What Seminar Contains.....

Our theme is not Astrology
But
How Astrology help to track Markets.

What Seminar Contains.....

- ✓ Argha Martand is science which predicts everything from Rainfall, Crops, Demand and Supply structure of all that is traded in this universe.
- ✓ Our theme is to find what Yogas rule the year.... Bullish or Bearish.
- ✓ Also trying to fine tune timings of those bullish or Bearish Yogas throughout the year.

Swing Analysis

For swing analysis we have focus on 3 things....

1. Sun Mercury conjunction which happen 6/7 times a year.
2. Earth on vishuv bratt (Equator)....which happen every 13/14 days every month and provide great short term direction.
3. Total Day concept which is very unique but found to be very effective..... Total Day is once a month....known being total of Date + Month = year.....

for example 16.1.17 is total day of January 2017.

Trading – Very Short Term

For very short term trading we have focus on following...

1. Apogee (Moon far away from Earth) as Bullish
2. Perigee (Moon very near to Earth) as Bearish.
3. Many others like :---
 - ✓ Kshay Tithi,
 - ✓ Vruddhi Tithi,
 - ✓ Day & Nakshatra Lord Same,
 - ✓ Sankashti,
 - ✓ Vinayak Chaturthi,
 - ✓ Ekadashi on Friday and like wise.
4. Moon Saturn Dwidwadash Yog which is supposed to be Bearish....

Theme of every short term Yog is....

- ✓ Verify if some contra Yog too operating simultaneouslyin such cases we must resort to hourly or 30 minute RSI for probable trade.
- ✓ Any event like Apogee, Perigee or planets rising or combustwe must track exact time from Google...as all Panchang have different timings....
- ✓ This way we can reduce our risk substantially.
- ✓ **Disclosure....**I use Janmabhoomi Panchang from Mumbai which is 250 years old n high reliability....but still fine tuning time from Google no harm.

Sun Mercury conjunction....

Sharing few example of 2016....

13.9.2016.....8746.95 high 8699.40 Low.

Either side is trade on breakout or breakdown...first it gave upside breakout above 8747 n made high near 8893.35....failure to sustain above gap of 9.9.2016 created weakness.....breakdown on 27.9.2016 led to more than 200 points fall on 29.9.2016....continues lower highs created big resistance near 8747....

28.10.2016....8653.75 high 8581.75 Low

Failure to sustain above high was led to breakdown n once low was broken it led to vertical fall of more than 750 points.

29.12.2016....8111.20 high 8020.80

Gap up after such important days is big indication...we are witnessing the fruits of breakout till date n nifty has already made 8461.05 so far.

Regarding 2017....these conjunction dates are shared on **Page no.10/11**

Earth on vishuv bratt (Equator)

This day is known as Gann Date too but not revealed reason by him anytime.... it comes every 13/14 days n effective till next date but prices on these days play important role till taken out on other side...

Sharing few examples of 2016...

October 28th....close of this day was 8638...nifty tried to protect it for 2 days but failed to close higher anytime..once low of 8581.75 was breached....it reacted to 8002.25 before next such event.

November 11th....close of this day was 8296.30 which was broken through gap down next day...by next such event low was done 7916.

November 24th....close of this day was 7965.50 n once high of 8024.85 was crossed it has risen to 8274.95.....

December 9th....close this day was 8261.75....gap down on next day led to another fall n by next date made it fall to 8053.25

December 21st....close this day was 8061.30...gap down next day led it to low of 7893....once it crossed 8061.30....made it rally to 8282.65..

Rule....whenever there is 2 way break....trade should be reversed.....also tracking these events with RSI give high rewards.

Total day or complete day.....Nifty

Formula add date with month...should be equal to year.

15.1.2016....range 7566.50 high 7427.30 low.

With lower side break next day low is 7241.50. Bounce from there later in month failed to close above 7566.50....

Break below 7427.30 again....made low @6869 by next total day.

14.2.16 is Sunday so last working day range taken....6869 low 7034.80 high Cross of 7034.80 took it higher to 7252.50. Fall again to make low @ 6826 but refused to close lower.

Cross of 7034.80 again took it to 7543.95 by next total day.

In the year....all big price points like 7566.50H/6869L/8353.30L/8723.50H/8968.70 H are done on either total day or previous day prior to total day....

Apogee & Perigee

Distance of Moon and Earth known as #apogee (far away) or perigee(very near)

Most important....

Full moon and Perigee together is called super moon too.....very bearish combo like 11th Feb 2016 or 14th November 2016.

Perigee when moon near to Earth witness negativity so Bearish.

Apogee when moon far away from Earth denotes optimism so Bullish.

Only important point to note.....Timing of Apogee or Perigee may differ by 12 hours +/- so Stay away better to check the same on Google 2 days prior to event....

Kindly refer page number 43 in the book for Apogee & Perigee.

Mercury Com-bust & Rise Cycle

25.12.2016 west	01.01.2017 East	Yogantika
17.02.2017 East	17.03.2017 west	Vimishra
14.04.2017 west	28.4.2017 East	Ghora
12.06.2017 East	30.06.2017 west	Tikshna
17.08.2017 west	01.09.2017 East	Ghora
26.09.2017 East	29.10.2017 west	Prarkrata
09.12.2017 west	16.12.2017 East	Yogantika

Rule

- ✓ When Mercury is ahead of Sun by 18 degree & become Stationery & change Direction....gets com-bust in west.
- ✓ When same mercury moves behind Sun by 8 degree, it rises in east.
- ✓ When mercury is behind sun by 16 degree & direct in 90 plus speed, it gets com-bust in east.

- 
- ✓ When same Mercury speeds at highest & moves ahead of Sun by 12 degree, it rises in west. (Many Astrologers count it rising at 15 degree distance making difference of 2/3 days).
 - ✓ Bull or Bear..... all cycles except. Prarkrata are bullish but except... Yogantika others are volatile too..... Prarkrata is basically bearish but Major impact of bearishness comes after Mercury gets conjunct with Sun.....as an example on 28th October 2017, Mercury got conjunct with Sun & market went in major correction till 21st November when Mercury rises in west.

Contrary Rule.

- ✓ If Mercury com-bust is bearish but gets aspect of auspicious planets, it does bullishness instead of bearish.
- ✓ If Mercury com-bust is bullish but gets aspect of malefic planets, result is bearishness instead of bullish.

