## – BASIC WORDS –

Many people believe in astrology, and many other people do not believe in astrology and get very upset that anyone could be so stupid as to believe in such nonsense. I am the first one guy. I believe in astrology. Because I found many interesting facts and got ultimate result by using astrology.

My many readers ask me many times “What is astrology? and how this subject work?” One of the best definitions of astrology was written by **Priscilla Costello** author of ***The Weiser Concise Guide to practical Astrology***.

***Astrology is the calculation and meaningful interpretation of the positions and motions of the heavenly bodies and their correlation with human experience.***

And I am completely satisfied with her words. I am not an astrologer. I am a stock market trader. I worked in different countries and I show astrology is the only one subject which was common in that country or in my country.

From the past 9 years, I am doing my research on this subject. I read more than 2000 different books on this subject. I made more than 1000 astrology to consult about this subject. And continue doing trading work by using this subject. I found many interesting “astro combinations” in the past 9 years which may influence on our financial market.

This book will not teach you how to trade. Or to become a successful trader. To be a successful trader you require demanding work, hard training and talent. This book will give you an insight knowledge of financial astrology and their uses. This book will teach you how can you use this extracurricular subject in your personal trading specially in Nifty (Index) trading.

This is my personal experience that “*financial astrology can be the perfect extra tool in the trader’s toolbox.*” Even these are not my words but I feel same. All our combination is astrological. For this reason, we must procure astrological table that bring the various planetary position with the aid of which we shall try to pick out the astro combinations. A little basic knowledge of astrology and astronomy does not hurt us either for better understanding of the subject matter. So, I’ll give you a short knowledge of astrology and their knowledge and one hope “To be a successful Nifty trader”

Now I am ending my note with best wish.

Thanks & Regard  
**Krishna Attri**

*The difference between the two systems lies in the calculation of the longitude of the planets. The zodiac appears to move backwards by one degree in 72 years. The westerners consider "The Movable Zodiac" and the Indians consider 'The Fixed Zodiac'.*

*The difference between them is 23 degrees 20 minutes to-day in the longitudes of the planets. It is called "Precession". The calculation of the longitudes of the planets according to the Movable Zodiac is called "Sayana System" and the calculation of the longitudes of the planets according to the Fixed Zodiac is called "Nirayana System".*

*I believe in the Western i.e. Sayana System i.e. the longitudes of the planets given in "Raphael's Ephemeris of the year" because they have given me good satisfaction and very satisfactory results in predicting changes in prices. I must request you to adopt the Sayana System and respectfully reject the Narayana System. Throughout this book, the longitudes of the planets according to Sayana System, are taken.*

# I

## –Zodiac, Zodiacal Path & Zodiac Sign –

The zodiac is an area of the sky cantered upon the ecliptic, the apparent path of the Sun across the celestial sphere over the course of the year. In western astrology and (formerly) astronomy, the zodiac is divided into twelve signs, each sign occupying 30° of celestial longitude.

Zodiac, in astronomy and astrology, a belt around the heavens extending 9° on either side of the ecliptic, the plane of the earth's orbit and of the sun's apparent annual path. The orbits of the moon and of the principal planets also lie entirely within the zodiac.

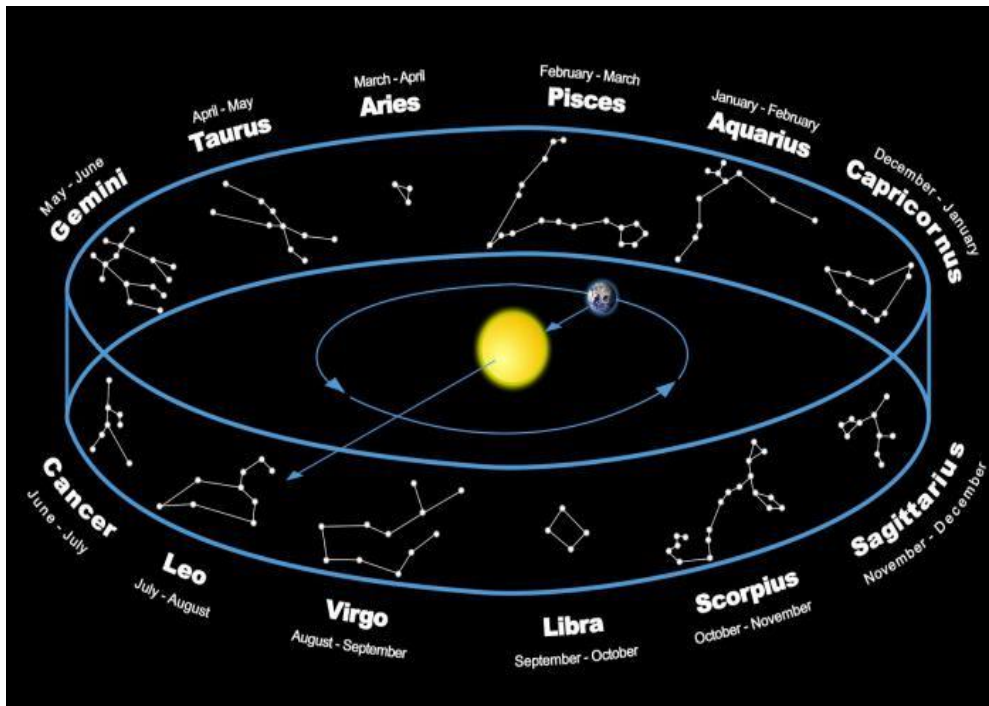

Image 001

In Astrology, there are 12 zodiac sign –

Where did the zodiac signs come from?

The classical map of the sky, with the 48 Greek constellations, was derived from at least two different pre-Greek traditions. One tradition comprised the 12 signs of the zodiac, with several associated animal constellations, all of which developed over 3,200-500 BC in Mesopotamia in a religious or ritual tradition.

## 1. Aries

This is the first zodiac sign in astrology. This sign covers 0° - 30° area of the zodiacal path. As the first sign in the zodiac, the presence of Aries always marks the beginning of something energetic and turbulent. They are continuously looking for dynamic, speed and competition, always being the first in everything from work to social gatherings.

This is Aries sign.

## 2. Taurus

This is the second zodiac sign in astrology. This sign covers 31° - 60° area of the zodiacal path. Taurus is the sign that harvests the fruits of labour. They feel the need to always be surrounded by love and beauty, turned to the material world, hedonism, and physical pleasures. People born with their Sun in Taurus are sensual and tactile, considering touch and taste the most important of all senses. Stable and conservative, this is one of the most reliable signs of the zodiac, ready to endure and stick to their choices until they reach the point of personal satisfaction.

This is a very important sign for Nifty, I got many biggest correction in Nifty when Sun transits through this sign.

### 001.Sun Transits Through Taurus Sign

Most of the biggest correction persist in Nifty when Sun transits through Taurus sign. Here I am presenting some example -

1. May 18, 2006: The Sensex registered a fall of 826 points (6.76 per cent) to close at 11,391, its biggest ever, following heavy selling by FIIs, retail investors and a weakness in global markets.

***On 18 May 2006 – Sun in Taurus Sign at 27°57”***

2. April 28, 1992: The Sensex registered a fall of 570 points (12.77 per cent) to close at 3,870, it's second-largest, following the coming to light of the Harshad Mehta securities scam.

***On 28 April 1992 – Sun in Taurus Sign at 08°38”***

3. May 17, 2004: Another Monday. Sensex dropped by 565 points, its third biggest fall ever, to close at 4,505. With the NDA out of power and the Left parties, part of the UPA coalition government, flexing their muscle, the Sensex witnessed its second-biggest intra-day fall of 842 points, twice attracting suspension of trading. At close, however, it regained some of its lost ground.

***On 17 May 2004 – Sun in Taurus Sign at 27°57”***

4. May 15, 2006: The market fell by 463 points to 11,822 points.

***On 15 May 2006 – Sun in Taurus Sign at 24°54”***

5. May 22, 2006: Sensex slumped by 457 points to 10,482.

***On 22 May 2006 – Sun in Gemini Sign at 01°61”***

6. May 19, 2006: Sensex slumped by 453 points to 10,939.

***On 19 May 2006 – Sun in Taurus Sign at 28°58”***

7. April 4, 2000: Sensex slumped by 361 points to 4,691.

***On 04 April 2000 – Sun in Aries Sign at 15°15”***

8. May 12, 1992: Indian stock markets plunged 334 points to fall to 3,086.

***On 12 May 1992 – Sun in Taurus Sign at 22°52”***

9. May 14, 2004: Sensex lost 330 points to fall to 5,070.

***On 14 May 2004 – Sun in Taurus Sign at 24°54”***

10. May 6, 1992: Losing 327 points, the Sensex fell to 3,561 points.

***On 06 May 1992 – Sun in Taurus Sign at 16°46”***

This is Taurus sign.

### 3. Gemini

This is the third zodiac sign in astrology. This sign covers 61° - 90° area of the zodiacal path. Gemini represents two different personalities in one and you will never be sure which one you will face. They are sociable, communicative and ready for fun, with a tendency to suddenly get serious, thoughtful and restless. They are fascinated with the world itself, extremely curious, with a constant feeling that there is not enough time to experience everything they want to see.

This is Gemini sign.

#### 4. Cancer

This is the fourth zodiac sign in astrology. This sign covers 91° - 120° area of the zodiacal path. Cancer can be one of the most challenging zodiac signs to get to know. They are very emotional and sensitive, and care deeply about matters of the family and their home. Cancer is sympathetic and attached to people they keep close. Those born with their Sun in Cancer are very loyal and able to empathize with other people's pain and suffering.

This is Cancer sign.

#### 5. Leo

This is the fifth zodiac sign in astrology. This sign covers 121° - 150° area of the zodiacal path. Leo are natural born leaders. They are dramatic, creative, self-confident, dominant and extremely difficult to resist, able to achieve anything they want to in any area of life they commit to. There is a specific strength to a Leo and their "king of the jungle" status. Leo often has many friends for they are generous and loyal. Self-confident and attractive, this is a Sun sign capable of uniting diverse groups of people and leading them as one towards a shared cause, and their healthy sense of humour makes collaboration with other people even easier.

This is Leo sign.

#### 6. Virgo

This is the sixth zodiac sign in astrology. This sign covers 151° - 180° area of the zodiacal path. Virgos are always paying attention to the smallest details and their deep sense of humanity makes them one of the most careful signs of the zodiac. Their methodical approach to life ensures that nothing is left to chance, and although they are often tender, their heart might be closed for the outer world. This is a sign often misunderstood, not because they lack the ability to express, but because they won't accept their feelings as valid, true, or even relevant when opposed to reason. The symbolism behind the name speaks well of their nature, born with a feeling they are experiencing everything for the first time.

This is Virgo sign.

## 7. Libra

This is the seventh zodiac sign in astrology. This sign covers 181° - 210° area of the zodiacal path. People born under the sign of Libra are peaceful and fair, and they hate being alone. Partnership is very important for Libra -born, and with their victorious mentality and cooperation, they cannot stand to be alone. The Libra is an Air sign, with expressed intellect and a keen mind. They can be inspired by good books, insurmountable discussions and interesting people.

This is Libra sign.

## 8. Scorpio

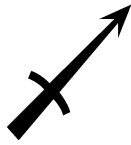

This is the eight-zodiac sign in astrology. This sign covers 211° - 240° area of the zodiacal path. Scorpio-born are passionate and assertive people. They are determined and decisive, and will research until they find out the truth. Scorpio is a great leader, always aware of the situation and features prominently in resourcefulness.

This is Scorpio sign.

## 9. Sagittarius

This is the ninth zodiac sign in astrology. This sign covers 241° - 270° area of the zodiacal path. Sagittarius is extrovert, optimistic and enthusiastic, and likes changes. Sagittarius-born can transform their thoughts into concrete actions and they will do anything to achieve their goals.

This is Sagittarius sign.

## 10. Capricorn

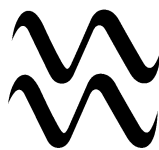

This is the tenth zodiac sign in astrology. This sign covers 271° - 300° area of the zodiacal path. Capricorn is a sign that represents time and responsibility, and its representatives are traditional and often very serious by nature. These individuals possess an inner state of independence that enables considerable progress both in their personal and professional lives. They are masters of self-control and could lead the way, make solid and realistic plans, and manage many people who work for them at any time. They will learn from their mistakes and get to the top based solely on their experience and expertise.

