further divided according to the span of stars allotted to each sign arriving at 249 subs. These subs (being dynamic Bhukti lord) are entitled to bestow the result favourably or unfavourably according to their disposition & the matters denoted by the stars. We give below the 249 sub table indicating the beginning points of each sub

## **Universal applicability of sub - table**

Any chart either birth or horary if cast, all the twelve cusps will fall within this 249 subs who will decide the matter of the house. This 249 sub areas are universally applicable in this stellar system.

- *A chief is worshipped in his town.*
- A fool is worshipped at his home.*
- A king is worshipped in his kingdom.*
- A knowledge person is worshipped everywhere.*
- *A novice can get recognition in the company of noble people.*
- *A river flowing with sweet water, becomes salty on reaching ocean.*
- *Anyone who has never made a mistake has never tried anything new.*
- *Attempt the impossible in order to improve your work.*
- *Experts Dont Advertise themselves.*
- *Facts don't require proof to stand correct.*
- *Family matters should be kept secret; a disease should be brought to the open.*
- *Given an inch, one takes a mile.*
- *Good things in life cannot be appreciated by someone who has never experienced the good things.*
- *Great things can be achieved only with great effort.*
- *Hard work reaps sweet success.*

## 5. STATIC CUSP DIGNITIES

The Division of the houses is based on the Dynamic Dasha sequence. Each house now has 3 components to decide the matter of the house. Most important is Sub Lord who for all practical purpose act like the Lord of the house, next is Star Lord who is indicating the nature of the results, and Lastly the Lord of the sign whose participation is considered based on his portions covered by this sign lord to a house in the sign.

### FROM EXAMPLE CHART K.P. NO.2 - II & III HOUSE

We have given above the zoomed view of house 2<sup>nd</sup> and 3<sup>rd</sup> from the example Kp 2. Both are falling in Taurus sign. To decide the Lord of 2<sup>nd</sup> house we have to depend on the Sub lord of 2<sup>nd</sup> Cusp i.e. Jupiter. For 3<sup>rd</sup> house it is Saturn who is the sub lord of 3rd house. This logic is absolutely convincing to have different lordships in the same sign. If we consider Venus as lord of 2<sup>nd</sup>

and 3<sup>rd</sup> simultaneously, it is not convincing to give Lordship responsibilities to Venus for 3<sup>rd</sup> house having a very little span in his Sign. Though he has maximum span in 2<sup>nd</sup> house, the sub lord assigned with full span of his sub area is most acceptable theory.

In the static allocation of cusp responsibilities we have the following representing factors in the order of preference.

- 1 Sub Lord of a Cusp
- 2 Star Lord of a Cusp
- 3 Lord of the sign representing fractional cusp areas.

The methodology of accrediting result orientation is superb innovation of professor Krishnamurthy. However we will dive into this deeper as we proceed.

Now we have 3 static cusp representations, we need to activate this, but before that we should know the external forces if any that would contribute to represent the above mentioned cusps.

## 6. DYNAMIC DIGNITIES

In a chart, apart from static dignities of zodiac divisions, the dynamic planets will also occupy certain areas. A planet in Sanskrit is called "Graha". It means "Capture" in English. These dynamic planets when occupy certain place they capture the effects of that area. They also capture the effects of other celestial bodies in that area.

This "*Grahana Shakti*" the inherent quality of a planet is given utmost importance in the Indian culture. Considering this factor, if a planet were to occupy the place designated as house, it is obvious, that it would grasp the essence of that house. In other

words it would become the absolute representative of that house. With this we have the 4<sup>th</sup> representing factor to a house which overpowers every other factor.

Now there are 12 cusps represented by static bodies of the dynamic zodiac divisions and there are 7 planets and 2 nodes as dynamic representatives energising certain areas of the given dynamic zodiac divisions.

The powerful dynamic bodies which shall activate the static zones of dynamic divisions are the beauty of the wonderful concept of Professor Krishnamurti. With this concept we derive two sets as follows:

- 1) Static bodies representing Dynamic zones of Chart
- 2) Dynamic bodies representing Dynamic zones of Chart

The first one is grouped "House details"

The Second is termed as Planet's details"

The chart below is given to derive the above two components.

The art of linking the above Cusps to the dynamic planets through their stars and subs  
is the ultimate Dictum of Stellar Astrology

## 7. THE DICTUM OF STELLAR ASTROLOGY

SECOND BLOCK

Prof: KSK used here most convincing logic and is well within the frame work of acceptable norms.. We have depicted the whole concept of Prof: KSK in the above diagram. All these have been propounded by Prof: KSK with authenticated scientific approach not deviating from the classic texts. As far as aspect is concerned we have just used the inbuilt logic of sensitive point which in our applications has proved to be effective.

## **The First Block**

Contain the triggers which are Static dignities of Cusp. The Sub Lord or Star Lord, The Sign Lord and the planet posited there in. These dignitaries are empowered to offer results by them selves if there is no dynamic planet posited in any of their stars.

## **Second Block**

Dynamic planets posited in a cusp. These planets while they occupy a sign will occupy certain Star and trigger its significations. These Star lords where a planet is occupied will now signify the houses in the order of preference by their occupation, being sub lord or star lord of cusp and being lord of house.

## **Third is a Computable Interlink**

This is used for Qualifying the Significations and Significators

### **a) Qualifying the Signification**

The universal rule that a sub lord is deciding factor is applied here.

A house matter will be favourable if that Cusp Lord is linked through his star or sub lords to houses which are supporting the matter and if it is indicating negating houses the negative results indicated will be experienced by the native.

### **b) Qualifying the Signicator**

Similarly, if a planet is in the sub and if that sub or the star lord where this sub is posited, indicates negative houses, the results will be negative.

*These two important factors are the diamond keys of K.P.*

When a qualifying factor itself is desired for a matter, then considering those planets as signicator is most convincing factor.

With this we get

- 1) Planet signifying houses
- 2) Star level significations
- 3) Sub level significations

*(Signified houses favourably supported by sub are most effective.)*

It is here the importance of Sub is highlighted and this Sub Lord of a Cusp by its star position or by himself if indicates cusps that are favourable to the house for which he is sub lord the matter of the house under study will be fruitful.

Similarly, if a sub lord of a planet either by itself or through its star is favourable to the signification of the planet, then the planet is empowered fully to execute the event.

But in both the cases, unless totally the houses are negating an event and the signicator, certain houses which appear to be negative but unavoidable in executing the end results are to be considered.

Prof: Krishnamurti has not left any stone unturned in giving the scope of application of his principles. Be it linking of cusp, or extending sub star level which already exist in the K.P. cannot accredit any body with research titles.