How Merecury in Prarukrata Speed Spoils The Markets

Just an Example:

On 13.10.2016 Mercury got com-bust for about 38 days Made Markets Volatile.....it Conjunct sun on 28.10.2016 while Nifty spot was 8636 tried to hold it for 2 days but failed.....by the time it risen on 21.11.2016Nifty was down to 7916.

When Sun is ahead & Venus is behind, Mercury i.e. Son of Moon comes in the Middle Markets deliver big Returns.

In 2014 when this happen middle of February till end April nifty had Phenomenal Rise from 6000 to 6900.

In 2016, this Yog got muted in Feb. 16 because Rahu was passing from Jupiter star in D9 charts....once that passed over Nifty risen from 6900 to 7700 in 3 weeks.

In 2017 this Yog happen twice & has no blockage like 2016 Mid **Jan to Mid Feb...**

Period as under....

From 20th April to 22nd June 2017 from 27th August to 8th October 2017.

Result

Distance in Mercury Venus is exceptional event which keeps sentiment positive for larger time frame.....same situation was from March 2009 to early Jan 2010 when nifty risen from 2540 to 5350. But Venus getting retrograde on 5th March can prepone by bottom by few days

Conjunction Result

11th to 18th March will be high Bearish & Major Turning on 18th march +/- 1 day. This conjunction in pieces provides fall till point of conjunction than markets Same is Result For December 2017 Conjunction

Technical

Just Watch Pictures, if 12 days RSI pattern can make Nifty rally 2150 points.....last 1 is more than 27 days pattern.

Nifty Quarterly Chart Analysis

- ✓ Nifty from 2003 to 2013 is an ascending triangle pattern.....gave breakout prior to general election to peaked in March 2015 first week....thereafter it gave 1 year correction as pullback to previous highs though pullback was made short of touching breakout line....
- ✓ Though its rising continuously since 20th December 2011 after making a low of 4531.....still no bounce has survived more than 5/7 months.....sustained rallies are just dream.....why?..even Stochastic in swift up or down since breakdown in early 2008.
- ✓ Cycles....presently we are on borderline of many cycles.....55 Quarter from April 2003 low, 34 Quarter from Oct 2008 lows & 21 qtr from 2011 lows..... first Quarter of 2017 is ending all these cycles making it high probability zone of another breakout by end of this Quarter...

Only since Sep 2013 Quarter....we have completed 13 Quarter making it high probability that either low is done at 7895 or will be done in same vicinity in next 11 weeks... why 11 weeks ? ... will explain later with weekly charts.

Stochastic Positioned Conversant with These Cycles.

Same time-frame will be explained through astrology also .. which is supportive to this count.....

What is target? ... Kindly Don't take these Retracement lines on face value but even most conservative arithmetical Calculation too give target of 11000 + in 2017.

Use of Simple Moving Average Scientific Way

Most analysts world over use 10, 20, 30, 50, 100 & 200 SMA to track the market.....but i have found lots of flaws in them.....markets are not disciplined but we have to be disciplined.

My first observation is Fibonacci numbers provide more reliable support & resistance than these absolute numbers..... watch 89 SMA & its control over markets in **picture 1**.....buy above it sell below it for positional..... also any pullback towards this average is great buying or selling opportunity..... if they are breached either side for just 1 or 2 days (casual breakdowns & breakouts meant to trap the people).....

Reversals thereafter more powerful..... if we apply them with RSI, it becomes very powerful tool..watch **picture 2** for RSI..

RSI fundafalling tops in RSI near the 89 sma is sell while rising lows with rising highs is buy near this sma.

Use of Smoothened Averages Based on Fractals For Trading

This is very secret but more effective way of trading set up.....

I use the numbers 13,34 & 55 for this kind of setup.....