This is Capricorn sign.

## 11. Aquarius

This is the eleventh zodiac sign in astrology. This sign covers 301° - 330° area of the zodiacal path. Aquarius-born are shy and quiet, but on the other hand they can be eccentric and energetic. However, in both cases, they are deep thinkers and highly intellectual people who love helping others. They can see without prejudice, on both sides, which makes them people who can easily solve problems.

This is Aquarius sign.

## 12. Pisces

This is the twelfth zodiac sign in astrology. This sign covers 331° - 360° area of the zodiacal path. Pisces are very friendly, so they often find themselves in a company of very different people. Pisces are selfless, they are always willing to help others, without hoping to get anything back.

This is Pisces sign.

The northern zodiac constellations – Pisces, Aries, Taurus, Gemini, Cancer and Leo – are in the eastern celestial hemisphere, while the southern – Virgo, Libra, Scorpius, Sagittarius, Capricornus and Aquarius – are found in the west.

**Zodiacal path** ( $0^{\circ}$  -  $360^{\circ}$ ) is circular path or an imaginary belt where all planet transits through one zodiac sign to another zodiac sign. According to the astrology myth all planets revolve around earth not sun. Where they revolve, their one belt present and this belt divided into 12 equal part, these 12 equal parts are zodiac area and this belt is a zodiacal path. Even this theory is not true scientifically. But here we do not learn science. So, we believe on this path. This is a **Geocentric method**.

Here I want to tell you one another method is also available - **Heliocentric**.

In this method, Sun is the centre of the solar system and one imaginary belt present where all planet transits through one zodiac sign to another zodiac sign.

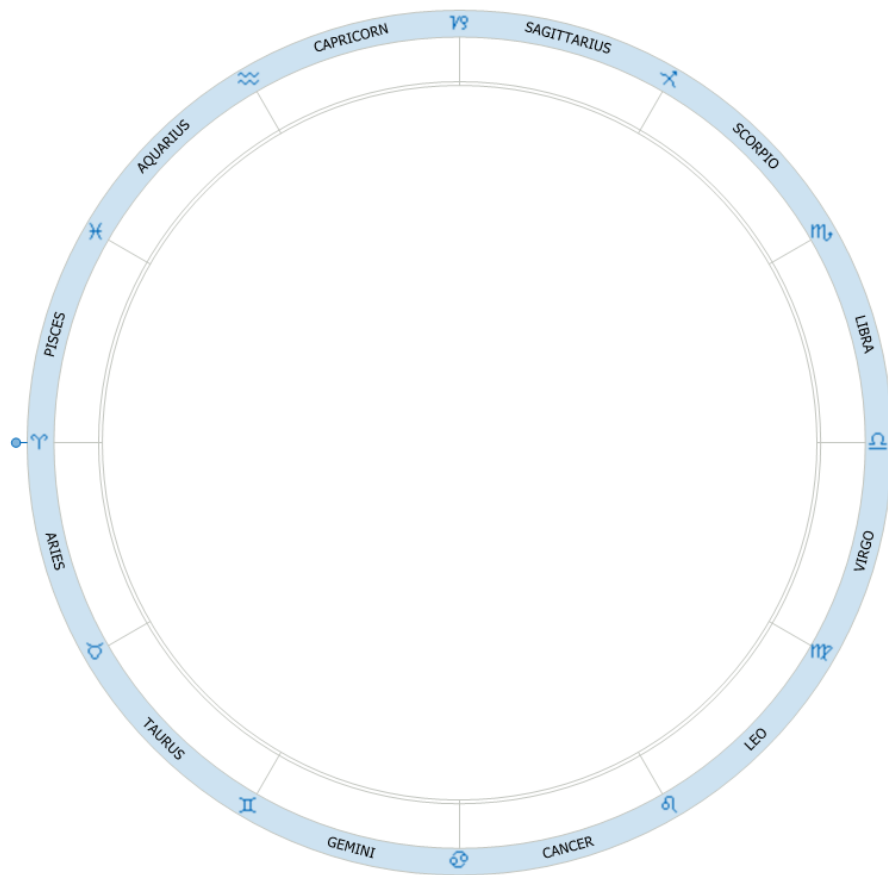

Image 002

This is Zodiacal path

# II-a

## – Planets –

The seven classical planets are those easily seen with the naked eye, and were thus known to ancient astrologers. They are the Sun, Moon, Mercury, Venus, Mars, Jupiter and Saturn. The outer modern planets Uranus, Neptune and Pluto are often called the collective or transcendental planets.

But in **Uranian** system of astrology have many other planets.

The Uranian system of astrology is rally our most advanced and evolved system of astrology to date. It was developed in the early 20th century by a group of astrologers and led by Alfred Witte who was instrumental in cleaning up astrology and shifting it into this new paradigm that is the Uranian system.

In Uranian astrology we have many new Transneptunian planets. There are eight Transneptunian planets in all, the first two (Cupido and Hades) being discovered by Alfred Witte and the remaining six (Zeus, Kronos, Apollon, Admetos, Vulcanus and Poseidon), discovered by his students as they carried on Witte's work with the dial. The Transneptunian planets add a tremendous amount of clarity and depth to a chart.

In financial astrology, I got many innovative ideas and combinations from this new branch of astrology.

I do not have too much “knowledge” about this new branch of astrology, but I am doing my research on this.

As I already said I found many new combination from this new branch of astrology and I'll explain most of the combination too.

In this chapter, I'll explain planetary themes in astrology and in financial astrology. These planets divided into two separate groups 1) Inner Planets 2) Outer Planets.

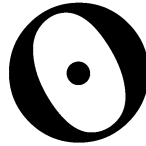

**Inner Planets** - Sun, Moon, Mercury, Venus & Mars

**Outer Planets** – Jupiter, Saturn, Nodes of the Moon, Uranus, Neptune & Pluto

I do not put these Transneptunian planets in this list. If you want to make a new classification for these planets then you can be called Exterior Planets.

To find coming possibility & probability for Stock & Commodity market, most of the time we use Inner planets. We find combination between these planets to make any Investment decision.

## **SUN –**

Sun is the most important planet in our astrological science. In astrological science, we treat Sun as a planet. Even you know or everyone know that Sun is not a planet. But remember when we show Sun from the earth we feel Sun revolved around the earth. Therefor we identified Sun as a “Identical Planet”

The Sun is very important planet in financial astrology too, because Sun represents the events in the world. Its motion is always direct relative to the earth. Sun complete its one rotation in 1 year on zodiacal path. Sun stay in a zodiac sign for one month.

We know that, the year begins on 1<sup>st</sup> January in west. In India, we celebrate our new year in many times, Oriya Year is different from Bengali Year same as Tamil year is very different from ours Himachali year. Jewish new year is celebrated much later in the year at the first the new moon after the September Equinox. The astrological new year is marked by the March Equinox exactly that point where the Sun's path crosses the equator and marks the first day of spring. It is the first day of the sign Aries. You can say like that when Sun enter in Aries zodiac sign astrological new year start.

Sun have a very different approach in financial astrology. We may found more than 1000 traders nearby who use Sun spot cycle in their trading. Seasonality trader also follow the Sun cycle. That is very surprisely matter to us S&P 500 Index losses their strength when Sun transits through Virgo or Cancer zodiac sign. In the same way, I got some top corrections persist in Nifty when Sun transits through Taurus. The Sun is related to the sign of Leo. The Leo & Sun rules the fifth house of creativity, speculation and children in astrology.

## **MOON –**

Moon is the 1<sup>st</sup> most important planet for Intraday trader. All intraday trading activity complied or operate by Moon. Its motion is always direct relative to the earth. Moon is the natural satellite. This is not a planet, but in astrology we treat like as a planet.

Moon complete its one cycle on zodiacal path only in 28 days. It stays in a zodiac sign for 2.5 days. Some financial astrologer think “Moon is a bearish planet” but I am not agreed with this statement. In my thinking “Moon provide many type of reaction in financial astrology” Many time Moon provide bullish sentiment when Moon makes positive aspects with Sun or by other planets and many time negative. That is depend on the several aspects.

Moon complete 12 cycles on its zodiacal path in one year. Moon made 12 conjunction aspect and 12 opposition with every planet in a year. The Moon’s most reliable aspect is Sun – Moon conjunction. I got many turns event in the past when Moon made a conjunction with Sun in Nifty’s trading. Or also in Crude Oil trading.

Moon is related to the sign of Cancer. The Moon & Cancer rules the forth house of family and the mother.

#### **MERCURY –**

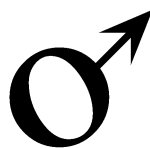

Mercury is 2<sup>nd</sup> most important planet in financial astrology. Even some financial astrologer think “This is the most important planet” for financial astrology. Mercury is the nearest planet to the Sun. At no time, it is more than 26° away from the Sun. According some thinkers When it is combust, it is malefic in nature and when it is not combust, it is benefice nature. Its average its motion is about 1 ¼ degree a day.

Mercury’s motion can be direct or retrograde relative to the earth. Mercury retrogrades three times a year. Mercury is related to the signs of Gemini and Virgo. Mercury & Gemini rules the sixth house of health, service and workplace. Mercury also involved with movement and motion, therefore this planet have a strong influence on financial markets.

Mercury complete 1 cycle once a year on its zodiacal path. When its motion is slow, its effect on changes in prices is great.

#### **MARS –**

Mars is the god of war and strife. According to some thinkers this planet is malefic in nature. Mars related to sign of Aries and Scorpio, Mars & Aries rules the first house of the self and Mars & Scorpio rules eighth house shared power, death, mystery and occult science.

Its average motion is 40 minutes a day. It lives in each sign for a month and a half. Mars complete 1 cycle in 2 year on its zodiacal path. Its motion can be direct or retrograde relative to the earth. When it retrogrades, it lives 220 days in that zodiacal sign or in a definitive zodiacal path.

#### **JUPITER –**

Jupiter is the planet of plenty, expansion and general prosperity. It is benefice in nature. According to many thinkers this is a bullish planet but many thinkers not agree with this statement and they think Jupiter is a bearish planet. They have their own theory and they are right on their point. When we think about Jupiter by the astronomers Jupiter react like as bearish planet too. And when we see according to astrology this planet like as bullish planet.

Jupiter related Sagittarius zodiac sign. Jupiter & Sagittarius rules the ninth house of the truth, higher education and beliefs. Jupiter also rules expansion and luck. Jupiter's motion can be direct or retrograde relative to earth. Jupiter complete its 1 cycle around the zodiacal path in 12 Years and Jupiter stays in a sign for 1 year.

#### **VENUS –**

Venus is the goddess of love and beauty, it is a benefice in nature. At no time is Venus away from the Sun for more than 48°. Its average motion is 1 degree 5 minutes in a day. This planet is related to the Taurus and Libra. Venus & Taurus rules the second house of possessions and earned income. Venus & Libra rules the seventh house partnership in astrology. In financial astrology Venus is strongly associated with money and earning. Venus correlates strongly with stock market. In Nifty's trading, I got many positive & negative influence which is generated by Venus. Venus is another important planet for stock market.

Its motion can be direct and retrograde. Venus complete its 1 cycle on the zodiacal path in 1 year. This planet stays in a sign for 24 to 100 days.

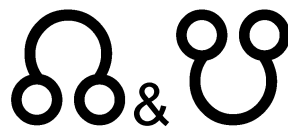

#### **SATURN –**

Saturn reigns over poverty, misfortunes and death. In financial, many thinkers Saturn is a bearish planet, but many astronomers think this is a bullish. Both are right in their views. I got many examples in the past where Saturn act like as a bullish and many time bearish.

Saturn is related to the sign of Capricorn. Saturn & Capricorn rules the tenth house of career or one's status around the globe. Its motion can be direct or retrograde relative to the earth. Saturn complete its 1 cycle on its zodiacal path in 30 years. It stays in a sign approximate 2.5 years.