#### **Fourth is Astrological Phonomenal Factor**

A Planet posited in a Sign, Star and Sub will throw its aspect at certain places. If those places happen to be sensitive zones of either cusp or planet, it will influence those matter signified by the representing factors of that sensitive zones. The three zone divisions of 120 degrees having similar star lords and a planet posited in any one star influencing its other stars in the

remaining two zones is the unique principle advocated, well authenticated by the trine aspects in traditional astrology. *This trine aspect is an inbuilt algorithm in stellar astrology.*

Any planet in Ashwini star in Aries will automatically influence Makha in Leo and Moola in Sagittarius. Similarly at the sub level the other subs in trine are influenced. In other words the sensitive points at star span and sub span are influenced.

This inbuilt aspect theory drives us to decide the impact of aspect considering the point of influence on Star span and precisely effective in influencing the Sub area.

Taking this concept into consideration we shall proceed with the influence of aspect.

All planets from its star position & sub position, aspects a star and sub situated at 180 degrees

If that zone does not represent a cusp or planet, no effect is considered.

Similarly we have special aspects for outer planets, Mars, Jupiter and Saturn.

Mars aspect the zone situated at 90 degrees and 210 degrees

Jupiter 120 degrees and 240 degrees

Saturn aspect 60 degrees 270 degrees

It is the fundamental theory of 120 degrees zone effects which is the base for stellar astrology. A planet is influenced by another planet which is situated in any of its Stars in the 3 zones. This is the trine effect which is built in the stellar system. Basing on this the aspects are considered as described below:

A Planet will be posited in Star and a Sub in a Sign. It may be in a particular portion of a Star and in either beginning middle or end of a Sub. It is influencing the Star and the Sub. The Sub is the powerful representative as earlier discussed. From this span i.e. from the beginning of Star Position till the end of the Sub this planet has influence. Therefore his aspect must cover the area of this span on the sign where this planet throws its influence.

1. The Sun posited in Taurus at 20:39:58 i.e. 50:39:58 In the Star of Moo. Moon Star commences from 40:00:00 degrees in Taurus. The Effect of Sun commences from this point. Sun is in the Sub of Ven. Ven commences from 50:26:40 and ends at 53:40:00 in Taurus. Here the influence of Sun ends. Sun has 7<sup>th</sup> aspect i.e. 180 Degrees. Adding 180 degrees to commencement of Star degrees at Taurus we get (40+180) 220 which mean it is Scorpio 220. Adding 180 degrees to end of Ven Sub (53:40:00+180 ) it ends at 233:40:00
- 2 Any Planet or Cusp falling in the range of 220:00: to 233:40:00 the Sun will be influencing by his aspect.
- 3 In the horoscope Jup is at 231:05 therefore covered by Sun aspect.
- 4 The 7<sup>th</sup> cusp begins at 227:46 which falls within this range hence 7<sup>th</sup> cusp is also under Sun's aspect.

In this chart only Jup has aspect of 7<sup>th</sup> which covers Cusp and Planet posited in Taurus. Rest of the planets do not cover any cusp or Planets.

The aspect theory is logically convincing and within the frame work of stellar system and the question of orbs are eliminated as it is based on the stellar influence which is an inbuilt logarithm of this system.

## **8. RAHU & KETU**

These are highly energised points astronomically having no physical identity. But their influence in astrology is mysteriously exploded and still remains unresolved. Logically, in the absence of any physical identity considering their casting of influence sounds not convincing. Nonetheless, they are appearing in the star and sub zones by which they were given utmost importance. They are empowered with lordship of the house where they are posited. They are empowered with the planets entire signification by conjunction. If by conjunction they are so much powerful why not they cast their influence on other zones, by default in the system trine influence is already given to them. Remaining is only 7<sup>th</sup> aspect. Rahu and Ketu are positioned in an axis of 180 degrees apart. They are opposite in nature hence casting influence on each other is not logical. But there is a tricky issue here. These Nodes are of ecliptic in nature and hence whoever contacts them either by conjunction or by aspect, they will eclipse that body and take over its effect. By this, if a planet is conjunct with Rahu, Rahu takes over the planets signification. But this planet has its opposition influence over the area covered by Ketu. The question is whether would have secondary influence over this planet? Let us look at this in a different angle; Rahu has already taken over the signification of this planet. This planet is linking Ketu. Therefore, it is logical to attribute Rahu with the significations of Ketu. In the same way Ketu is to be considered. If there is no planet, then the influence on each other need not be considered.

## **Whether true or mean nodes**

The movement of nodes are erratic and will be changing in quick succession either retro or direct. However their mean motion is always retrograde. But the few degrees of difference between true and mean nodes at times will upset the whole analysis. If this is ignored, it will lead to serious mistakes in computation, particularly, when the nodes shoulder the responsibility of offering results. It is absolutely a matter of spot decision, when the nodes appear as Dasha or Bhukti lords. This point needs to be experimented particularly in horary system. Till further research we shall stick to mean nodes for this purpose and ignore the swift direct motions.

## **\ 9. FINE TUNING OF SIGNIFICATORS**

In our experience we find it useful to consider following riders, to know the intensity of the Significators. This is done by assessing the following two dispositions.

1. Exalted, Debilitated, Retrograde, posited in favourable or unfavourable house.
2. The position of Dispositor to a planet, in the above houses.

These have been detailed in subsequent pages.

### **What is meant by a Fruitful Significator?**

Now from the above format, a planet which is indicating certain houses and the sub lord from the 2<sup>nd</sup> block in the diagram also supports it then such planets are called Fruitful signifier. The whole process is to arrive at the Dynamic Planets who have positive power to bestow the desired results.

## **10. THE ROLE OF RETROGRADE PLANET**

The role of retrograde planet is still a matter of debate and there are diverse opinion heralded by many stalwarts. However, Prof. KSK attaches an important factor saying that a planet in retrogression will not give the result of its signification. There is volume of information hidden behind this statement. Astronomically, a planet gets retrograde while it is nearer to the earth. (*Please refer to the research note mentioned earlier*) It is beyond doubt that there is a motion of reversal. This fact made Prof: KSK to attach reversal result to the planet. If you read between the lines, there is a secret lying here. "A retrograde planet does not give result" it means:

- 1 This planet will not give its signified results.
- 2 This planet will give results which are opposite to its signification.

These 2 points have different meaning attached to it.

In the 1<sup>st</sup> case it will not give any results. In the 2<sup>nd</sup> case it will give results which will hamper its original signification.

If you consider 1<sup>st</sup> point, a planet when operative cannot be silent without participating in any results. Since it is active in its period it must give some results.