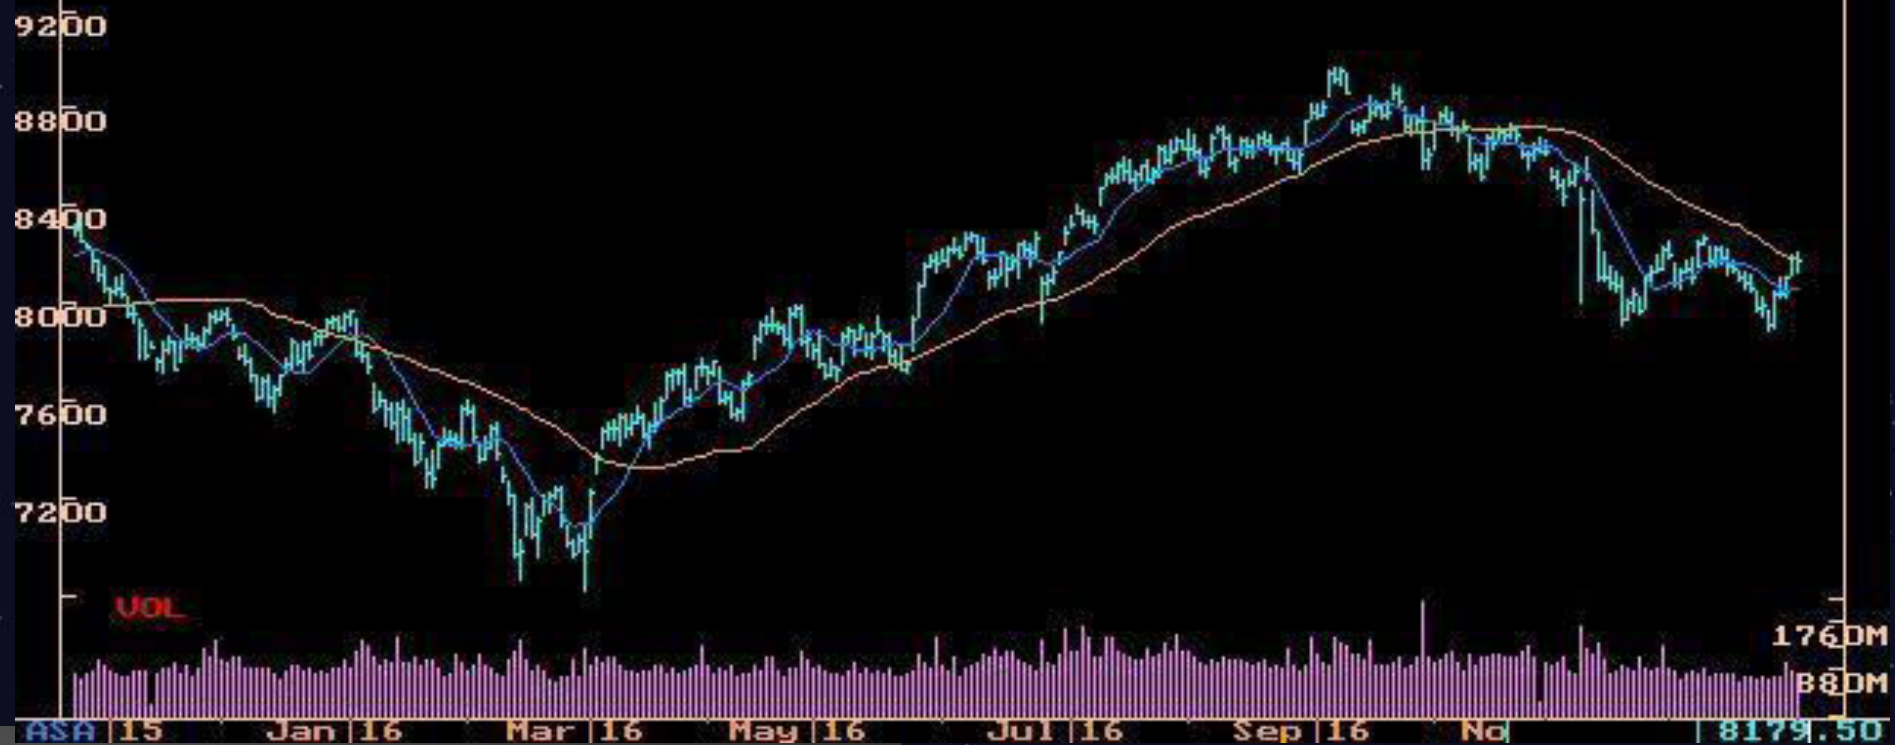

Method

Take any number of these 3 & calculate .786% of that.....numbers we derive are 10, 27 & 44....take the residual 3, 7, 11 as other numbers.....you can use it for 1 week set up, 1 month set up or 4/5 month kind of set up.....

Will share few examples.....used 11/44 SMA set up for positional & same SMA for short term trading on 30 minute chart.....you can watch not a single flaw.

I use the number 233 & Derive 2 components based on 78.6% & residual numbers are 183 & 50.

Watch picture on 24th may 50 crossover of 183 resulted in huge rally of 600 points in 8 daysfailure to cross 50 SMA on 10th November made it FALL 700 - points..... again failure to cross 183 SMA on 9th December made it fall again 380 points.