#### **RAHU & KETU (Moon's North Node & Moon's South Node) –**

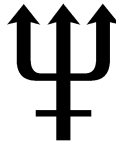

Astronomically, Rahu and Ketu denote the points of intersection of the paths of the Sun and the Moon as they move on the celestial sphere. Therefore, Rahu and Ketu are respectively called the north and the south lunar nodes. In Western Astrology, Rahu refer as "North Node" or "True Node" but there is no "South Node". In astrology, these are very powerful planets. And they are producing changes in price of the stocks and commodities. These planets live for 18 months in a zodiac sign. These planets always stay away 180° from each other. These planets run on zodiacal path only in retrograde form. They never go to the direct form.

#### **URANUS –**

Uranus is related to the sign of Aquarius. Uranus & Aquarius rules the eleventh house of groups and friends. This planet rules things that are unusual. Its motion can be direct or retrograde relative to the earth. This planet completes its 1 cycle in 84 years on its zodiacal path. This planet stay in one sign around 7 years.

#### **NEPTUNE –**

This planet is related to the sign of Pisces. Neptune & Pisces rules the twelfth house of spirituality, hidden enemies, and the unconscious. Its motion can be direct or retrograde relative to the earth. Neptune complete its 1 cycle on its zodiacal path in 165 years. This planet stay in a sign around 14 year.

#### **PLUTO –**

Pluto is related to the sign of Scorpio. This planet rules the eighth house of shared resources, power, mystery and the occult science. This planet's motion can be direct or retrograde relative to the earth. This planet completes its 1 rotation on its zodiacal path in 250 years and this planet stay in around 20 years.

## II-b

Since each astrological sign has characteristics which are like those of a planet, it is said to be in analogy with the planet involved. All signs are ruled by, or under the ruler ship of a planet. Besides, a sign may be compatible with another planet even if the planet is not its ruler, and conversely, a planet may symbolise values unconnected to those of the sign it tenants, and in such cases, the planet's expression becomes rather negative or less significant.

Depending on its state, a planet is referred to as dignified or debilitated. Five states are possible: ruler ship, when the planet is in the sign(s) it rules, detriment, exaltation and fall. The fifth state is referred to as peregrine: a planet is peregrine when it is in none of the four states enumerated above. Lastly, it is important to mention that modern astrologers do not agree on the importance of planetary dignities and debilities. Therefore, caution is to be exercised. On Astrofile, we take them into account, but with moderation, in our astrological reports and our on-line applications.

**Ruler** - A planet posited in the sign it rules is said to be in its ruler ship, domicile, or home. Thus, it can totally fulfil its role, and it is most likely that its action plays out very positively.

**Detriment** - On the contrary, when a planet is in the sign opposite the sign it rules, it is said to be in detriment. Thus, its action is negative, misused, or non-existent or weakened.

**Exaltation** - A planet in a sign of a similar nature, but which it does not rule, is said to be in exaltation. The planet gets strength and energy from its exaltation, and thus, its influence is positive.

**Fall** - A planet in the sign opposite the sign of its exaltation is said to be in fall. Therefore, contrarily to the exaltation, the planet loses its strength and influence.

When a planet is in none of the enumerated four states, it is in a peregrine state, or it is a peregrine planet.

In two cases out of three, planets are peregrine, and the aspects they form with other planets or angles are even more determining.

This is an important remark that is worth underlining. More and more often, modern astrology decreases the influence of ruler ships and pays more attention to aspects.

Statistical observations and practical experiences show that even when a planet is in detriment or in fall, most often, it can play out positively, provided it is well-accepted.

Therefore, caution is to be exercised as you learn those ruler ship and debility rules that remain nonetheless important.

Here is the ruler ship list:

**Sun** - Ruler ship in Leo, exaltation in Aries, detriment in Aquarius, fall in Libra.

**Moon** - Ruler ship in Cancer, exaltation in Taurus, detriment in Capricorn, fall in Scorpio.

**Mercury** - Ruler ship in Gemini and Virgo, exaltation in Virgo too, detriment in Sagittarius and Pisces, fall in Pisces too.

**Venus** - Ruler ship in Taurus and Libra, exaltation in Pisces, detriment in Scorpio and Aries, fall in Virgo.

**Mars** - Ruler ship in Aries and Scorpio, exaltation in Capricorn, detriment in Libra and Taurus, fall in Cancer.

**Jupiter** - Ruler ship in Sagittarius and Pisces, exaltation in Cancer, detriment in Gemini and Virgo, fall in Capricorn.

**Saturn** - Ruler ship in Capricorn and Aquarius, exaltation in Libra, detriment in Cancer and Leo, fall in Aries.

**Uranus** - Ruler ship in Aquarius, exaltation in Scorpio, detriment in Leo, fall in Taurus.

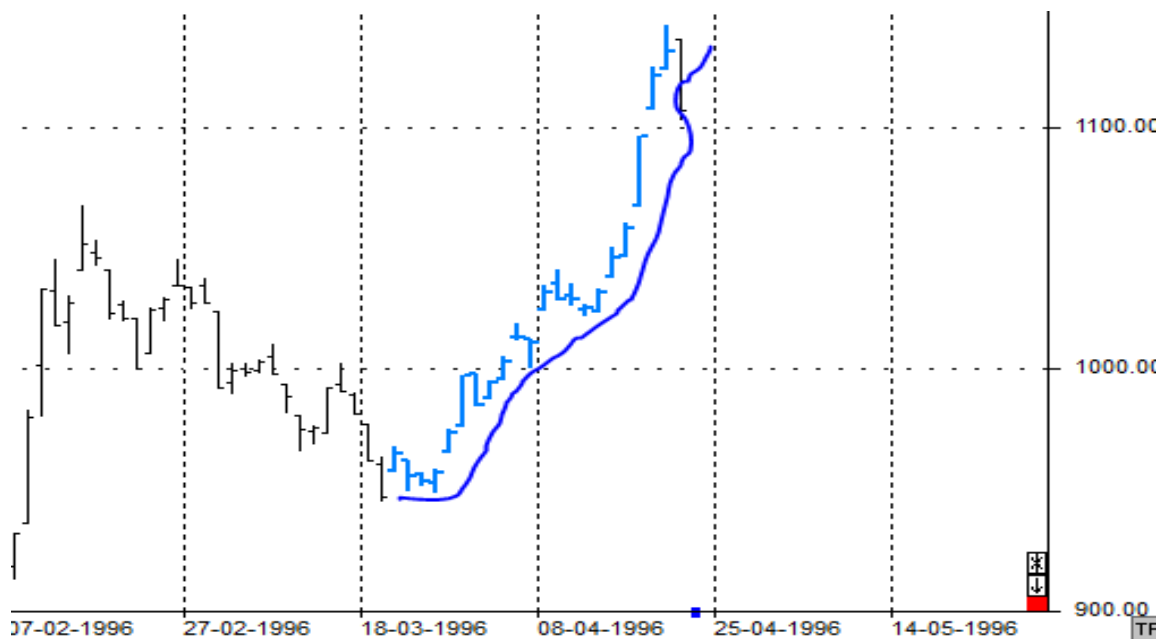

**Neptune** - Ruler ship in Pisces, exaltation in Leo, detriment in Virgo, fall in Aquarius.

**Pluto** - Ruler ship in Scorpio, exaltation in Aries, detriment in Taurus, fall in Libra.

As we know, Sun, Moon, Mercury, Venus & Mars is the inner planets. And these planets are speedster.

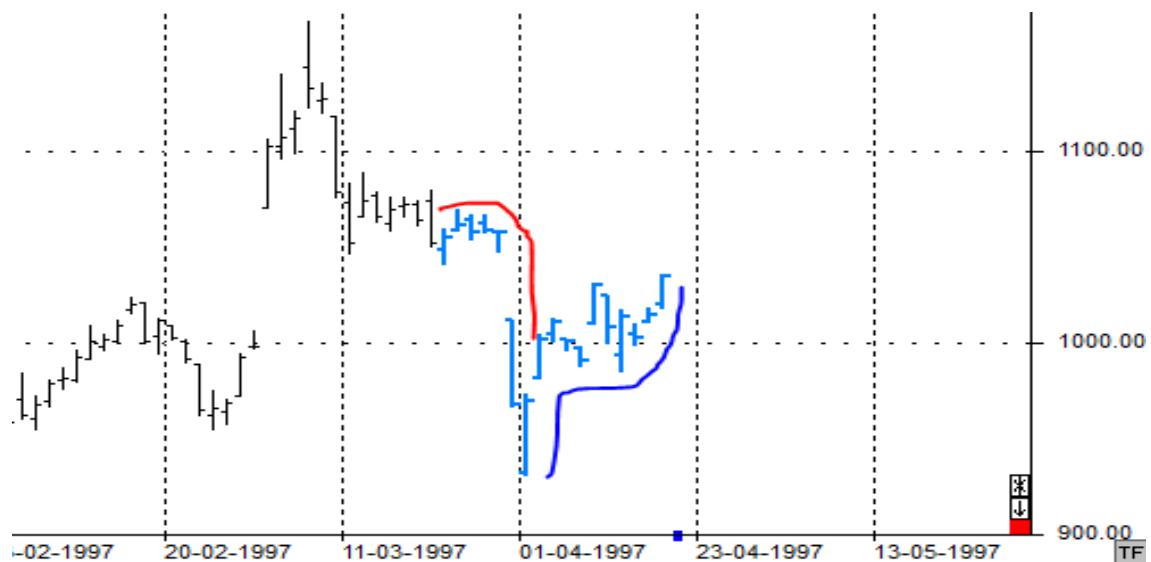

Sun, Mercury & Venus very speedster compare then Mars. Trader's need to know what happen when these super speedster planet transits through different sign.

I place some charts for you to understand the whole producer "How can you read the events and how can you note things.

1996 Nifty's daily chart.

In 1996, when Sun transits through Aries sign we show a huge up move in Nifty. Most of the time between this period Sun, Mercury & Venus transits through this sign.

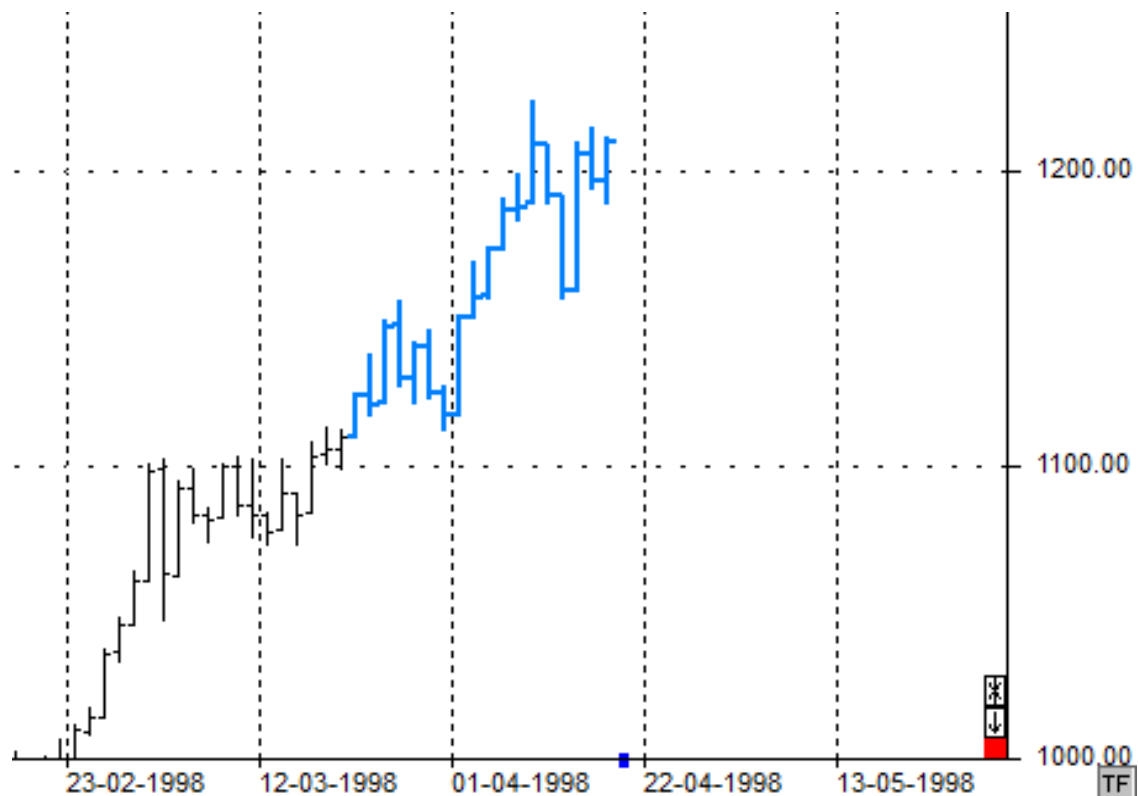

1997 Nifty's daily chart.

In 1997, when Sun transits through Aries sign we show a sharp correction from 31 March 1997 and after that an unexpected recovery.