Then we need to consider the 2<sup>nd</sup> point. If so, why should it oppose the results. Is it because of reverse movement? Why should it matter as long as it is moving in the heavens? This forces us to accept the view that the planet is influencing some other houses due to its reverse motion. One such thought provoking theory is promoted by Late Sri M.P Shanmugam in his Astro Secrets.

*Quote Extract: "A planet may be owner of one or two houses. For example a Kumbha Lagna, Jupiter is the rightful owner of houses 2 & 11 as such he is a vyayadhipathi to houses 3 and 12 . . . In the normal course he will give opposite results of 3 and 12 and when this Jupiter when it is retrograde will not be able to give the opposite results and will give results of 3 and 12."*

If this is analysed the retrograde planet Jupiter instead of giving 2 & 11 houses results has given the results of 3, 12. Ironically there is a shift in lordship itself. The Lordships are Static chart based, the planetary positions are dynamic. This logic would have been convincing if Jupiter were to be in say 10<sup>th</sup> house since retrograde he would give results of 9<sup>th</sup> house instead of 10<sup>th</sup>.

But surprisingly, there are several reports, by few astrologers who have adopted the vyadhipathi theory and proved that it works.

However, since we do not attach much importance to lordship directly, this rule is of no significance to us.

We do attach very importance to position of a planet in a house. Now if a planet is in a house and it is retrograde, being nearer to the earth it has strong influence on the earth. This planet cannot be ignored. This must give some results either positive or negative. Here we refer to the Naadi system of Astrology, where the retrograde planets are empowered with the qualities of previous sign. This is something convincing logic and in Naadi such previous house results are being experienced.

### **How to consider this retrograde in stellar system?**

In our example chart Jupiter is Retrograde it is in the 8<sup>th</sup> house. Now any planet in its star should give 8<sup>th</sup> house results. But since

Jupiter is retro and not concerned with 8<sup>th</sup> house this planet in Jupiter's star will not give 8<sup>th</sup> house results. If this Jupiter by his retro motion reaches 7<sup>th</sup> house at any given point of time then we can say that this planet in his star will give 7<sup>th</sup> house results instead of 8<sup>th</sup> house results. If the planet is retrograde in the same 8<sup>th</sup> house and does not cross the limit of 8<sup>th</sup> house in reverse, then this planet neither gives 7<sup>th</sup> house result nor supports 8<sup>th</sup> house results. This is as far as planetary position of Jupiter. But the same planet in Jupiter star will be able to activate the Cusp Sub Lord ship of Jupiter who has attained this position by static nature. For instance in our example horoscope Jupiter is Sub lord of 2 and Star Lord of 4,8,12, therefore, the Planet in Jupiter star has no objection in giving these results and the retrograde effect is not attributed to the static sub lordship of Jupiter. This Jupiter at the time of epoch must be in a star and sub, irrespective of his motional direction. He is there at that moment influencing certain zones. Therefore, there is no question of not attributing the zonal significations to Jupiter.

## **11. WHY DISPOSITER TO BE CONSIDERED IN STELLAR ASTROLOGY:**

Earlier we have seen that aspects theory is an inbuilt process. In the same way, the Dispositor theory is also inbuilt in stellar astrology. For example if a planet is in the star of a planet who is posited in a house which is detrimental to the desired matter, then the planet gives the undesired results. I.e. here the Star Lord is the Dispositor for the planet who is sitting in his area. In the same way if a planet is sitting in a sign and that sign lord is situated or signifies negative results, then the planet gets that signification. Logically there is no question of ignoring this factor.

Perhaps, ignoring the lordship of the Dispositor, his position in a house will be apt to consider. This theory is working well in our experience. We are not deviating from the origin. We are simply extending its application.

A tenanted planet is signifying the matter of the house, by itself or through its star planet, and then the Lord of this tenanted planet is under the sway of posited planet. The signification of the house where this Lord is posited will also get attached to the tenanted planet. If this lord is posited in a house which is detrimental to the sign where the planet is posited, that house matter will be spoiled, and if it is favourable the matter will flourish.

In our example horoscope

Sun is in the Star of Moon. This Moon is not a sub lord to any of the cusp.

But the moon is Star Lord of 11<sup>th</sup> Cusp

This moon is posited in the 8<sup>th</sup> House

Moon is in Scorpio the lord of this Sign Mars is in 12<sup>th</sup> House.  
Therefore, sun also gets 12<sup>th</sup> signification.

## **12. STRENGTH OF PLANETS IN STELLAR SYSTEM**

Even after considering the power of signifier there would be a number of planets signifying the required houses, a matter under consideration is not just to give the fructification of event and timing factor but it should also denote the quality and impact of such events. This is possible only through the natural signification of planets and signs and their respective dignities. Two or more planet may simultaneously participate in the event fructification. But the impact of such results may vary according to their natural quality and their essential disposition in a

particular sign. In order to select a right planet with qualitative favourable result, it is necessary to make selection by their essential dignities.

The essential dignities are:

1. Exalted or Debilitated

Exalted Planets are powerful because their influence on the earth will be more, while the influence of debilitated planets will be less. These are based on astronomical phenomena, and cannot be fit into this size of the book to explain.

2. Retrograde planet

Astronomically there is a similarity in retrograde and exaltation of planet. Therefore it also exerts power to influence. The only difference is due to cosmic plan forcing the planet to regain its path and motion, this change in the speed and direction of the planet is termed as Retrograde. This phenomenon is purely astronomical strategy which needs another volume of writing.

In this work, we follow the dictum of Prof. KSK and accordingly we do not attribute fructification of results to a Planet until it becomes direct, nor have we attributed any negative results to it.

3 Planet posited in favourable or unfavourable house

This factor is decided upon whether a cusp where the planet is posited is favourable to the signification of planet or unfavourable to the matter.

4 Planet's Dispositor is favourably disposed or unfavourably disposed

A Dispositor is the sign lord in whose sign a significator is posited. The Sign Lord of a tenant if not posited in a good house, the tenant will be at discomfort to in sign which is not well disposed.

### **In horary astrology the sub lord theory is most effective.**

We have seen that the 249 subs are static bodies of dynamic divisions of Zodiac. The cusp chart is the energised zones of this static chart for a particular moment. This chart will have dynamic bodies which were influencing this chart at that particular moment. The Dasha and Bhukti are active at that moment. But it is cast for post event. But in horary it is the birth of the question for which the chart is cast. The chart is dynamic, the planets are dynamic and the Dasha Bhukti is dynamic. There is no confusion of time factor. All this leads to perfect set up for a question analysis.

### **13. HOW HORARY WORKS**

By following the some of the important points mentioned below the question and answers can be precisely addressed.