Bank Nifty

Just Hovering in Range of 17600 & 18700 for Last 45 Days

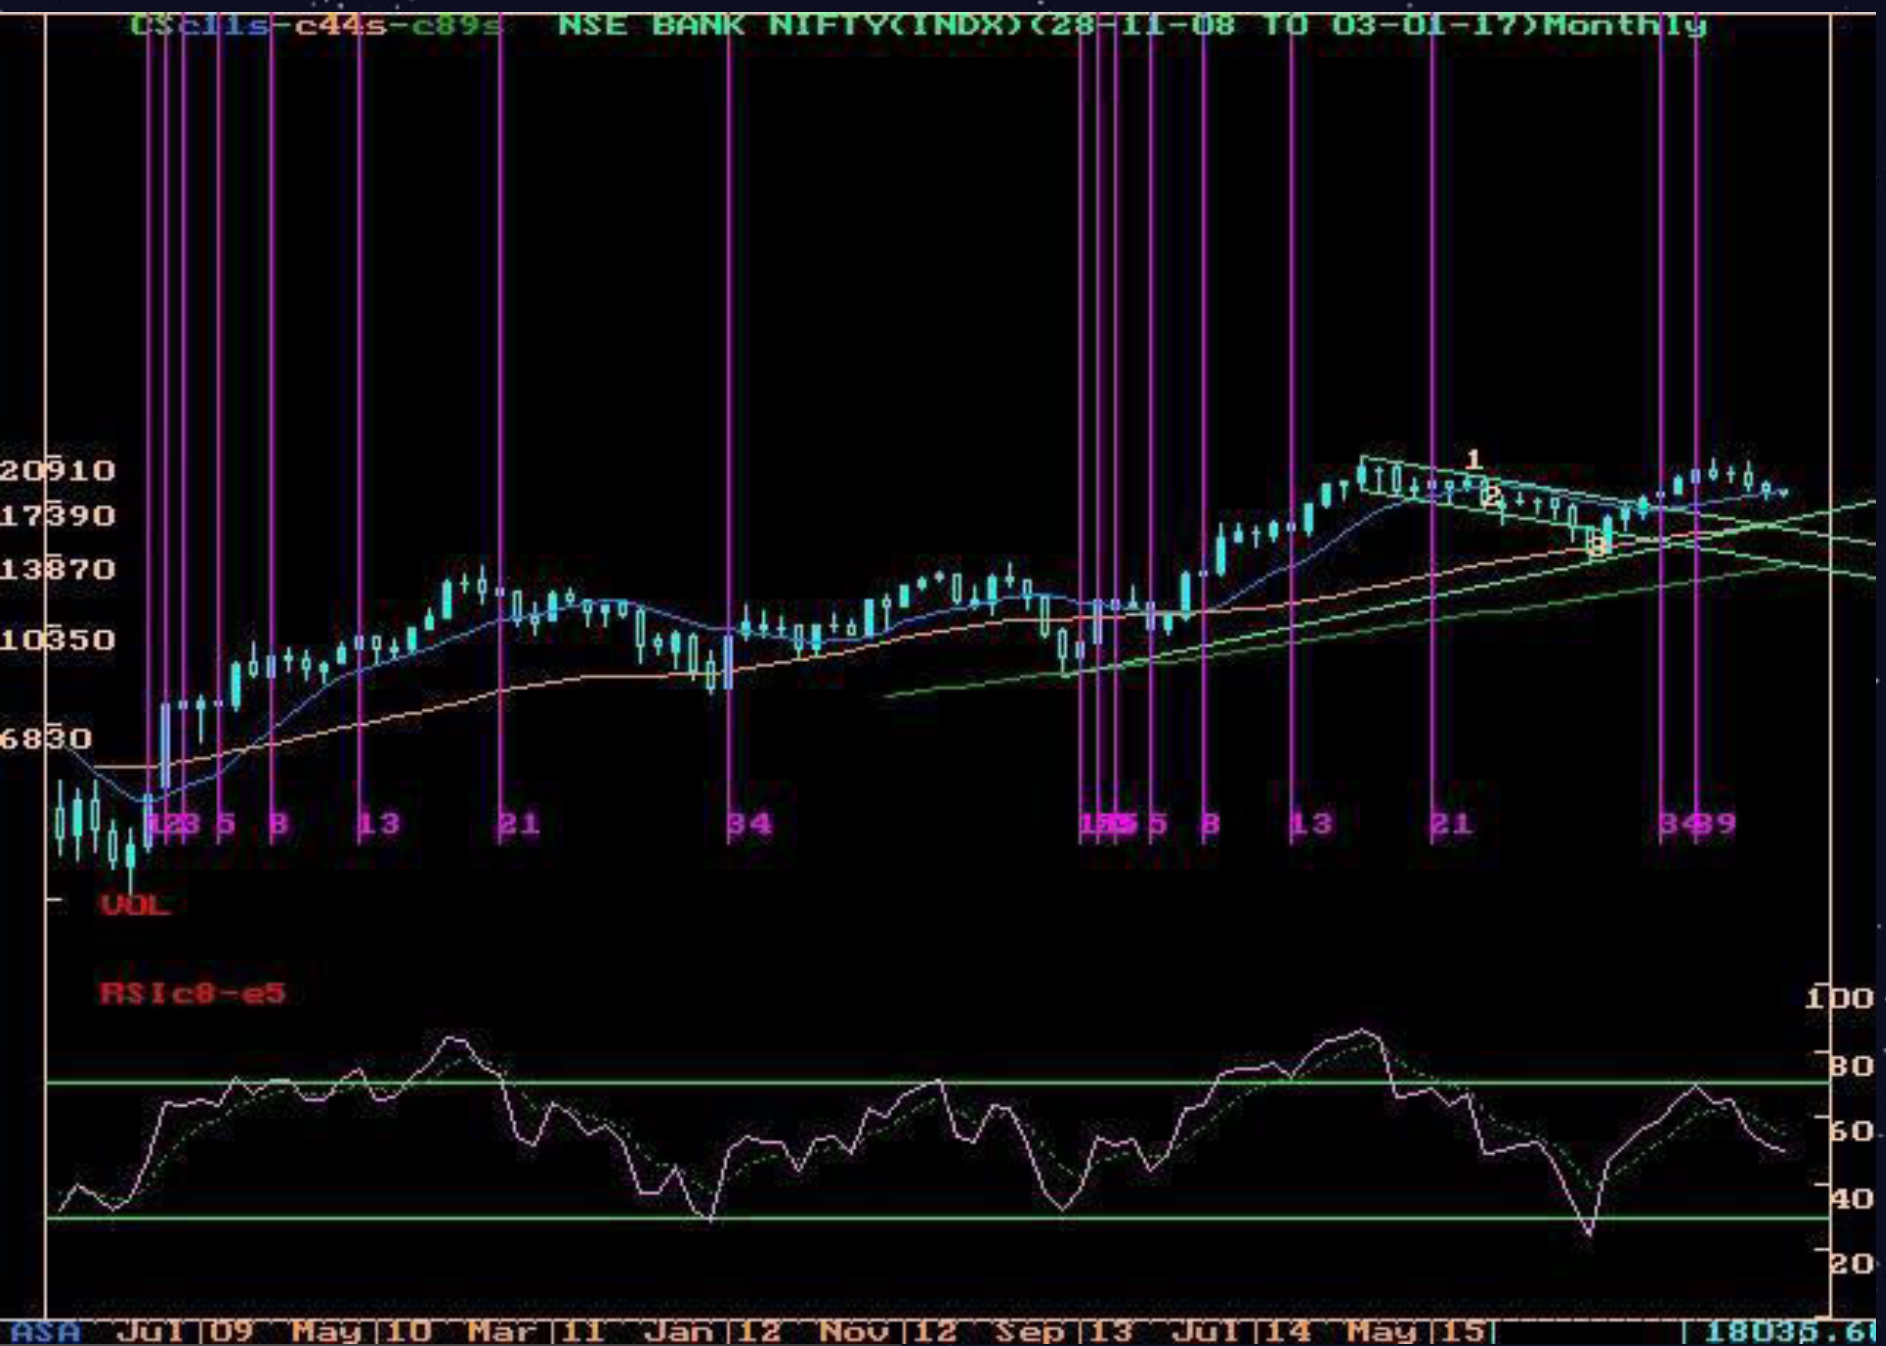

Support for Bank Nifty in immediate future is 17800/17600 if slips below it than 17100.....any sustained move below 17100 is bad for 16000 by march middle.

On the other side, 18600/18700 is short term resistance zone & any sustained move above this may take it to 19500 in far shorter time.....

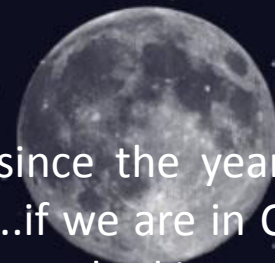

On cycle charts lows are seen here with nifty in march 2017...either 17100 or 18000 near while boom may come with a decay of 1/3 months After 3rd week of June..... banks are always last to start rally & last to Finish rally looking at mind blowing target by early October 2017.

Will reveal more at seminar.....turnaround in consumer spending and not at demand for funds are 2 prior requisite

Will share much more details in astrological post also.

Nifty IT currently at 10363

My Counting in information technology is its running primary 2nd wave since the year 2000...made lo A in 2003 while B wave has been extended till march 2015.....if we are in C wave, it will take minimum time equal to wave A which is roughly 3 years.....so looking at long term bottom in the first quarter of 2018

This move will get cancel if it cross 11400 anytime in 2017.....