Do you know why this correction lay here? Most of the time between this period Venus, Mercury & Saturn transits through this sign. On 28 March 1997 Sun made

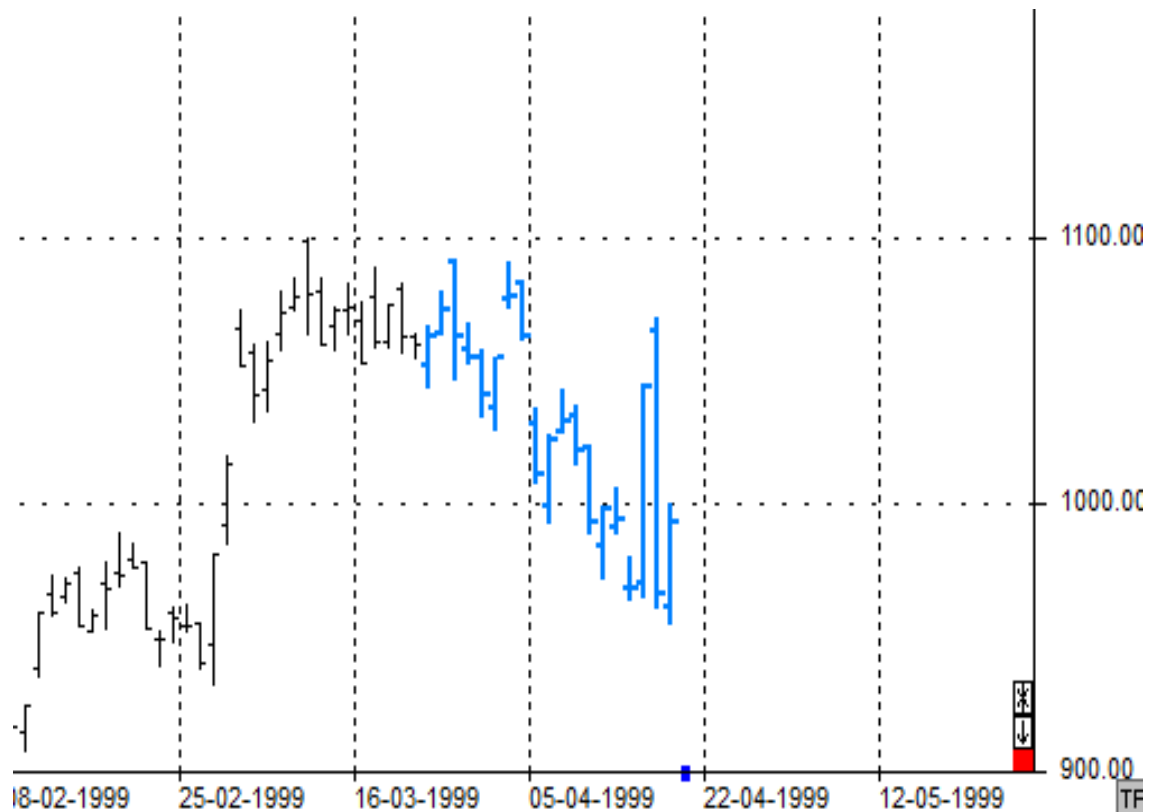

a conjunction aspect and this aspect and this aspect complete itself on 31 March 1997. Please note that – On 31 March 1997 (09:55 AM) Sun at 10° & Saturn at 10° on zodiacal path. And Nifty open with a negative gap and fall very badly. On 01 April 1997, Sun pass this degree and Sun at 11° & Saturn at 10°. On that day Nifty, again open in negative mode and recover from the lower levels. Do you know what happen here in the sky?

On 01 April 1997, Sun at 11° & Venus at 11° on the zodiacal path. And after that Nifty continue recover from the lower levels.

1998 Nifty's daily chart.

In 1998, when Sun transits through Aries sign we show a up move in Nifty, but keep your warm eye here. When Sun made a conjunction with Saturn (13 April 1998) Nifty sharply fall.

1999 Nifty's daily chart.

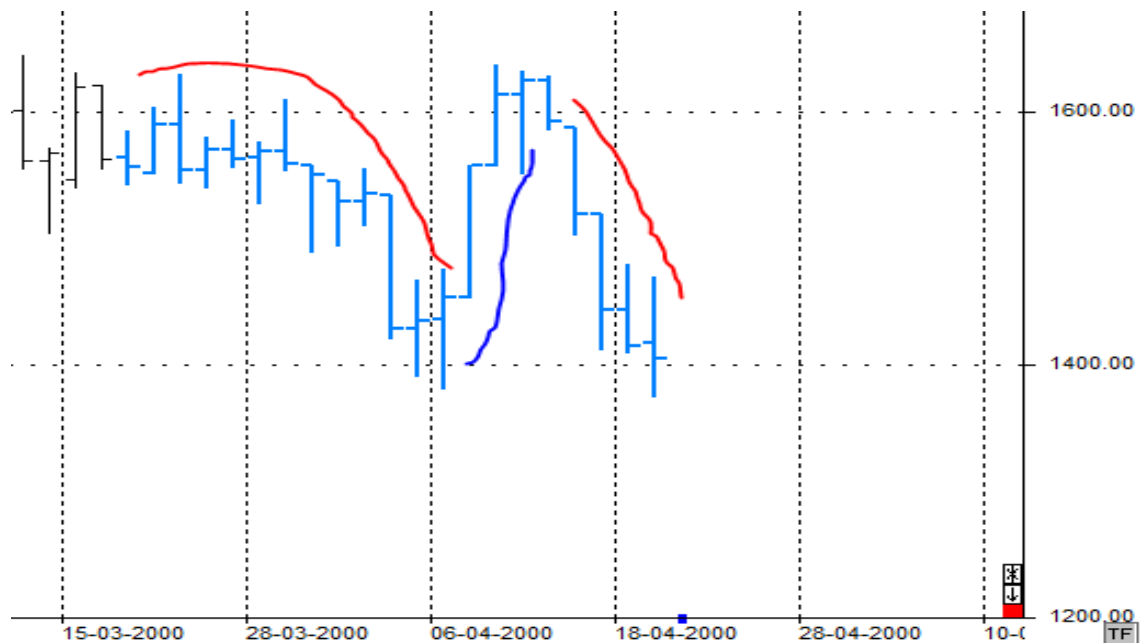

In 1999, when Sun transits through Aries sign we show a up move in Nifty in the starting but in the middle of the month Nifty sharply fall, when Sun went ahead from Jupiter.

I read a rule (Astro Combination) in T.G. Butaney's book **002. "When a fast planet cross a slow planet on zodiacal path we may see a deep correction."** I know here Sun is a fast planet and Jupiter is Slow planet.

**003. "When Sun transits through all alone from Aries sign, we show a corrective wave in the leading companies."**

**004. "When Sun transits with Venus through Aries sign, we show a recovery wave, if the corrective already persist there."**

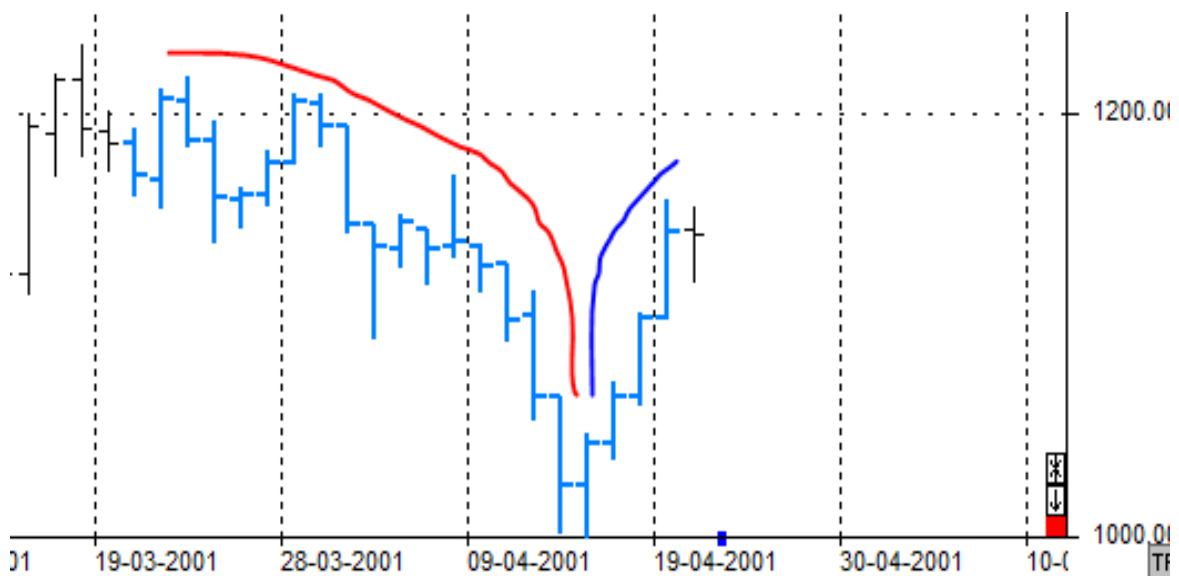

**005. "When Sun transits with Venus (retrograde) through Aries sign, we show a weaken wave."**

2000 Nifty's daily chart.

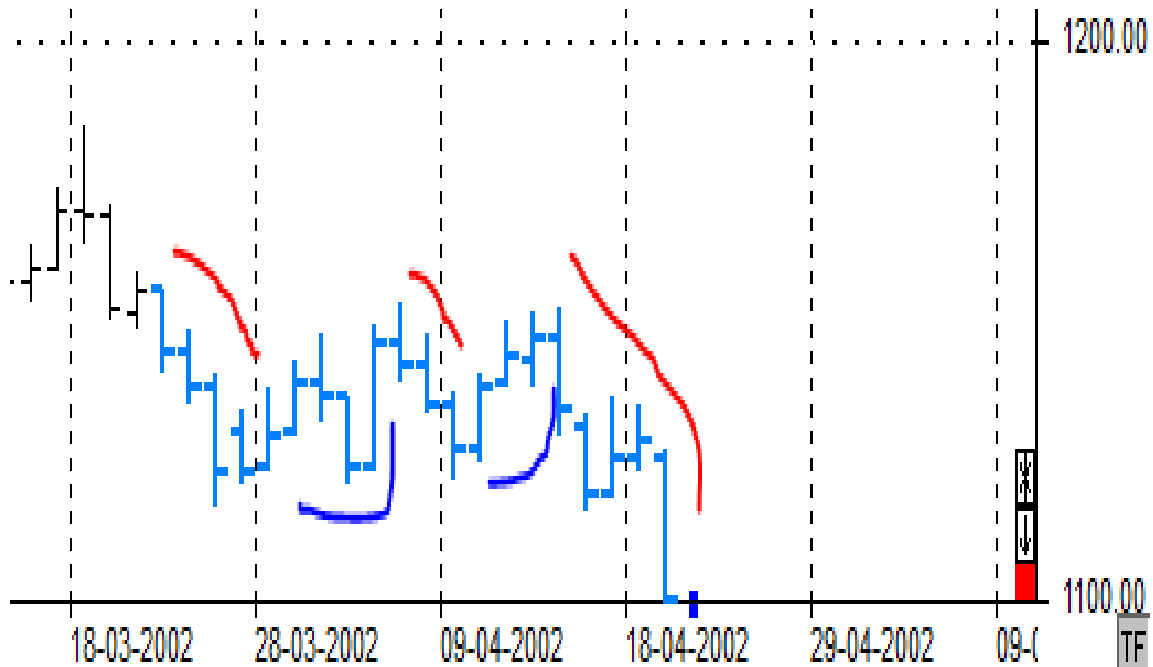

This is Nifty's 2000 chart. Here you can see one bearish phase, then a sharp recover and after that again one sharp fall. Now explore all three phase here.