- 1 The personal visit of consultant is most effective.
- 2 Over phone (not recommended) - if question is to be asked, the consultant must know the astrologers name and his place of residence. He should face the direction in which the astrologer is located, and ask his question first mentioning the name of the Astrologer.
- 3 A detailed back ground of the matter has to be discussed before framing a question. The consultants are eager to know the answers, without fully explaining what exactly they want. Therefore, it is for the astrologer who is conversant with

the houses and planets, to get the proper details and make simple questions. A question must contain a single matter related to a house. If the consultant' has complex matter, it is to be broken into several questions and then addressed separately.

- 4 Before asking him to state the number, it is advised that the consultant repeat the question framed precisely for which he needs the answer.
- 5 Once the consultant tells the number the astrologer should note the time and date and immediately work out the chart and finish the analysis.
- 6 A matter which is current during the conversation between the consultant and astrologer is supported by planets which are operative at that moment for that particular matter. Therefore, noting the time and then later on sitting for analysis will dilute the influence of planet and shift to other planets.
- 7 Horary chart is erected for a question of consultant. Therefore the ascendant must indicate the activity, the nature and the self efforts involved in the matter.
- 8 No doubt the moon is mind of the consultant, and it will denote precisely the question and its related implications there of.
- 9 Therefore, it is important to assess the Ascendant first to know the condition of the matter involved in question. Careful analysis of Ascendant will reveal many secrets of the matter in question.
- 10 Most important is to caution the consultant about the number that he would be giving for the question.

The number should not be a pre-decided one.

He should not give any lucky numbers, favourite date numbers or any such numbers which he considers good for him.

He should be asked to give a number in random, also allow to think over numbers and accept ultimately which he feels more appropriate to mention.

We have said earlier the planets will be active over the matter and follows with the consultant. Then the same planets will shift over to Astrologers workings and influence him to arrive at the answer. Therefore, there is no question of postponing an analysis for a question that has influence on both the consultant and astrologer.

## **14. RULING PLANETS**

Horary astrology itself is for the moment of birth of a question. Planetary position, the chart and the Dasha and Bhukti are all dynamic in nature and have direct influence on the question, consultant and astrologer to disclose the fate of the question. Since Dasha Bhukti lords are effective at that moment, it is only to justify their involvement particularly the next level that is Antra lord is more important. For this purpose, it is optional for the astrologer to get the confirmation by the ruling planets generally the day lord or Lagna computed for that time its Star or sub lord will confirm this. Eventually, if the analysis is forced to take place at a later date perhaps the ruling planet may have to be consulted. However we do not recommend postponing analysis for horary chart.

## 15. INTERLINKING HOUSES, SUB & EVENT

For constructing an apt question, we need to know, the each cusp sub lord and its relative influencing houses for a matter to fructify. We give below table showing the sub lord and the houses to be signified for certain matters.

## 16. PROMISE OF AN EVENT

Unless there is indication of fructification of certain events, there is no use in identifying the signifiers for relevant houses. A requisite event must be promised in the static chart. With an established fact that Sub is deciding agent to dispose a matter of house favourably or unfavourably, we need to assess this sub lord. The sub lord of a Cusp is activated by a planet that is situated in its star for signifying the house for which it is Cusp Sub lord. Similarly, a star lord of the Cusp Sub Lord or the Sub Lord itself must be linked to houses which are favourable to the house for which the Sub lord is responsible.

Let us take from the example horoscope and assess whether the native is destined for foreign travel.

|  |   |  |                                       |
|--|---|--|---------------------------------------|
| Mar-17-54 Mer,Mer                      | I-0-46 Ket, Ven   | II-02-27 Sun,Jup<br>Sun-15-31 Moo,Jup<br>III-29-08 Mar,Sat | Mer-8-40 Rah,Jup<br>IV-25-57 Jup,Ket  |
| XII-23-57 Jup,Mer<br>Rah-17-50 Rah,Sun | K.P. No. 2  | Ven-0-35 Jup,Mer<br>V-21-44 Mer,Sun<br>Sat-25-45 Mer,Rah   | Ket-17-50 Ven,Mer<br>VI-23-57 Ven,Sat |
| XI-21-44 Moo,Van                       |   |  |                                       |
| X-25-07 Ven,Ket                        | IX-29-08 Mer,Sat<br>Jup-0-21-46 Mer,Sun<br>Moo-6-6 Sat,Mer<br>VIII-2-27 Jup,Rah | VII-0-46 Mer,Mer   |                                       |

For this purpose, we shall consider 9<sup>th</sup> cusp which is for distant travel. This Cusp sub lord must link himself to 3,7,12 houses to promise the foreign travel.

The 9<sup>th</sup> cusp sub lord is: Sat.

1<sup>st</sup> step:

Sat is in the Star of: Mer.

Mer is the sub lord of cusp: 7 & 12.

Mer is star Lord of 5 and 9.

2<sup>nd</sup> step:

Mer is posited in 3.

3<sup>rd</sup> step:

Mer is Lord of Partial 4<sup>th</sup> house.

The sub Lord Sat through his Star level Mer has indicated houses, 3,7,12 and he is also indicating 5<sup>th</sup> house which is a pleasure house.

Since the matter is confirmed by Star level, we need not study the Saturn. However study of saturn will give following modifications.

4<sup>th</sup> step

Saturn is sub lord of Cusps 3,6,9

5<sup>th</sup> step

Saturn is in 5<sup>th</sup> house.

6<sup>th</sup> step

Saturn is Lord of Partial 11 and 12 houses.

Saturn as sub lord is himself supporting it.

Now we should go for signicator analysis for 3, 6, 7,9,12 houses to arrive at the timing of event of such a travel.

If this sub lord indicate two or more of houses 2, 5, 6,8,11, then we need not go in for computation of Significators.

We will come back to the computation of Significators, with help of a template where in we need only to fill in the blanks and arrive at all the significations of planets.

We have designed a work board to arrive at signifier conforming to the rules set above. This board facilitate the readers to arrive at Significators by simply filling up blanks from the chart details. We shall complete the discussions on few other matters on horary astrology and then take up an example chart and use the work boards to arrive at the results at the end of these lessons.

## **17. BHUKTI LORD (SUB) - MOST IMPORTANT**

For instance the period of Dasha for Venus is 20 years. In the total span of 20 years of this star Lord, it indicates several results of houses. But what result will have an impact on the native's life is to decided by the sub period Lord i.e. sub Lord who will have considerably shorter span of period. All the 9 Bhukti i.e. sub lords will have different colours to the indicated results. These changed results will be experienced during the period of 20 years.