In very short term ... it has tremendous resistance in 10440-500 zone & 11 months average which is declining may break 44 months average

anytime in next 1/2 months..... stop loss is sustained up-move above 10500while my very short term target remains last low of 9295if close below it any day, my counting will get validated for initial target of 8400. Telling since December 2015.....IT is untouchable.....will do more on astrological basis.

Nifty PSU Banks. Major Outlook

This index has been 1 of the worst under performer in 6 years till may 2016 there after has participated in rally....looking to time cycle...major upturn seen in late june 2017 till than 1 big jump to near 3900 plus from current 2940 is my vision.....once break past 4000 on sustained basis.....

visualize terrific rally which will surprise the most intelligent of this universe.....looking near all time high in October 2017.....major details in Astrological post.

This is my sector of the year for second half.

Nifty Metal @ 2715 - 2017 Analysis

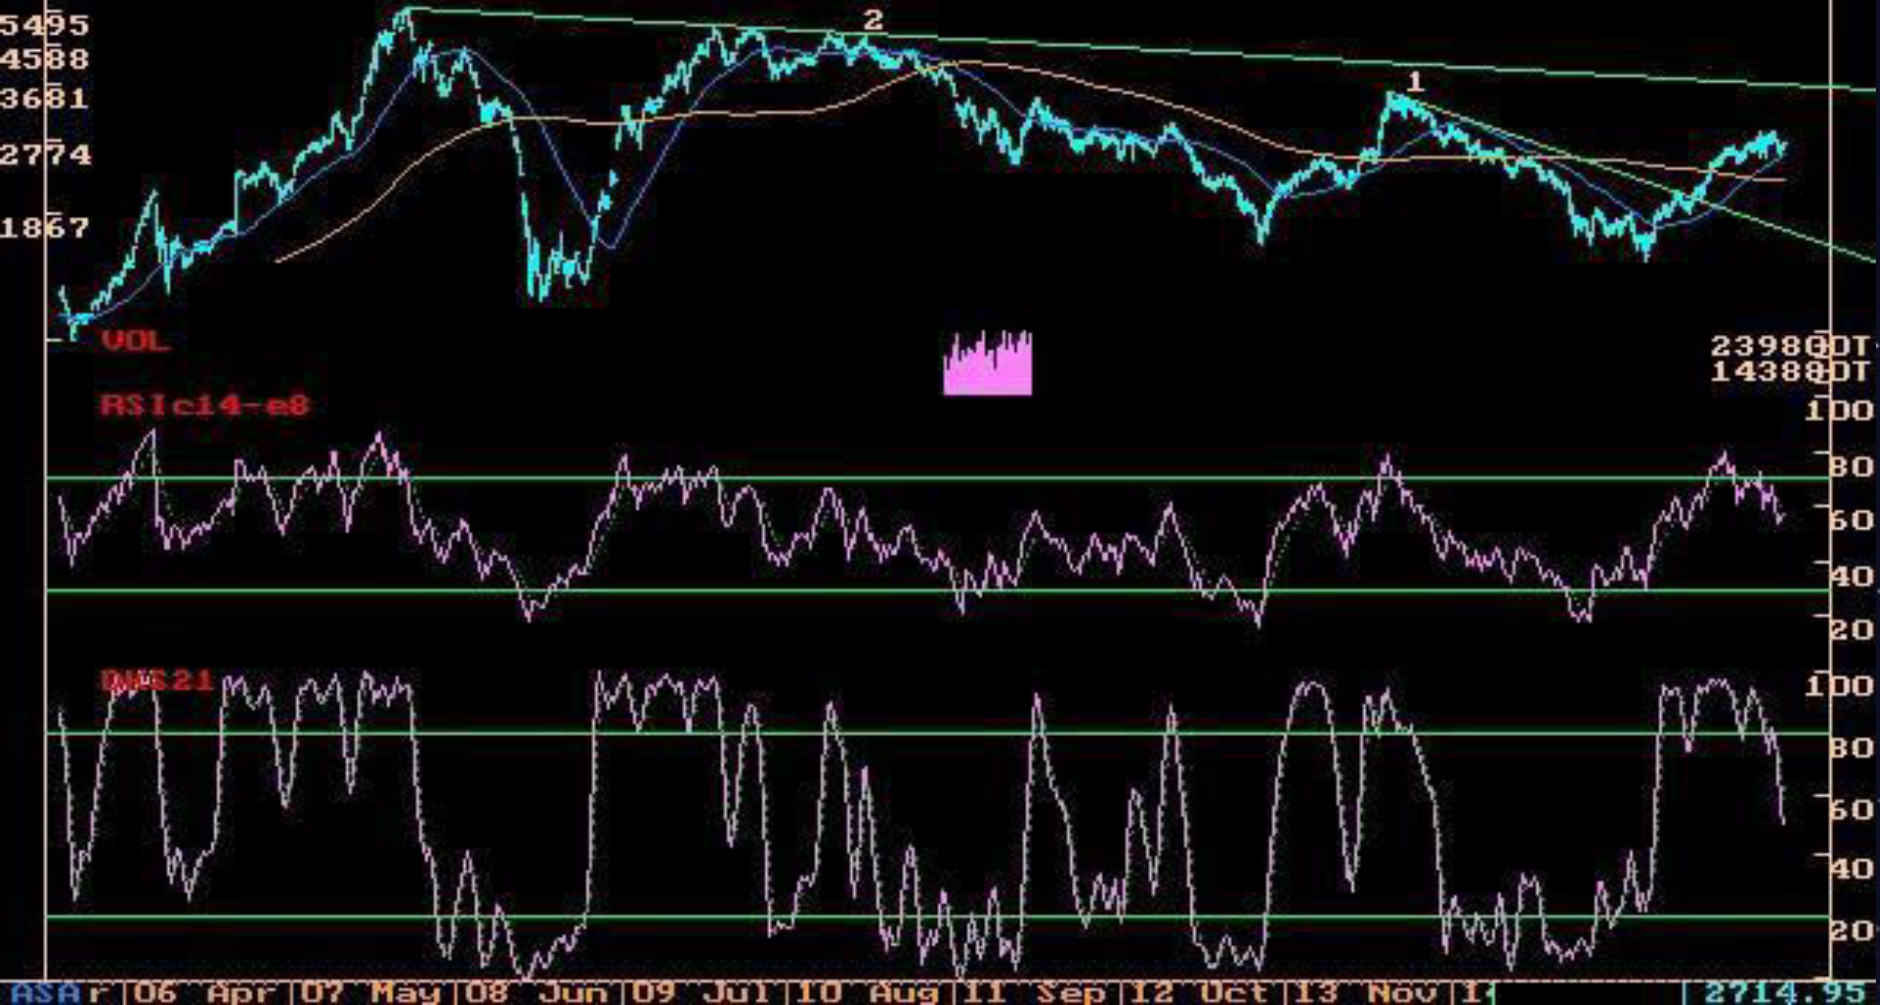

Since 2007 this index has formed an symmetrical triangle.....currently looks weak on highs but has great supports at 2650 & than at 2450.....

on the upper side has many Resistance till 2014 highs near 3600 which happen to be breakout fro m that triangle.....major turning comes in March with Nifty and real acceleration comes from 1st week of April looking at all time highs near in 2017...current weekly RSI & Stochastic tells to be cautious at every bounce.