In the beginning, when Sun enter Aries sign. Sun is the all alone planet in Aries that time and we got a bearish phase. On 07 April 2000 Venus enter in Aries sign and we show a sharp recover from the same date. On 14 April 2000 Mercury enter in Aries sign and we show a correction again from that day.

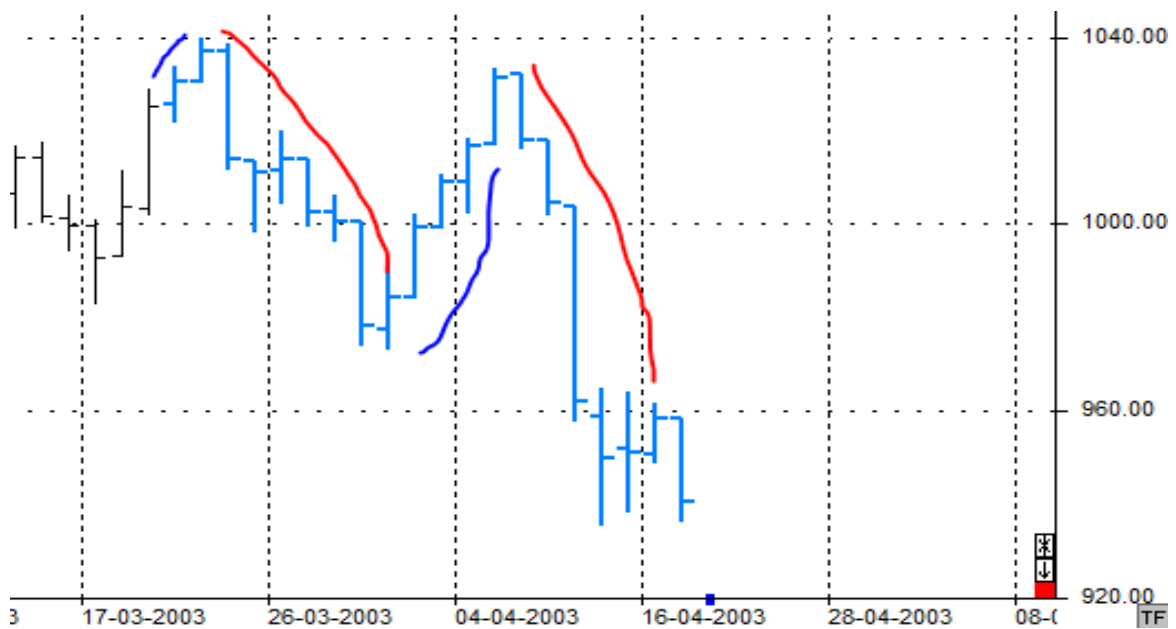

2001 Nifty's daily chart.

In 2001, when Sun transits through Aries sign with Venus (Retrograde) we show a sharp correction and after that an unexpected recovery.

2002 Nifty's daily chart.

In 2002, We do not get any notable movement in Nifty.

2003 Nifty's daily chart.

From the beginning in 2003, we show a 2-day rally and after that a deep correction. In the starting Sun enter with Mercury (In conjunction mode) and after that Mercury separately forward from Sun.

Please remember the combination which is already I told you earlier - **“When a fast planet cross a slow planet on zodiacal path we may see a deep correction.”**

Like that you can try to learn What happen when any planet transits through any sign. Red bold remarkable lines are the astro combinations. By this way, you can find more combinations which is not available in this book. I mention only 101 astro combinations in this book. But every year many combination generate. So please do yourself and try to make or find these combinations.

# III

## – Cardinal Points& Big Picture –

### **Cardinal Points -**

There are four major points in the solar cycle. These occur when the Sun moves Aries, Cancer, Libra and or Capricorn. These points are very important points in the financial astrology. We'll talk about this topic later.

### **Big Picture –**

In a small picture, we know that in our solar system's every planet revolve around the Sun and transits through one zodiac sign to another sign (in Heliocentric Modal). But in the big picture our entire solar system also revolve on one another zodiac path.

# IV

## – Declination –

*In astronomy, declination is one of the two angles that locate a point on the celestial sphere in the equatorial coordinate system, the other being hour angle. Declination's angle is measured north or south of the celestial equator, along the hour circle passing through the point in question.* In the easy words “**Declination**” describes the angles between the celestial equator and the Planet. It can be compared with latitude on Earth.

It is the missing half that completes our study of astrology and explains many of the rules we use. In a nutshell, declination is a form of latitude rather than longitude. It is the measurement of planets north or south of the celestial equator, which is the Earth's equator extended into space.

This is another factor, which produce strong effect on changing in price of stocks and commodities and on Indexes.

Many time in the past Nifty effected by Sun Declination.

**Sun Declination** - The earth's equator is tilted 23.45 degrees with respect to the plane of the earth's orbit around the sun, so at various times during the year, as the earth orbits the sun, declination varies from 23.45 degrees north to 23.45 degrees south.

In the past I noted many turned movement when Sun reach and exit from 23.45° from north and many time reach and exit from 23.45 degrees south.

You can see an example picture on the next page.

2014 - 2015 Nifty's daily chart.

Nifty's on Declination

006. Every time when Sun enter in extreme declination or exit from extreme declination we got precious Key points. In the past, I got many precious key dates by this astro combination.

# V

## – Lunar Declination –

During each month, the Moon moves from maximum to minimum declination and back again—a cycle that does not necessarily coincide with New and Full Moon phases.

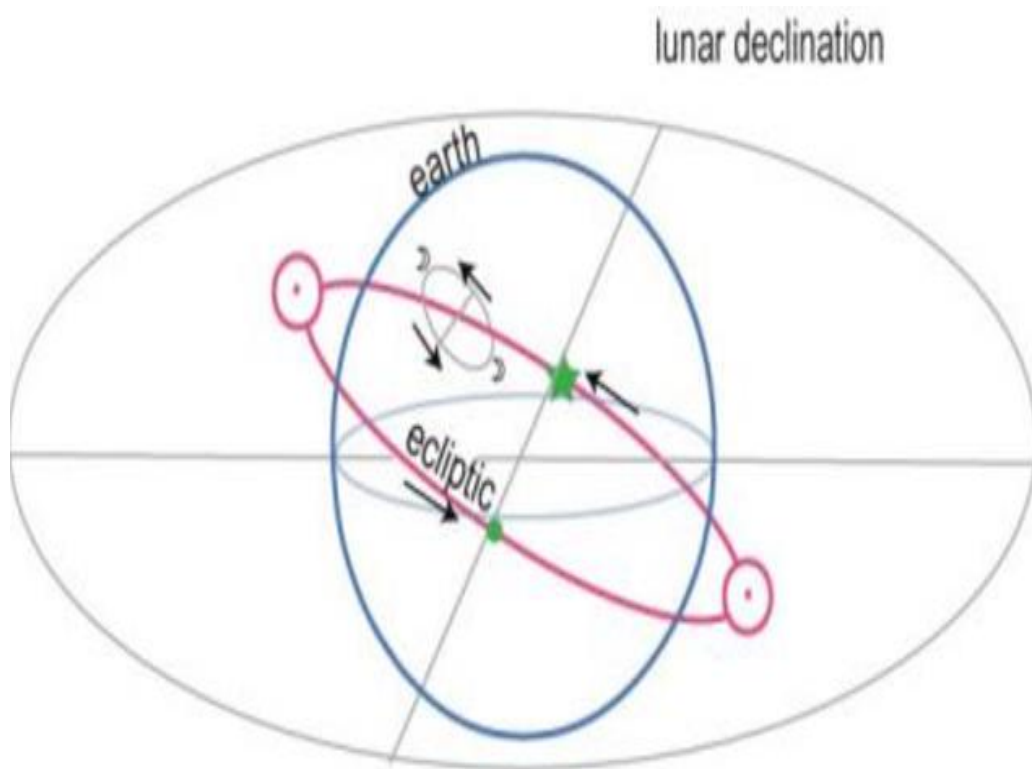

Image 004

In the above image, we can see the solar path with the lunar path included. It takes one year for the sun to go through its apparent path of  $360^\circ$  through the heavens. This path in the ancient world got its name from the constellations of all the star groups that the sun encounters in a year. The star groups were known collectively as the animal wheel or zodiac. The constellations that the sun passes through in a year are covered in one month by the passage of the moon. Also, the  $23^\circ$  of solar declination at maximum southern and northern declination can be exceeded by the moon by  $5^\circ$ . This means that the moon at maximum northern declination can be located at  $28^\circ$ N celestial latitude and likewise for the south.

The lunar orbit is the most erratic and variable of all the planets. Not only can the moon exceed the solar maximum declination but it can also reach its maximum declination 5° below the solar maximum. That means that in some years the moon only reaches its maximum southern and northern declination at 18° of celestial latitude. Finally, it also can reach its maximum and minimum declination in synch with the sun.

As we already know Sun only reaches a maximum of 23.5 degrees' declination, the Moon, in some years, can reach beyond this to 28.5 degrees. There is a special name given to the area of declination that is beyond the Sun's reach; it is known as "*out of bounds*." The Moon does not achieve out of bound status every year but when it does, increased activity in the market place has been noted via increased volume of trade.

According to the Google we have one another (type) definition, which is rally match with this statement "At a major lunar standstill, which takes place every 18.6 years, the range of the declination of the Moon reaches a maximum. As a result, at high latitudes, the Moon's greatest altitude (at culmination, when it crosses the meridian) changes in just two weeks from high in the sky to low over the horizon."

In the all dilation, there is a natural rhythm to lunar declination. Years in which the Moon reaches out of bounds status are separated by 18-year intervals.

In this reference, you can find the Moon's daily, weekly, monthly & yearly activity here is a link I recommend you explore everything:

<http://bonniehill.net/pages.aux/lunar/lunar.decl.1900.html>

**007. Every time when Moon enter in extreme declination or exit from extreme declination we got precious Key points. Off course, these key dates generate small impact on Nifty but they generate.**

Even we can get some minor reference work on monthly cycle too. Please see the image available on the next page.