### **Further divisions of Sub like Sub-sub (Anthra)**

A Bhukti Lord has already decided the quality of results and the closer timing of fructification of results has to be done by the other 9 sub sub divisions. All the 9 subs will be covered by Bhukti Lord during his period. The results covered by this Bhukti Lord will have to be given by a sub sub Lord who is favourable to him. During the unfavourable period these results may not come or may have some adverse effect. But ultimately, one or many of sub lords must support the Bhukti lord to bestow the results. Therefore, further sub division needs no consideration for analysis but essential to time and event.

## **18. HOUSE MATTER**

There is general theory, that houses 6,8,12 to any house is detrimental to the matter of that house. This is also in tradition. But this theory cannot be applied blindly.

For 1<sup>st</sup> house 6<sup>th</sup> 8<sup>th</sup> 12<sup>th</sup> are of-course detrimental. 6<sup>th</sup> denotes diseases, 8<sup>th</sup> house chronic diseases and accidents, 12<sup>th</sup> is hospitalisation. This also leads to litigation and tensions etc.

If we consider 2<sup>nd</sup> house, the 6<sup>th</sup> from it is 7<sup>th</sup> House - This is house of spouse and marriage. While 2<sup>nd</sup> is addition to family. 8<sup>th</sup> house is 9<sup>th</sup> house indicating agreement from other party which is not detrimental to marriage. 12<sup>th</sup> house is 1<sup>st</sup> house this of-course indicates individual self, does not indicate the partner in question. Thus 6<sup>th</sup> and 8<sup>th</sup> from 2<sup>nd</sup> is not detrimental to marriage. But as far as partner ship is concern it shows a dormant partner and expenses from earnings.

Therefore, we should not jump into this theory or any other theory blindly, without assessing the matters covered by each house by a signifier and analyse it as to whether it is favourable or unfavourable to the concern matter. Some time getting rid of a portion of profit or happiness may cause future gains or relief from mental tensions. Therefore the matters indicated by each house is to be studied and the favourable or unfavourable house to be related in accordance with the result required by the consultant.

Though not exhaustive a set of house significations are re-defined maintaining sequence as far as possible, to each matter in all the twelve houses.

## **19. INTRODUCTION TO NAADI**

Each house will have several Significators. The nature of results will have telling effect on detailed analysis if the natural significations of these planets are combined to the house matters. Here we shall use the Naadi significations which by experience are found to be more accurate.

To make it simpler and easy to refer, planetary significations are tabled below.

Planetary significations to be used for combination of planets in a chart in trine position and 7<sup>th</sup> positions from a particular planet

The each signification of planets are given in the table. Take the desired matter for analysis and note representing planet. Combine significations of planets posited with it, 5<sup>th</sup> sign from it, 9<sup>th</sup> sign from it and 7<sup>th</sup> sign and 2<sup>nd</sup> sign from it. Judicially combine the signification. It will give the indications of the desired matter.

For Character Analysis for Male take Jupiter. For Female Take Venus

For Wife's nature and details take Venus in Male chart.

For Husband's details take Mars in Female Chart.

For Marriage in male chart Select Venus and for Female Mars.

Jupiter or Saturn relation to selected planet will ensure marriage

The married life will be denoted by the planets associated with Venus and Mars in both the horoscopes.

For Education consider Mercury

For House, Property and Luxuries consider Venus

For Mother, Moon, Father Sun

For younger sibling consider Mercury

For Profession consider Saturn

For Business Consider Mercury and Saturn

For Dangers and ill health consider Rah over planets indicating the relatives.

Consider Ketu for obstructions, de-link and disputes

Consider Mars for tensions, violence and harassments

Consider Moon for travel, cheating and loss

These will enhance the qualitative details of the predictions.

***For this Purpose - the Sign is divided into 4 directions North, East, South, and West.***

The above is purely an introduction to Naadi system of prediction; however this can be used for acid test for the results we arrive in stellar astrology. For details please see "**Prediction Secrets Naadi Astrology**" by the same publisher.

Application of **Naadi System** for horary is explained at the end of KP Horary Chart analysis alongwith traditional method.

- *In the land of the blind, the one-eyed man is king.*
- *It is easier to destroy than to build.*
- *It is not appropriate to start digging a well when the house is ablaze with fire.*
- *Keep away from people who try to belittle your ambitions. Small people always do that, but the really great make you feel that you, too, can become great."*
- *Life is a bridge. Cross over it, but build no house on it.*
- *One who knows how to talk will have no fights, one who knows how to eat will have no sickness.*
- *Seeing the peacock, the rooster spread his wings.*
- *Strong winds may blow the tree down, but the grass will still stand.*
- *What you give away is yours and what you hide will go to others.*
- *Whatever you can do or dream you can, begin it. Boldness has genius, power, and magic in it.*
- *With grace of god even the most useless person can become great.*
- *You can't build a reputation on what you are going to do.*
- *You will receive the benefits only after paying the due.*

Beauty, arts, music, dance, drama, cinema etc., are other indications of this planet. Prostitution and related profession are indicated by this planet. It also signifies diabetes, phlegm, cold diseases and sex related problems. Womb and ovaries problems in females are indicated by this planet. Jupiter, Moon, Sun and Ketu are enemies to it. It rules over Taurus and Libra. In Pisces at 27 Degrees its get exalted and in Virgo it is debilitated.

**SATURN:** Basically all astrological texts attach all malefic indication to this planet. But it is a planet representing karma of person. As a matter of fact, it only gives the results accrued due to good or bad deeds done by the person. But being a karma karaka, it does support all works done by the person. But to be alert and not to commit sin, it delays matter enabling a person to think before the act is done. It makes the man to realize the purpose of life. Hence it promotes low profile in jobs. It also prompts the person with forewarning, by giving diseases, difficulties to make him realize his past mistakes. Being a planet of efforts normally the person is prone to lose physical strength and develop nerves disability. It gives chronic troubles and pains so that the person turns to self realization. Its colour is Blue. Western direction is attributed to this planet. It being a slow planet Laziness is attributed to this planet. It rules over natural 10<sup>th</sup> house of zodiac Capricorn and natural gain place 11<sup>th</sup> Aquarius. Sun, Moon, Mars, Ketu are inimical to it. Its exaltation is in Libra at 20 degrees and in Aries it gets debilitated.