Sector is ultra bullish & already sails into bullish territory.....

Short term also it has ability to enter 4300/4500 zone.....

Main time to watch will be pullback in Feb march time...

every dip is buy for huge returns.

Looking minimum 6000 target in 2017.... More in Astrological post.

Nifty 200 Mid Caps

On time cycle basis 55 Quarter we are running.....

so with lots of volatility We must consolidate till March 2017.....

on larger tf, its ascending triangle which gave breakout 2 years back & consolidation since then looks like wave 3 started in August 2013 & with consolidation to get over in March,.....we are heading towards iii (3) which may give huge rewards in 7 months starting march 2017.

Ad Line Ultimate Trend Decider.

It has been observed continuously whenever ad line makes a higher low.....
Market become bullish for certain period of time..... weak ad line indicates
distribution While strong ad line indicate accumulation.

On the given chart you all can see while Nifty went up from 8200 to 9100 in Dec 14
to March 15.... its resulted in disaster due to falling ad line..... same way despite
sharp fall in Jan Feb 2016..... it has resulted in huge rally because ad line
became lethal.

Similar pattern is observed recently while ad line at Dec 16 has made higher
bottom compared to Sep 16 fall near 8600 while ad line was far weaker that time.

This funda has 0% failure indication a far bigger rally in 2017 than 2016.

My analysis says its heading towards a euphoria in 2017 like 1992, 2007 & 2014
..... Intensity of euphoria will decide next leg of market starting late 2017.

Tech – Astro Analysis 2017

Astrologically Where Are We Heading In 2017?

Before we come to 2017.....

let 1 thing be clear.....

every single big high low is done due to influence of some astrological event.

sharing many examples.....

1. Top in April 1992 & low in 1993 in the same month of April.

in 1992, high was done early April....we had Hershel Neptune conjunctionHershel rules over unexpected surprises while Neptune rules over bull/bear syndicate.....this is worst conjunction in the life of bulls as per astrological method of market performance. .this passed on the baton from bulls to the bears with approximately first time after 4 long years....1136, 1307, 1478, 1649 and 1821 were the other years they got conjunct. also we had Mercury Venus conjunction in pieces early April in contra directional mode where Venus was moving ahead & Mercury moved backwards.....this proximity continues many times time still April 1993..... in April 1993, Venus Mercury met again in same sign in contra directional more but this time Venus was moving behind & they continues moving away till December 1993.....reason of this period being bullish.

2. Top in march 2000 & draconian event of 9/11 in 2001.

On 14th march 2000 while Jupiter & Saturn were passing through Rase, Saturn, their distance got reduced to 7 degrees & Jupiter started approaching Saturn with faster speed.....this conjunction is life changing event & coming together of these 2 planets is never peaceful in the lives of human as well as society.....these 2 planets together expose lot of evils carried on under the guise of normalcy. next day we had Mercury Venus conjunction in the sign of Aquarius in the star of Rahu.....another draconian bearish formation....as both were direct with normal speed, there was no relief even after this conjunction. in 2001, we had Rahu Jupiter conjunction in Gemini in the Ardra Nakshatra ruled by Rahu.....which was worst conjunction for bulls.....relief to Indian markets was provided by increasing distance between Venus & Mercury was ahead post 9/11big impetus was provided to market by 3/11 yoga of Mercury & Venus..... trine 5/9 relationship between Sun & Saturn boosted public sector enterprises from 17th September onward.

3. Bottom of 2003 & Great March ahead to Bullish cycle

From March 2002 to 14th April 2003, we had Rahu Saturn conjunction in Taurus rising sign of India.....which was instrumental in silent revolution in Indian currency.....and only banks were marching ahead slowly & Gradually.....before Saturn moved to Gemini.....great damage was done to Infosys & few other IT stocks like Mastek in April 2003..... on 7th May 2003..... while Venus was behind Sun, Mercury entered between the 2 & made markets grow faster... top of this rally was done while Jupiter changed motion early January 2004. May 2004 breakdown was result of Hershel Jupiter opposition which came in control due to Saturn mars Yuti on 25th May 2004.....but Jupiter Rahu opposition was main blockage in turn around of market.....once Jupiter & Rahu crossed each other exact aspect early October 2004..... main buying was initiated in Indian market.....which lifted stocks from doom to boom.

4. Top of 2008 & Crash in 3rd Week of January.

There were 4 Major reasons for January crash in 2008.

1. Saturn opposing Hershel..... Leo/Aquarius
2. Mars & Saturn both Retrograde.
3. Mars moving from natal mars.
4. Jupiter Venus conjunction in Sagittarius in star of Ketu on 21st January 2008

Reason of another crash same year in october

1. Kaal sarpa dosha for 6 months starting early august.
2. Saturn opposing Hershel 2nd time in the year.
3. Mars going com-bust for 100 days on 4th October 2008.
4. Jupiter Rahu conjunction in Capricorn

Secret.....big jump from 2253 to 3149 was provided by same Mars passing from friendly Vishakha ruled by Jupiter.

Worst got over when Venus got Retrograde on 9th march 2009

Mercury left Dhanishtha on 10th march

Most Important.....Retrograde Venus & direct Mercury conjunct in pieces on 27th March & Market had no look back till 5th January 2010 when they met again.....Nifty risen from 2540 to 5350 in this period.