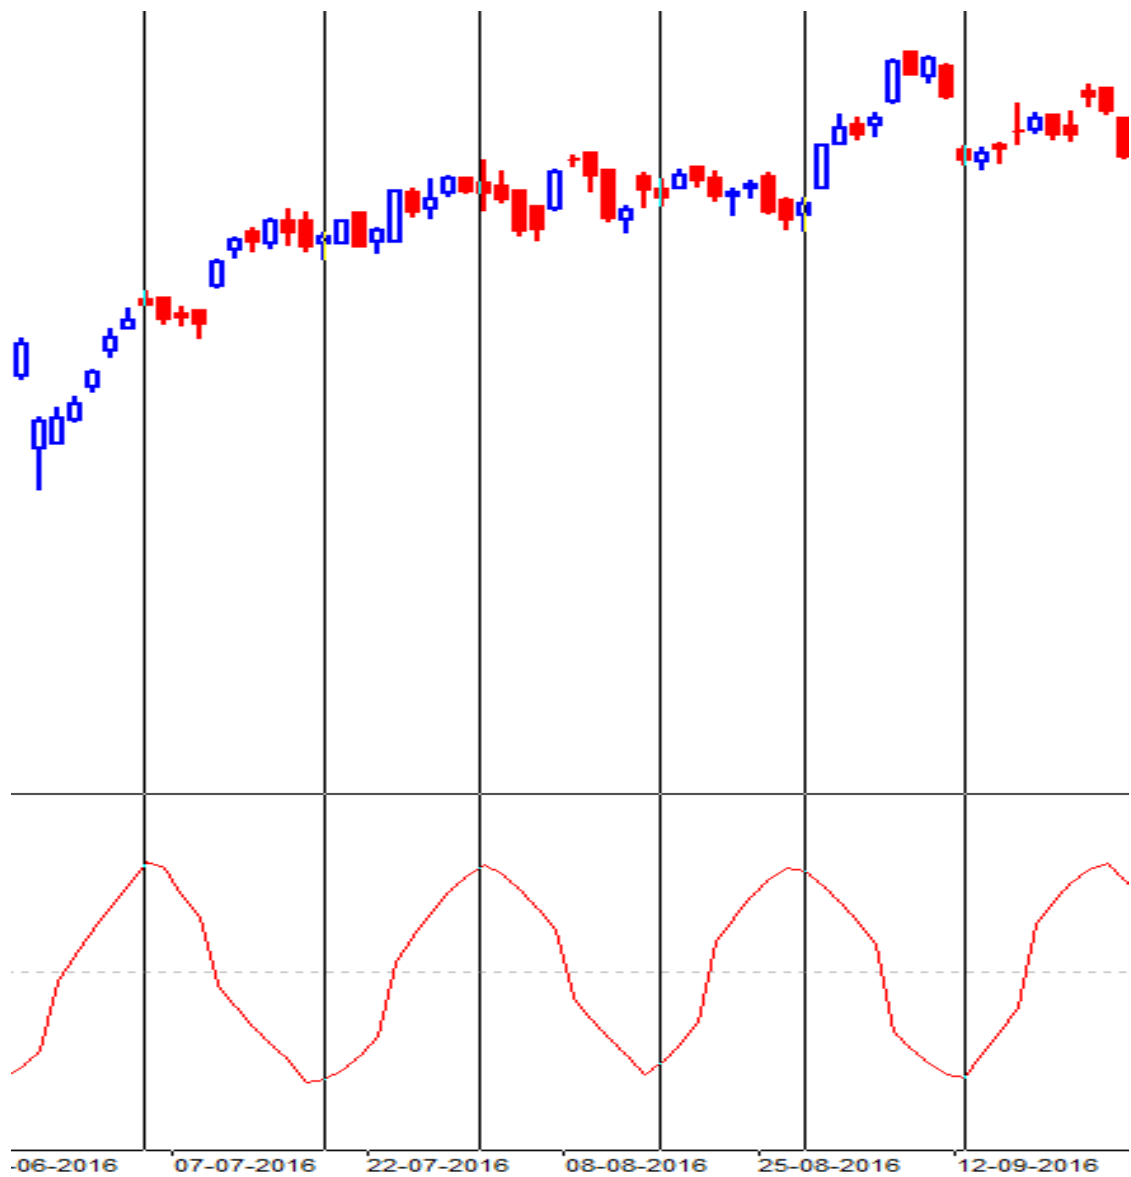

Image 005  
Monthly Moon's Declination Chart on Nifty

# VI

## – Lunar Distance: Apogee & Perigee –

The Moon does not maintain a constant distance from Earth. Its closest position is described as Perigee. Roughly two weeks later the Moon will have travelled its greatest distance from Earth: Apogee. And the second term is: Perigee

Apogee and perigee refer to the distance from the Earth to the moon. Apogee is the farthest point from the earth. Perigee is the closest point to the earth and it is in this stage that the moon appears larger. Looking at the moon in the sky without anything to compare it to, you wouldn't notice any size difference. But the difference in size can in fact be quite significant.

Image 006

If you were to image 006 a full moon at apogee and perigee (using the same lens), here's how the two sizes would compare:

Astronomers have formulas for computing the exact distance at any point in time, but the average distance from Earth is 237,700 miles (382,500 km). The apogee and perigee of the moon influence the tides here on Earth. When the moon is at apogee, the furthest distance from the Earth, it has less gravitational pull which, along with other factors that influence the tides, can contribute to lower tides or lower variation in the high/low tide level. When the moon is at perigee, closer to the Earth, there is much more gravitational pull which contributes to the opposite effect: higher tides or greater variation in the high and low tide.

Here I want to tell you, *we use Apogee in our trading work* and we neglect Perigee. The Moon moves relatively quickly. Day traders are interested in the exact time of apogee. Where this occurs within the trading day, markets might be expected to turn after that exact hour. Lunar apogee then is of interest to day traders and should not be ignored.

Please note **008**. “**When Full Moon and Apogee date are the same we can see a significant impact**” on Nifty’ In the past I find many dates like that and I got many precious key turns from this combination.

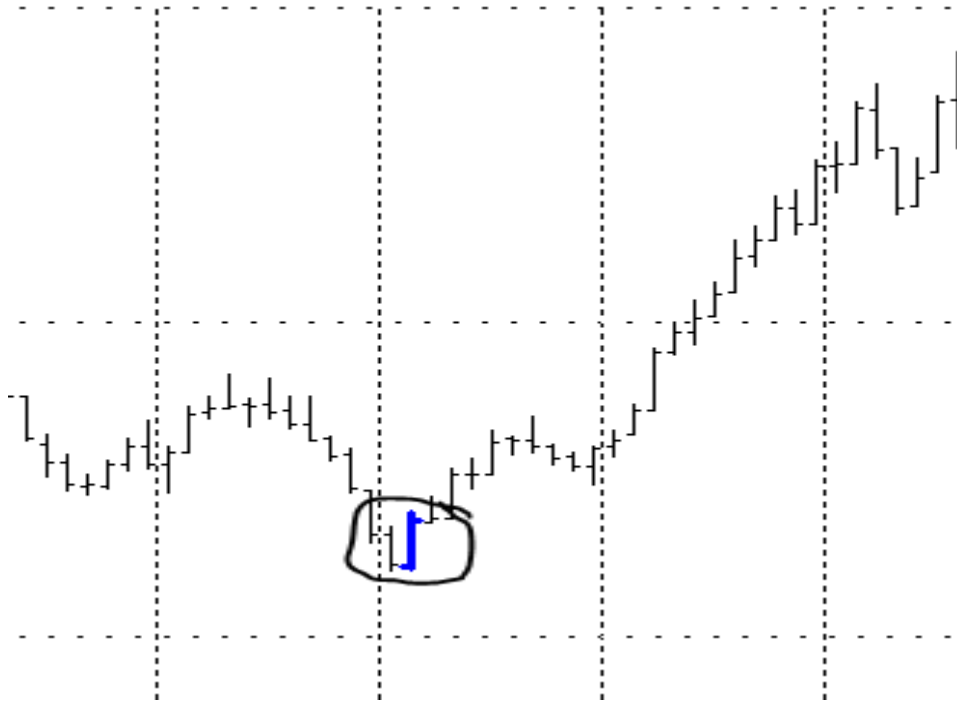

Image 006b

# VII

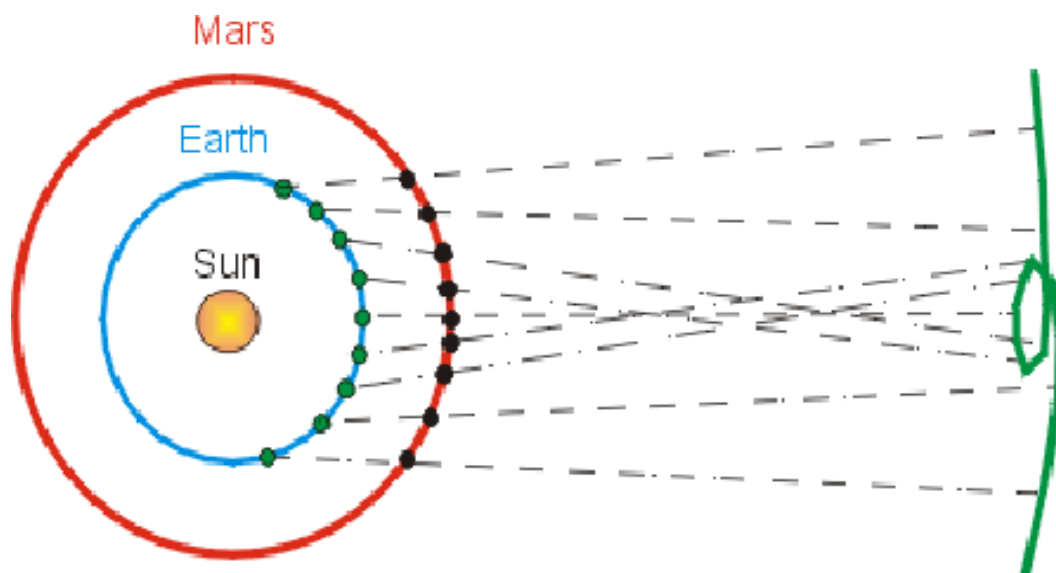

## – RETROGRADE –

Planets and bodies can appear to be moving backwards in the sky for a period, and are said to be retrograde. “Appears” is the key word here, because, technically speaking, no planet moves backwards in their orbits around the Sun. In fact, they don’t even slow down. Retrograde-station-direct cycles are essentially illusions that result from our point of view from Earth, simply because the Earth is also orbiting the Sun at a different speed than the other planets.

Mercury turns retrograde more frequently than any other planet, but outer planets are retrograde more often than Mercury. Mercury can never be more than 28 degrees from the Sun, and whenever it reaches its furthest distance from the Sun, it changes direction. Venus and Mars are retrograde approximately 7-10% of the time. Jupiter through Pluto are retrograde for large periods of the year.

This is another factor which made mild effect on stock market. It is not the case that bad business is done when Mercury is retrograde. Indeed, many successful companies were incorporated during such periods.

As I already said, this is another factor which made mild effect on stock market in the past. I already get many key dates for Nifty trading in the past. You can say “This is the **Astro Combination**” which can be used to get Key dates for Nifty’s trading.

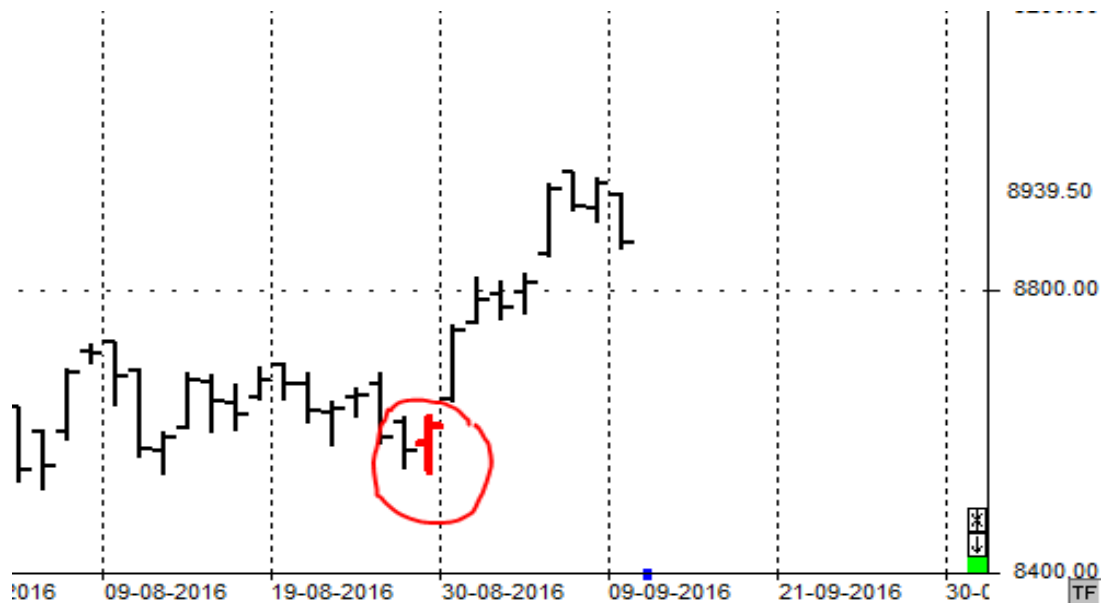

Image 007

In Aug 2016, I got my last Key date (Based on Mercury's Retrograde) and Nifty made a spike high after this Mercury's retrograde motion.

Before that in April 2016, I got one Key date (Based on Mercury's Retrograde) and Nifty made a spike low after this Mercury's retrograde motion.

Image 008

Here I want to tell you, you'll not get a stable result every time. Some time you can get a reversal point for upside or some time you can get a reversal point for

down side. In the past 9 year, some time I do not get any desired result. But most of the time I got a reversal point from Mercury's retrograde motion.

This is your Astro Combination. You can be use this combination to identify the Key date or you can say to identify the reversal date for Nifty.

We know that every planet (beyond Sun & Moon) move in direct and retrograde motion with their own cycle. But they do not create any notable points in Nifty's trading. Of course, I got many key dates from other planets retrograde motions. But they are not reliable compare than Mercury. So, I do not waist your as well as mine time to explain other's retrogradation motions.