**RAHU:** It is a shadow planet. All shadow deals are attributed to it. Traditionally it officiate Saturn in many ways. However Naadi differs a little bit. Saturn is a straight forward planet, where as Rahu is a shadow planet. The nature of work by its influence will have the tint of antisocial elements. Its colour is Black. It indicates the South West direction. It is an out cast planet. It is a planet of repetitive nature and hence over work is one of its significations. All things happen suddenly. Accidents, injuries and death are of sudden nature. It is foreign in nature and hence indicate all matters related to foreign. It indicates big vehicles, x-rays, atomic energy. It also denotes black magic. Asylums, Hospitals and Jails are places indicated by it. Its motion is always retrograde, hence many a times it reverses the matters. Thievish tendencies are indicated by it. It is also responsible for illusions as it is a shadow planet. If any disease is influenced by it is beyond the scope of medical tests and cannot be identified. In general it indicates the long parts of the body, like intestines etc., it does not rule over any sign as lord. However some texts have prescribed Taurus as its exaltation point and Scorpio as debilitation point. This is possibly because Venus has some affinity with secret affairs of Rahu and mind must co operates for such acts. Therefore the exaltation place of moon is also attributed to Rahu. In general when Rahu influences the Moon the persons will be eccentric in nature. Mostly this is found in celebrities. Rahu represents Islam religion.

**KETU:** The nature of Ketu is quite different from that of Rahu. Though there is suddenness in their results, the nature of results varies. Rahu normally supports materialistic benefits and prompts towards sin. Ketu robs materialistic comforts to turn him philosophical. For this peculiar reason for all materialistic achievements, Ketu acts as obstructive planet. It supports the

service oriented knowledge and works. Thus, a doctor, a preacher, astrologer, exorcists are all supported by Ketu. Philanthropists, Monks, endowment officers, are all indicated by Ketu. In general it creates dejection towards bondage of work, love and accumulation of wealth. Thus, obstructions, quitting, divorcing and separating are some of its dangerous qualities, if viewed materialistically. It is a planet of abortive nature, injuries and disputes. It indicates cancer, piles and growth related health hazards. Mercury, Venus, Saturn are inimical to it. Ketu also do not have any ruler ship over signs. Ketu is debilitated in the sign where Rahu is exalted and vice versa. Ketu signifies Christianity.

In order to use the proper signification with the combination of planet at different levels which is explained elsewhere in this book, the significations of planets and its enmities are modified as per Naadi rules enabling the students to get at the right combination of results.

## **20. ROLE OF PLANETARY SIGNIFICATIONS AND HOUSE MATTERS**

In stellar astrology the planet gets linked up with the Cusp at various points as detailed earlier and there are different dignities to the planet while linking to these cusps.

A Planet posited in a cusp is more important because it covers the entire house.

The planet situated in a house will add up its signification to the house signification. Then either he himself or the planet in his Star will give the results of the house with these modifications.

The Sub Lord of the Cusp or Star lord of the Cusp is activated by a planet posited in its star. In the event of no planet in its star

the same Sub or Star Lord will participate in giving results.

That means a cusp Sub Lord, if associated with other cusps as a planet will modify the house significations according to its nature.

This is again same as above we need to change the dignity of planet and read the same result as above.

As far as association of planet to planet is concern we recommend the Naadi significations cited above.

It would be single point of view to give in running texts for each planet related to a cusp in different manner and there is possibility of missing the signification and co -relating with signification of house. We have therefore adopted a table format where in for each house matter we have tabled the significations of planets. This would enable the reader to assess the impact on every aspect of house and planet significations and arrive at results. By marking significations to each planet we can also derive the cusp relationship for each Significator.

## **22. K.P. HORARY CHART ON NUMBER BASIS**

we cast the horoscope based on a number between 1 and 249 pronounced by the consultant for a question. We take the Ascendant as the number denoting the sign, star and sub in the table given. We have the commencing point of Lagna for a number given, in degrees, minutes and seconds. All we need to know is the corresponding houses to this particular rising degree of Lagna. There are number of astrological software available and most of them provide the facility to erect a chart for stellar system and a few of them have provision for number charts also. But for those who do not have software that can give a number chart, we can use the regular software with requisite ayanamsha alternations.

For this purpose we will take an example horoscope for a serious question. Today is 5<sup>th</sup> June 2007. We shall put a question now: the Question is:

***"What is that I am doing? When it will be completed and how?"***

KP Number given

**34 Time 19:07. Week day is Tuesday.**

Now the Lagna for KP No 34 is 17:46:40 Vrishabha. The Sign Lord Venus, The Star Lord is Moon, Sub Lord is Mercury.

**(Note:** The Lagna Sub Lord itself indicates, the matter: Writing and Publishing, Moon+Mercury is Astrology, Venus is Expertise. The Day Lord Mars indicates Printing and Publishing.)

Now we cast the horoscope by computer for Kp No: 34.

If we use the computer with the horary number facility we can use that. Other wise we can use regular programme and arrive at the Number Lagna.

We will use now regular programme and put the horary chart by computer.

The Lagna for Number 34 is Taurus commencing at 17.46.40. On 5-6-2007 sunrise at Hyderabad is 5-41 a.m. and the rising lagna is "Vrishabha".

Vrishabha Lagna is at 19.14.21 degrees but we want Lagna for 17.46.40. We have to reduce 1 degree, 27 minutes and 41 seconds to match the lagna degrees. For this purpose we have to cast little earlier than 5.41. 4 minutes of clock time is equal to approx 1 degree of Lagna. For 1 minute it is 15 minutes of Lagna. If we make 2 minutes more it is 30 minutes of Lagna. Therefore we must reduce the time little less than 6 minutes. After adjusting the time to 5.35.02 a.m. we get the lagna Vrishabha at 17.46.40 as denoted by KP number 34. We can now consider the remaining houses as given by the computer.

***Note: This is only to note the Cusp points for 12 houses.  
No planetary position from this chart to be considered.***

For the same number we have also used a programme which facilitates to give the cusp points, by using number. The following are the cusp points reported by this programme.

| <b>s</b> | H  | D  | M  | Sec | Sgl | Stl | Sbl |

There is hardly any difference and up to sub level we get correct report in both the horoscopes.

But we normally use the former method due to updated data resources being used for computation of houses and we shall also be taking the planetary position for the time of question from the same programme. Of-course, we must check from the software programme whether it is backed up by reliable technical support with sufficient knowledge on the subject.

Now to get the planetary position we have to again use the normal programme and cast a horoscope for the date and time 19.07- 5th, June 2007. and take only the Planetary position.

| Sn  |          | Degree | Str Sub |     |

| Rah | <b>0</b> | 17°33' | Rah     | Sun |
| Ket | <b>n</b> | 17°33' | Ven     | Mar |

Incorporating these two we make the Question chart.

***In order to make easy application of rules, we have designed a desk board where In all the components are taken care off, giving the Significators and their performance capabilities at one stroke.***

The replicate of desk board appended herewith for ready reference.