5. Bottom of 2011 & Higher Bottom of June 2012.....with top on 10th January 2013.

Saturn in Libra was bullish after 15th November but Mercury Paap Kartri from 28th October 2011 to 2nd Jan 2012 was stumbling block.....exact low was done on 20th Dec while sun passed from 60 Degree aspect of Saturn.....Nifty had run from 4531 to 5632 in 2 months.....
Testimony of exact Prediction 2 days ahead enclosed.

NIFTY INDEX IS PASSING THROUGH 2ND WAVE SINCE JAN'08 IN 3RD PRIMARY STARTED IN APRIL'03.SINCE THEN.THIS WAVE IS PASSING IT'S A-B-C CORRECTION IN 5-3-5 MODE.WE WITNESSED MORE THAN 61.8% PRICE CORRECTION IN WAVE A IN 61 WEEKS TILL MARCH'09 AND THEREAFTER GAVE A VERTICAL RISE TO NEAR ALL TIME HIGH AT 6340 IN NOV'10.AS CORRECTION IN WAVE A WAS IN ZIG-ZAG MODE,WAVE C IS GOING IN FLAT MODE IN A CHANNEL SINCE 5TH NOV'10.PRESENTLY WE HAVE COMPLETED 57 WEEKS AND NEXT 3 WEEKS SHOULD PROVIDE US WITH A TENTATIVE BOTTOM SOMEWHERE IN THE RANGE OF 4540/4700.AFTER 26TH JAN'11,THERE SHOULD COME A EXTREMELY POWERFUL RALLY.GOOD LUCK TO EVERYONE WHO READS THIS.

6. On 2nd June Retrograde Venus & direct mercury met again to provide another durable bottom.....they met after this only in January 2013 when nifty went up from 4770 to 6100+testimony attached.

Devendra Chaturvedi

2 June 2012

AS conjunction of Venus and mercury coincided with closing ceremony of us markets last night, the worst of sentiment should have been over but being humans and important point is money involved.....it will be wait and watch from all on Monday....otherwise also it is a full moon day on Monday and lunar eclipse will be there.....so keep track of high/low on that day.....my gut feeling says.....we will open and close very flat with a loss of 5/7 points.....i see complete turnaround on Tuesday. good luck to all.

7. Great Turn Around of August 2013 & its reasons.....

Explained in big details in prior chapters.....this turn around was due to Jupiter Neptune trine & negativity of Jupiter passing from ardra ruled by rahu got over on 2nd September 2013.....
Testimony attached.

Devendra Chaturvedi

28 August 2013

MAGIC number.....this is my research on RSI charts in last few years that last of sequential low during rally on RSI is tested once lower low on rsi but higher low on price is breached.....5215 is magic number on this chart whole 5547 of November 2012 was breakdown level.....you never know the style of behavior.....once magic number is testedmarket gets fresh lease of life.....SIMPLE REASON THAT MARKET WAS EXPECTED TO MAKE SMART COMEBACK THIS DAY.

8. Higher Low Made in February 2014 & Great Run thereafter.....

On 18th February 2014 when Sun was ahead & Venus was behind Mercury entered in middle of the 2.....very powerful bullish configuration made nifty rally from 6000 to 6870.