# VIII

## – HOROSCOPE –

*A horoscope is an astrological chart that is calculated based upon the date, time and place of birth. A chart can also be calculated for an event, a question, and even a Country, Stocks, Commodities & Index. Symbols are used to represent planets, signs, and geometric connections called aspects. In most cases, the horoscope in Western astrology is drawn on a circular wheel. The astrologer studies your chart and analyses the patterns and factors which describe your personality and needs. In a sense, an astrologer is 'reading' the information contained in your chart.*

Today most professional astrologers use computers to perform the complex calculations involved in obtaining your horoscope. The mathematical formulas devised in the past are now translated into computer programs. However, a certified professional astrologer still should learn how to complete these calculations. A Natal Chart, or Birth Horoscope, will look something like this:

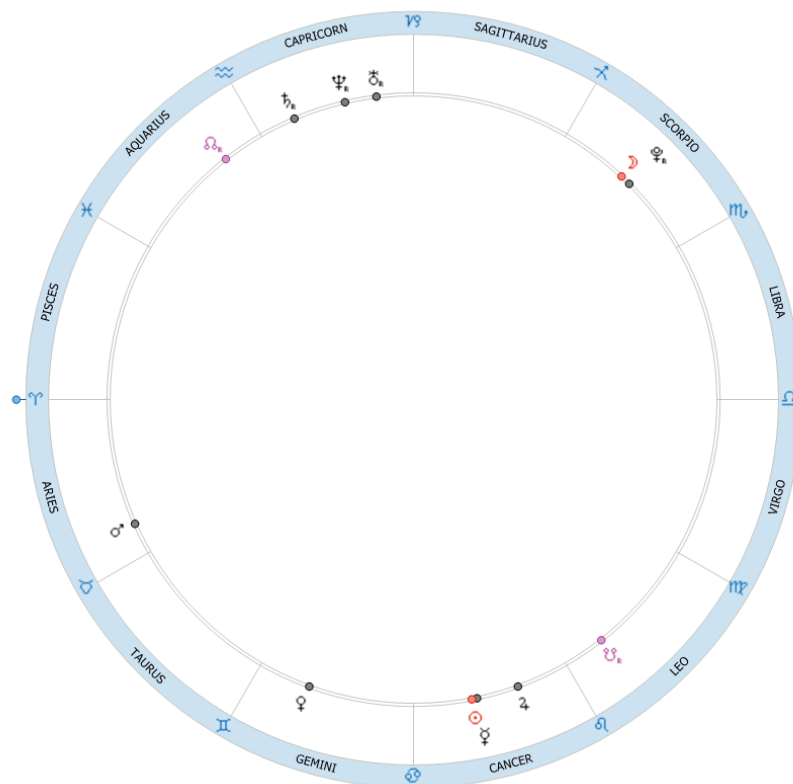

Image 009 a  
Geocentric Nifty's Birth Chart

|   |    |   |    |      |
|---|----|---|----|------|
| ☉ | 10 | ♈ | 59 | 101° |
| ☽ | 16 | ♍ | 50 | 227° |
| ☿ | 11 | ♈ | 32 | 102° |
| ♀ | 09 | ♊ | 41 | 070° |
| ♂ | 23 | ♈ | 32 | 024° |
| ♄ | 19 | ♈ | 47 | 110° |
| ♅ | 22 | ♉ | 52 | 293° |
| ♆ | 07 | ♉ | 27 | 277° |
| ♇ | 13 | ♉ | 15 | 283° |
| ♁ | 15 | ♍ | 07 | 225° |
| ♂ | 07 | ♎ | 35 | 308° |
| ♊ | 07 | ♏ | 35 | 128° |

Here I want to tell you, you can find many turn dates from Natal Chart. *For example, note the Mercury's degree on zodiacal path and check what happen when Mercury pass this degree every year. Here you can find one "key date" for the Nifty's trading. Every time you can see some sudden change in Nifty's movement when Mercury pass 102° on zodiacal path.*

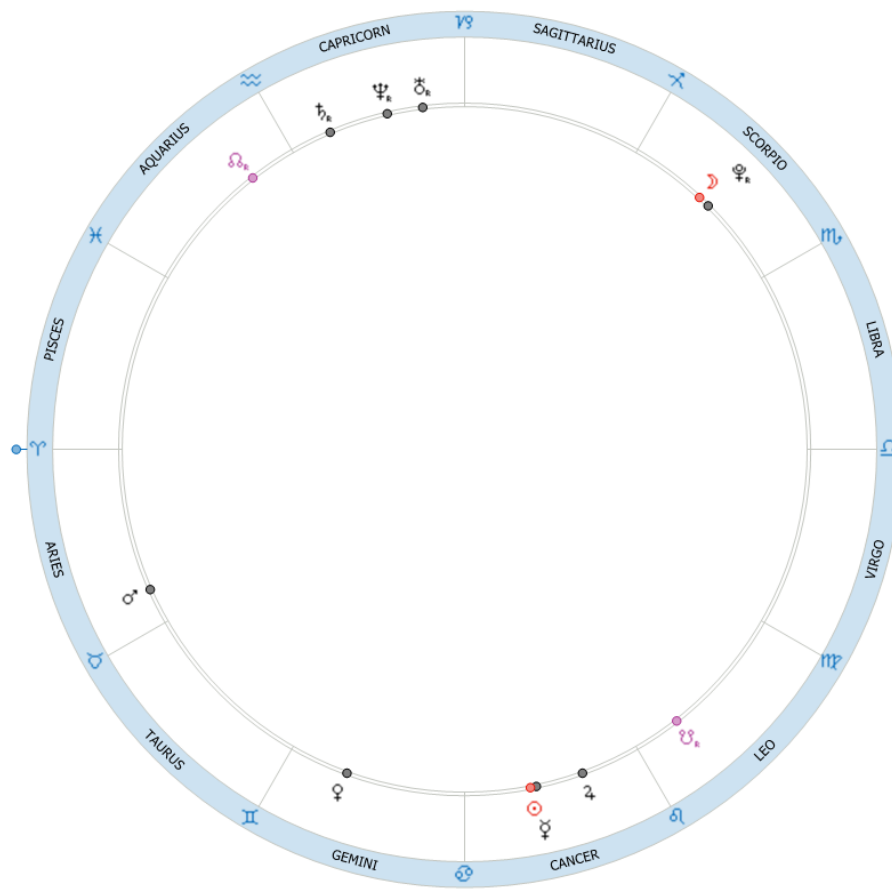

Image 009 b  
Heliocentric Nifty's Birth Chart

Geocentric means the Earth is at the centre. The prefix geo means of the Earth. Thus, geometry is the measure of the earth, geology is the study of the earth.

Heliocentric means the sun is at the centre. The prefix helio means of the sun. One can speak of the heliosphere, the region of space dominated by the sun gravitationally or the heliopause which is the theoretical edge where the stellar wind is stopped by the interstellar medium.

The geocentric model posited that the entire universe revolved about Earth. After Aristotle, this theory is most attached to Ptolemy who wrote the Almagest. In the Almagest Ptolemy collected and refined the theories for planetary motions including the use of epicycles to describe the orbits. This system was widely held in the West until the sixteenth century when a predictive geocentric model was proposed.

The heliocentric model puts the sun at the centre of the solar system. This theory was put forth in pre-Socratic time, but was not widely believed and disappeared possibly due to the loss of ancient Greek works. Copernicus published one of the first descriptions of the theory with work by Kepler, Galileo, and Newton providing mathematical support later.

# IX

## –ASPECTS –

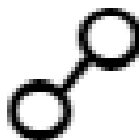

The angular relationships between the planets in a horoscope, measured as angles within the ecliptic circle, are termed “aspects”. Usually this includes angles to the ascendant and MC. Only certain angular relationships are regarded as aspects, and these are said to have intrinsic qualities – they are said to be “harmonic”, “dynamic” or “neutral”. These relationships influence how the planets work together. There is also a certain amount of “play”, which means that an aspect is said to “work” or be operative within a few degrees either way of being exact.

### **Conjunction - 0°**

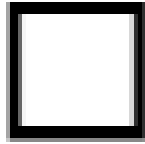

The conjunction tends to be a harmonious aspect. Its quality depends greatly on the planets involved, as well as on how close the aspect is. For example, a conjunction between the Sun and Mercury is generally regarded as harmonious. If, however, the distance between them is less than a few degrees, Mercury is said to be “burnt” or “in combustion”, with corresponding results. In general, the conjunction shows an immediate connection which usually works in one way or another.

### **Opposition - 180°**

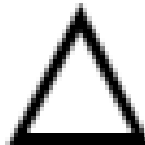

Although the opposition is generally regarded as “disharmonious” or dynamic, it often has quite a motivating and energizing effect. Here too, the quality of the aspect depends on the planets involved, and on what one makes of it. Overall, an opposition between two planets creates tension between them, often with positive results.

### **Square - 90°**

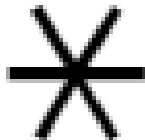

The square is regarded as a disharmonious aspect, the planets involved seem to be “blocked”. The problems that arise from the square keep on turning up, like a bad penny. The difficulty lies in trying to reconcile two forces that are trying to move in completely different directions. Usually this takes the form of desires and needs which are mutually exclusive.

### **Trine - 120°**

The trine is a harmonious aspect, the planets involved work together in a complementary fashion, enriching one another. Trines show where our natural talents lie, whether we make use of them or not is up to us.

### **Sextil - 60°**

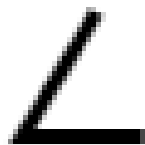

The sextile tends to have a harmonious effect, depending of course on the planets involved.

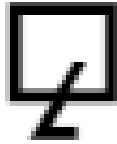

Besides the major aspects mentioned above, there are also quite a number of “minor aspects”. Most of these are subdivisions of the major aspects. The minor aspects add depth and detail to the general picture. The orbs permitted for the minor aspects are much smaller than those used for the major aspects.

The most common minor aspects are:

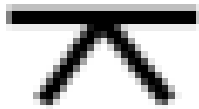

### **Semisquare - 45°, disharmonious**

**Sesquisquare** -  $135^\circ$ , disharmonious

**Quincunx or Inconjunct** -  $150^\circ$ , neutral

**Quintile** -  $72^\circ$ , harmonious

# X

## – GALACTIC CENTRE –

Our solar system spirals and pinwheels its way about the powerful centre of the galaxy. The Sun maintains the same relationship to the Galactic Centre as the Earth does to the Sun. The Sun revolves (with entire solar system) about the Galactic Core taking roughly 240 million years to accomplish the task. Some 30,000 light years from centre and slightly south of the Galactic equator, our Sun resides in between the two arms of the galaxy, the Perseus Arm and the Sagittarius Arm. To view the Galactic Centre, we must look through the Sagittarius Arm, also known as the Southern Stream. This stream contains a proliferation of galactic players such as stars, pulsars and the like, justifying the greater number of stars and energy underwriting the signs of Scorpio, Sagittarius and Capricorn (Libra, Scorpio and Sagittarius, if seen siderally).

The Galactic Centre recently received verification that it contains a black hole as its centre. The resulting energy squeeze emits a wide array of powerful radiation, most notably infrared (IFR) in this instance. This Infrared energy pressures the subconscious mind, providing the release of learned behaviour and memories, both negative and positive, all in the interest of moving forward.