We shall give the details of analysis:

In this example chart we have not disclosed the content of Question, and wanted to know what exactly I am doing at present. For this purpose we have to Analyse Lagna (the ascendant)

1. Lagna is Taurus. Venus is lord of it who is in the Sign of Moon. Moon indicates mind and mental work. Taurus sign is of speech.
2. The Lagna is in the Star of Moon and sub of Mer. This re-confirms the work is related to intelligence.
3. Sun is posited in the Sign. Sun the King of all planets indicate the atma, dignity and status. He is also in the star of Moon and he is in Venus Sub.
4. Jupiter aspects Sun and is again in Mer Star and Ven Sub. Jupiter is divinity, adviser, preacher and religion.

The Lagna is indicating the divine subject of intellectual nature of high status which relates to planet connected with it. The combination of “Moo+Mer+Jup” itself indicates Astrology, Sun is brightness, bringing to light, the subject astrology. Mer is publishing and writing.

The Planets involved in Ascendant have disclosed the nature of

efforts by the self. Now let us take up the Ascendant Sub Analysis.

Sub Lord of Ascendant is Mercury:

See the Desk Board:

Mercury is indicating:

1<sup>st</sup> Level - 2, 4, 6, 10 -Translation, Education, Efforts and work

2<sup>nd</sup> House is taken for translation because it is the house of additions; it is the house of expression and speech.

3<sup>rd</sup> house represents original writing. Present book is the modified presentation of its original Telugu version.

4<sup>th</sup> House is basic knowledge; this work contains most of the basics in detail.

This is an educative book.

6<sup>th</sup> is efforts - 10<sup>th</sup> is recognition and profession.

At the 2<sup>nd</sup> Level it is indicating 1, 5, 6, 7

It is the higher knowledge of divinity 6<sup>th</sup> and 7<sup>th</sup> is indicating self efforts for society.

1<sup>st</sup> and 6<sup>th</sup> indicate sickness. Of course, I was not well and 5<sup>th</sup> shows recovery, now I am recovering.

Mer is in its own sub and hence all the above is again supported by Mer as Sub lord.

Planets involved, the Sub of Ascendant have all confirmed the nature of work involved and the conditions thereof.

The Moon representing the mind must reveal the actual matter.  
Moo in Desk Board indicating

1, 3, 9 at both at 1<sup>st</sup> and 2<sup>nd</sup> Level

It is writing work by the self, related to occult matter.

The sub lord is indicating

1,2,5,6,7,8,11

What all the Ascendant has disclosed is confirmed by Sub lord of Moon.

Now it is clear that the both Ascendant and Moon confirmed that I am doing a work of astrology, translation, addition, modification and writing and publishing.

Now we should go for matter confirmation by 3<sup>rd</sup> house Cusp sub Lord.

3<sup>rd</sup> Cusp Sub Lord is Ven.

In the Desk Board Ven indicating:

1<sup>st</sup> Level 3, 9, 10, 11

Since the matter is confirmed at the 1<sup>st</sup> level itself it is not necessary to go into other levels. However other levels will again indicate same as Ascendant and Moon, in this case.

Having got the matter confirmed we need to go in for significators for houses 3,9 and 11 which are to be seen for writing and publishing which fall under communication.

In the Horary astrology, once the confirmation of matter and right selection of relevant houses are made, we need to look directly for Dasha Bhukti and Antra Lords who would be indicating these houses to time the event.

Look at the Dasha Bhukti and Antra statement attached.

Moon Dasha is currently running:

Moon had already established his strong signification for the required houses.

Jupiter is Bhukti and Antra Lord running from 05-06-2007 to 12-07-2007.

During this period the work cannot be completed

- 1) Due to the fact that the work is in progress and may not be completed by this date.
- 2) Jupiter is retrograde and he does not cross over to 6<sup>th</sup> house and will be staying in 7<sup>th</sup> house itself and 7<sup>th</sup> is not detrimental to the matter under consideration.

However, the work will have to be completed only after this date

After 12-7-2007 Saturn Antra Begins and it lasts till 26-09-2007.

This is the right period for this work to get published.

Now, we shall use the dictum of Prof: KSK, that a retrograde planet will give result only after it becomes direct.

Jupiter as Bhukti Lord in our case is becoming direct only after 7<sup>th</sup> August 2007.

So we safely accept this rule and try to pin down the event between 7<sup>th</sup> August 2007 and 26-9-2007.

It is now the Sun transit which is more useful in pinning down the timing of event.

After 7<sup>th</sup> August Sun will be transiting in Moon Sign which is 3<sup>rd</sup> house of Horary chart and he will be transiting in Jup /Sat sub during 11<sup>th</sup> to 14<sup>th</sup> this is the period of fructification of this work.

The horary answer can be cross verified by Naadi system and Traditional Astrology method. For this purpose we need to cast the horoscope for 5<sup>th</sup> June 2007 at 19:07.

| N         | E                | S  | W                    |
|-----------|------------------|--|----------------------|
| Mar 21:49 |                  | Sun 20:34  | Mer 13:35            |
| W         | Rah 17:28        | Date - 05.06.2007<br>Time - 19:07:00<br>Week day - Tuesday | Ven 5:51<br>Sat 26:2 |
| S         | Moo 13:53        |  | Ket 17:28            |
|           | Asc<br>Jup@20:59 |  |                      |
| E         |                  |  | S                    |

In Naadi system Lagna is not essential. Since we are also looking into Traditional method we are marking Lagna also in the above chart.

## Naadi Method of Analysis:

## The grouping of planets according to Direction

Since Jupiter is retro we have shown it in the previous direction also.

The hora lord at 19:07 is Jup.

Jup is in North Direction: He is in the House Mar.

Jup is connected to Ven & Sat.

Venus is "Paanditya" i.e. higher knowledge.

Saturn is "Karma" i.e. Work.

Jupiter is Jeeva - that is human life.

Jup connects to Mar, Mar is printing.

Jupiter is Retro and Joins Mer.

Mercury - Writing, publishing, knowledge.

Mercury is in the Axis of Rah and Ketu.

Rahu represents Secrets, and number of persons.

Rahu since connected to Jeeva represents number of "Jeeva"

Ketu in axis indicate occult subject

Ketu in the house of Sun - the house of Atma

Summing up all we get the matter denoted by Hora Lord Mars.

It is a work of secret knowledge related to human beings being written and published.

Now the timing of event is based on the transit of planets.

Jupiter becomes direct in August remain in Vrishchika and by that time

Mer and Sun will get connected to Jupiter. Saturn transits in Simha connecting Ketu and Rahu.

This is around 2<sup>nd</sup> week of August.