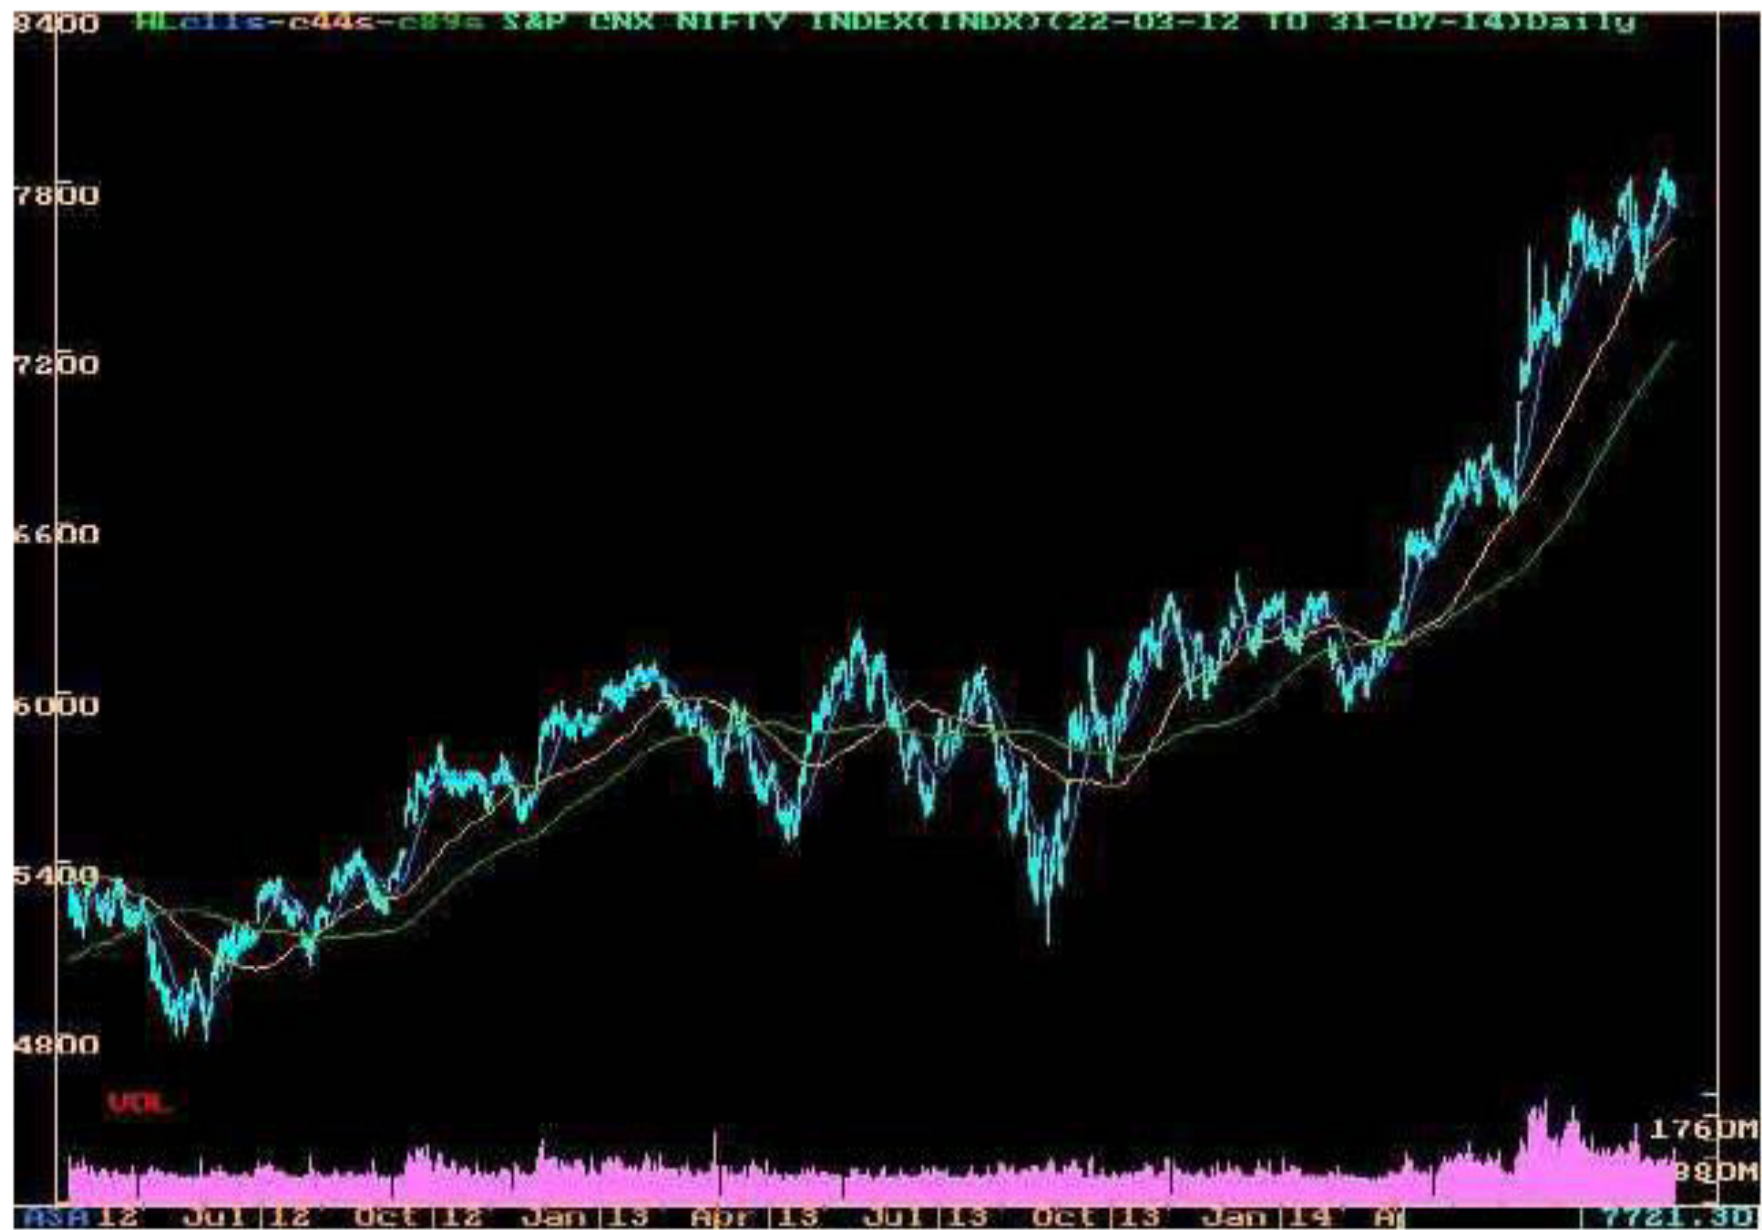

Another low was done in October 2014 when Retrograde Mercury met direct Venus.....highest Distance between 2 planets reached on 3rd march 2015 when high of 9119 was done.

Beauty was month of January 2015 when Venus Mercury in closed vicinity of 1 degree distance never met exactly & distance started rising from 14th January when first rate cut was announced.

Based on Astrology Basic Principle Of Astrology
"Before Applying Any Yoga, First Be Sure There is No Contra Yoga Operating"

Event No.1 While Jupiter changed to Gemini on 30.05.2013 it formed most powerful bullish trine with Neptune....still market was very bearish till 02.09.2013...why?

Reason : When Jupiter enter Gemini first Nakshatra is Ardra which is outright bearish....Further, Rahu was passing through pieces rules by Jupiter from 2nd July to 2nd September....both were very bearish..... biggest fall came in banks only as relation between Rahu & Jupiter is mostly Negative....on 2nd Sept Jupiter moved to Punarvasu & Rahu moved to Aquarius in d 9 chart..... Bank nifty gained 100% & nifty gained almost 60% in left out period of this trine.....(picture 1)

Event No. 2 while Mercury crossed sun on 15th Jan 2016 it reached Middle of Venus & SunVenus was ahead & Sun was behind.....this yoga has proved Multiple number of times delivering 15 to 20% Return in Nifty many times like march April 2014.....still this time it failed till 29.02.2016.....why?

Reason : On 30th January Rahu entered Sagittarius Navmansh & Jupiter was already sitting there.....this d 9 Conjunction was very bearish between these 2 planets resulting in fall to 6868 from 7565 in this period.... even after this till 29th Feb Mercury & Venus were together which was still bearish so nifty killed time & made another low at 6826.....once Venus mercury got separated on eve of 29th Feb.....Nifty recouped all losses in this period of yoga by 23rd March & high was done 7778 crossing Nifty of 15.01.2016. @ 176.....despite big rally of 2016.....another bountiful year on the cards.

RES 190+ Support near 150-155 prior to that 168.

VERY GOOD APPRECIATION SEEN BASED ON TECH N ASTRO BOTH

3. Vedanta

@ 243. same like Hindalco about to breakout from multi year downward slopping line. Res : 248/272/292 ----- Supports : 218/208

4. Dwarkesh

@ 397 we need to have daring to buy such costly stock but pattern is super n sugar has to go miles astrologically. Originally REC @ 37 just 2 years back.....huge breakout on way.....probably Bannari Amman of north India in making. Any commodity stock, we need to have protective stop loss of 15% minimum so can add at lows.