Analysing by traditional method:

Lagna is Scorpio

Jupiter is in Lagna and aspects 5<sup>th</sup> house, 7<sup>th</sup> house and 9<sup>th</sup> house

There is an exchange of Moo and Sat in house 3<sup>rd</sup> and 9<sup>th</sup>

Sat is aspects 11<sup>th</sup> house

The Lagna Lord has linked the houses 5,7, 9 and the 3<sup>rd</sup> Lord

The matter is of higher knowledge to society which is related to occult subject and under publication.

Timing of the event:

Dasha Bhukti and Antra

Moo-Jup-Sat-Sat = 06-08-2007 - 18-8-2007

The planets that are involved to fructify the matter have all involved during the above dasha, bhukti, antra and sukshma period.

Confirming from other methods will make the astrologer more confident in giving prediction to the consultants.

SATYANARAYANA NAIK

## **23. REMEDIAL MEASURES**

The karma theory is the prime key factor in Indian astrology. The planets are designated with the powers to bestow the persons with the results of past karma at appropriate time. There are several theories with diverse opinion with regard to this. During research on the subject "Remedies" I have experienced certain incidents. It is worth to share these with the readers.

I have been suffering from bronchial infection resulting in breathing problem. Even after consuming different types of antibiotics for several days, there was no improvement and some other problems developed in the digestive tract.

During these days I happened to meet a gentleman called Sri Kondeti Nageswara Rao, who is a yoga specialist conducting classes at Hansa Yoga Kendra, at Hyderabad. During my meeting with him, he showed me some of the case histories of curing cancer, Leprosy, Asthma, thyroid problems by advocating Asanas and Pranayama.

Of late, there have been many TV shows and camps of Sri Ramdev ji Maharaj, claiming the cure for many diseases through yoga and pranayama. All these encouraged me to take a chance and see how these will work on my problem.

Day by day I found there has been improvement in my health and at the end of 1 month my lungs were clear and I had stopped taking the antibiotics. I continued these exercises and with in a period of 4 months I recovered all my confidence and now my health is under total control.

There is a classic quote which says "**the Past karma will trouble**

the person in the shape of chronic diseases". Planets give the results of karma in the shape of diseases. The diseases are cured by practising yoga and pranayama. Logically, it means that we are appeasing planets through yoga and pranayama.

If planets are appeased by yoga and diseases are cured, then why should not the same yoga and pranayama give relief from materialistic problems.

By Pranayama, the mental confidence will be increased.

By Certain Yoga the energy centers are activated.

The energy centers are

Mooladhara

Swadhistana

Manipura

Anahata

Vishudha

Ajna

Sahasraara

Mooladhara is the - Foundation which is essential for strong base and denotes confidence and radiance.

Ajna is relates to Knowledge

Manipura is for work

Anahata is for relationships

Vishudha is for social activities

Swadhistana is enjoyments and desires

By practice of simple yoga and pranayama the chakras can be energised.

no

Instead of going into details I would like to introduce the simple yoga and pranayama by which all the six charkas are activated and the planetary propitiations are fulfilled, to a great extent.

### **Warm up exercise**

- 1) Gentle jogging 36 times forcing breathe while exhaling through both nostrils, keeping attention on right toes. Repeat this shifting attention to left toes.  
Repeat this 3 times.
- 2) Stand erect facing east, take deep breath and exhale slowly  
Repeat "Om **aadityayacha somaaya, mangalaya, budhaayacha, guru shukra shanibhyascha raahave ketave namaha**"  
Repeat 19 Times.
- 3) Lie down flat facing sky. Keep your legs straight a foot apart and hands on the sides.  
Keep your palms a little away from the body.

Now breath out repeating Om: while pulling stomach inside to its maximum repeating 1 Gayatri mantra.

Gradually chant up to 5 gayatri mantras.

Now relax with inhaling the air slowly. Do it 6 times at each charka starting from Mooladhara to Anja charka

Now relax and close your eyes and experience visualizing each part of the boady from toes to head with normal breath. Remain in that state for 20 minutes and then slowly get up and sit in Padmaasana.

Breath a little fast with both nostrils and close eyes and concentrate on Anja charka.

Relax for 5 minutes and get on with routine.

This will increase your level of concentration and confidence and will be able to discharge your responsibilities with ease.

### **Homa and Daana Prakriya**

Offering planetary cereals into fire by repeating mantra of each planet.

For this purpose we should know which planets are creating problem.

In KP it is very easy to find out

After selecting the signifying planets for a particular matter, find out if these planets are in the sub which are signifying houses which is detrimental to the matter under consideration. Select those sub planets and offer grains related to the planets into the fire or donate the same to cow or poor.

***Sun - Wheat, Moon - Rice, Mars - Redgram, Mercury - Greengram, Jupiter - Bengalgram, Venus - Beans, Saturn - Til, Rahu - Urad, Ketu - Horsegram.***

While offering in to the fire, repeat the Bija mantra of each planet and offer thrice in the fire for the selected planet with the relevant cereal dipped in ghee.

To feed a cow a minimum quantity of 1.25 kg. of mixed grains recommended. For feeding poor, cook the respective grams as food or side dish and serve with rice or rotis.

Use readymade copper pyramid type vessels to offer grains to planet in fire. This should be done facing east. Chanting of Gayatri mantra is recommended.

The Bija mantras can be had from any books of pooja of navagraha or there are several books having these details. These mantras are short in length and therefore it takes few minutes perform this ritual. First offering to Ganesha with cow ghee is recommended.

After offering the grains give thrice tharpana to each planet.

Visit the Navagraha Temple and make pradakshina and namaskara on the prescribed days.

### **Gem therapy**

Similarly, you can wear the stones of such planets as described earlier:

If the sub Lord is indicating negative results of the required house signified by a Planet and

- 1) If the Sub Lord is Sun, Mer, Jup, Ven, Sat, do not wear these stones of Sub lord but instead wear the stones of the Planet signifying the House
- 2) If the Sub Lord who is obstructing the matter are Moo, Mar, Rah or Ket wear the stones of these planets.

This system is based on the nature of gems which are transparent and opaque in nature. The later are opaque in nature which reflect the bad rays and allow the signifier to function.

The former absorbs light which renders more obstruction to the planet signifying "matter". Therefore we avoid this and wear the gem of planet signifying matter..

Besides this theory gem can also be prescribed based on **naadi** system which is purely dependent on signification of planets.

Here major obstructing planets are only Moon, Mars, Rahu and Ketu.

Affliction by these planets, as per naadi system, to any of the other planets such as Mer, Ven, Sat Jup and Sat are considered and gems are prescribed.