Longitude (tropical): 26 Sagittarius 51 14 (all positions epoch 2000.0)

Latitude: 05 S 36

Longitude Sidereal: 02 Sagittarius 07 03

Right Ascension 265 39 17

Declination: 29 S 00

*This is all enough to get a basic knowledge. This book is not about astrology. This book cover astro combination. To find astro combinations you need Raphael's Astronomical Ephemeris or Astronomical Ephemeris for Stock Market.*

*You can buy this Raphael's Astronomical Ephemeris from [Amazon.in](https://www.amazon.in)*

*Or you can buy Astronomical Ephemeris for Stock Market form [Attriforecasting.com](https://www.attriforecasting.com)*

*If you have any computer software to find Planets daily position or another basic astrological alphabet than you do not need to buy any Ephemeris.*

*In the previous 10 chapters I hope you already got sufficient knowledge or basic astrological alphabets. If you want to read more about astrology you can find many other books in the market.*

*Now we are going to explore astro combinations, which'll can be use in Nifty's trading and get a precious result.*

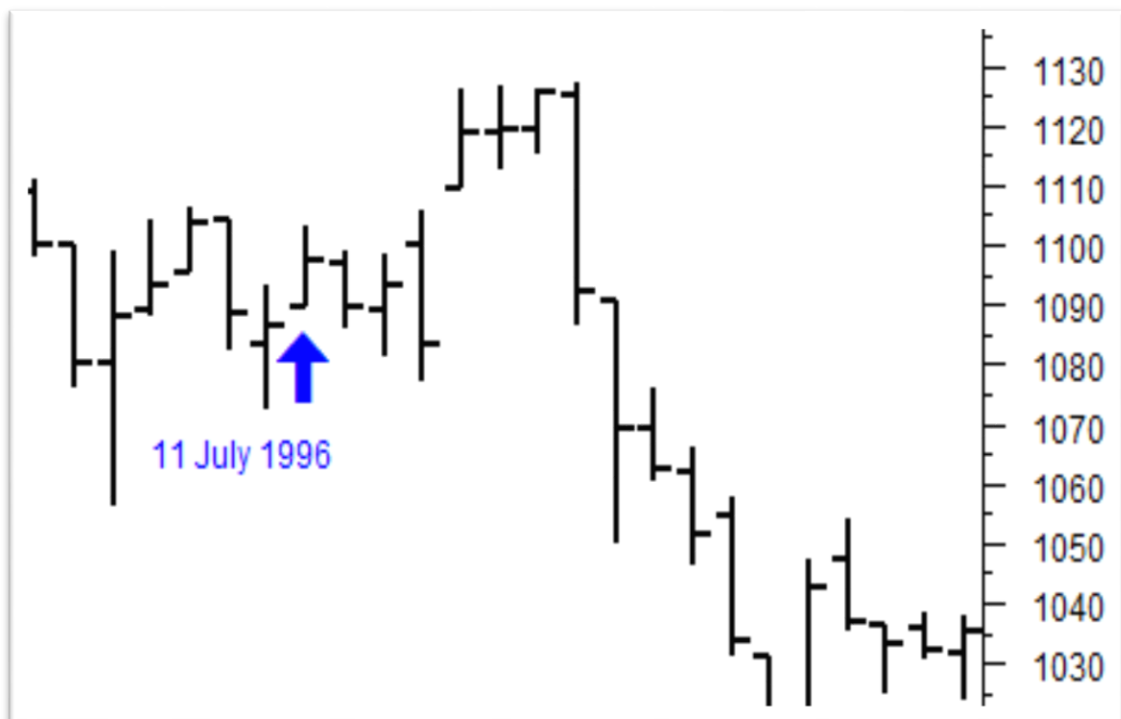

# XI

## – ASTRO COMBINATIONS –

### 009. Sun – Mercury Conjunction in Cancer Sign

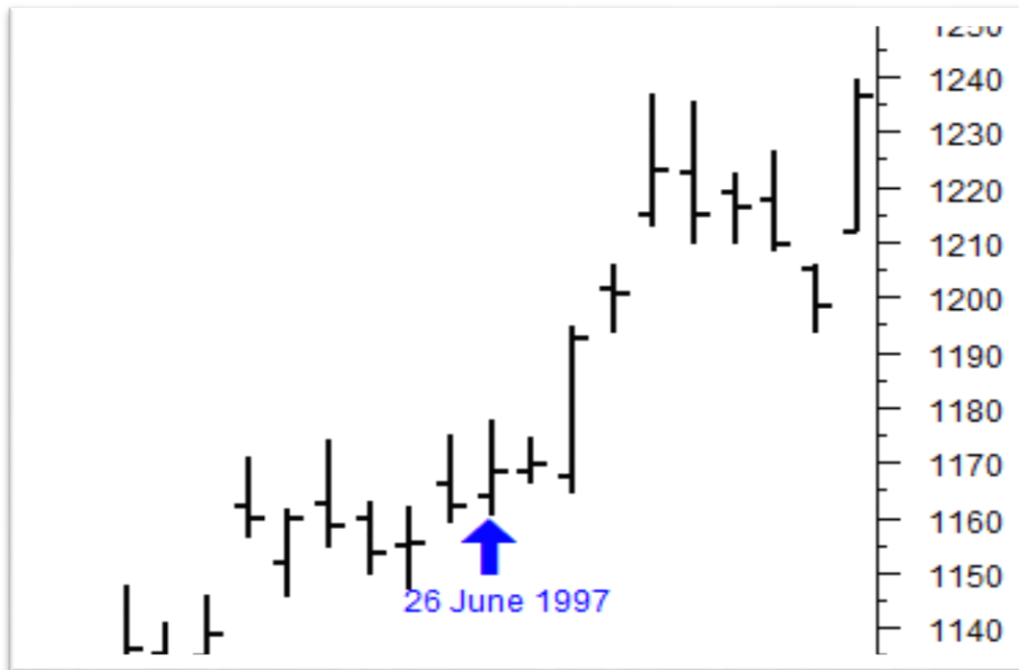

Every year Sun made conjunction with Mercury many times, but many time this conjunction made in Cancer sign. When Sun made a conjunction with Mercury in Cancer sign, most of the time Nifty try to enter in bullish form. As we already every year in mid-June to mid-July month Sun transits through Cancer sign. Therefore we can get this combination only between mid-June to mid-July period.

**Example 1:** In 1996, Sun made a conjunction aspect on 11 July.

1996 Nifty's daily chart.

**Example 2:** In 1997, Sun made a conjunction aspect on 26 June.

1997 Nifty's daily chart.

**Example 3:** In 2000, Sun made a conjunction aspect on 06 July.

2000 Nifty's daily chart.

**Example 4:** In 2002, Sun made a conjunction aspect on 22 July. Here we do not get desired result. Do you know why? We got one Giant conjunction.

Sun conjunct with Mercury & Jupiter.

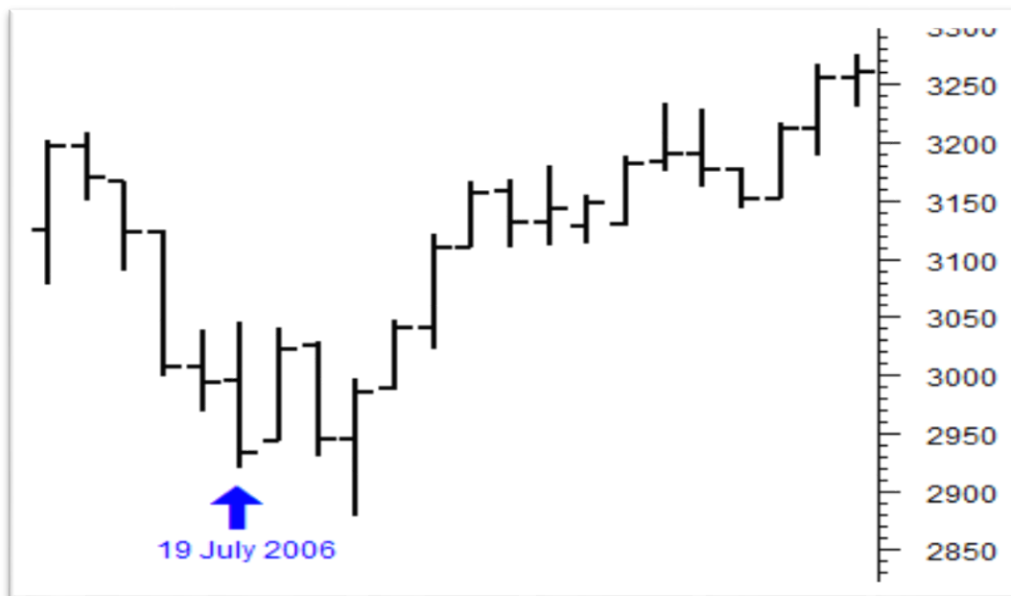

2002 Nifty's daily chart.

**Example 5:** In 2003, Sun made a conjunction aspect on 07 July.

2003 Nifty's daily chart.

**Example 6:** In 2006, Sun made a conjunction aspect on 19 July.

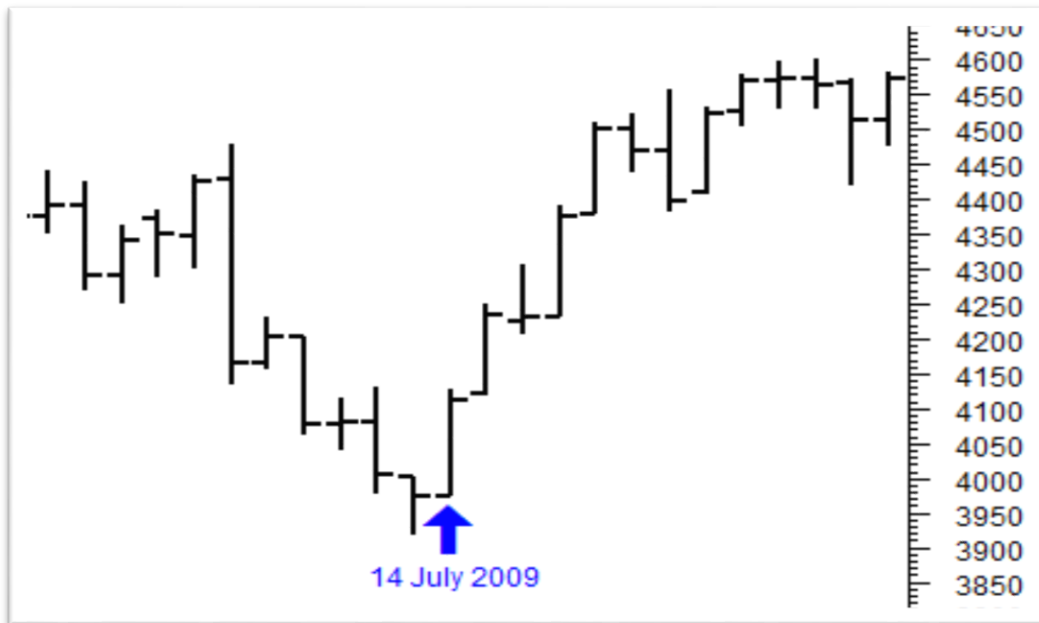

2006 Nifty's daily chart.

**Example 7:** In 2007, Sun made a conjunction aspect on 28 June.

2007 Nifty's daily chart.

**Example 8:** In 2009, Sun made a conjunction aspect on 14 July.

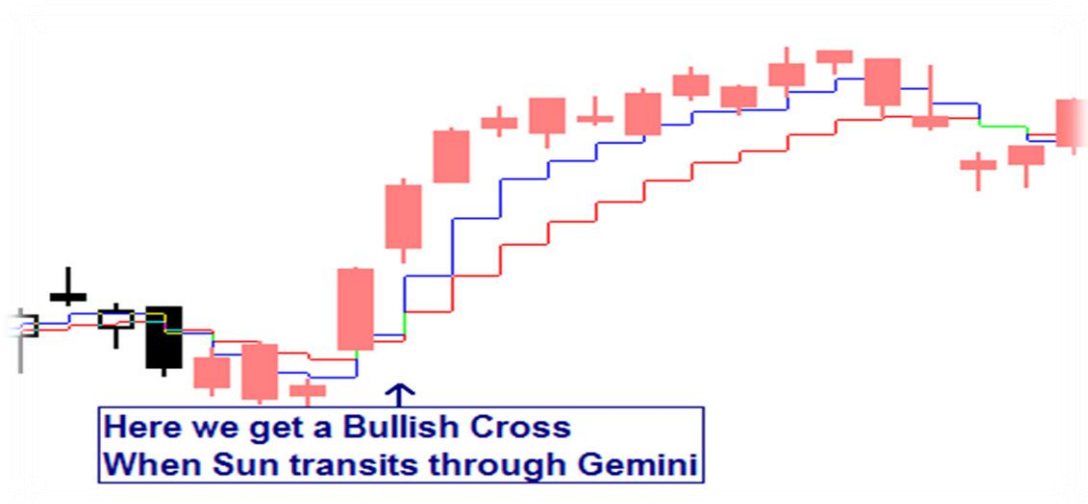

2009 Nifty's daily chart.

You can find many examples like that on Nifty's chart.

### 011. Sun transits through Gemini & 4, 9 Expo Moving Cross Average Line Crossover

Every year Sun pass through Gemini sign from mid-May to mid-June. If we use "some technical analysis indicators" here then we'll get some precious results. I use this combination from the beginning and I got many great result.

2016 Nifty's daily chart.

This (Expo 4, 9 Moving Average line crossover (Bullish or Bearish)) very effectively work when Sun transits through Gemini sign.

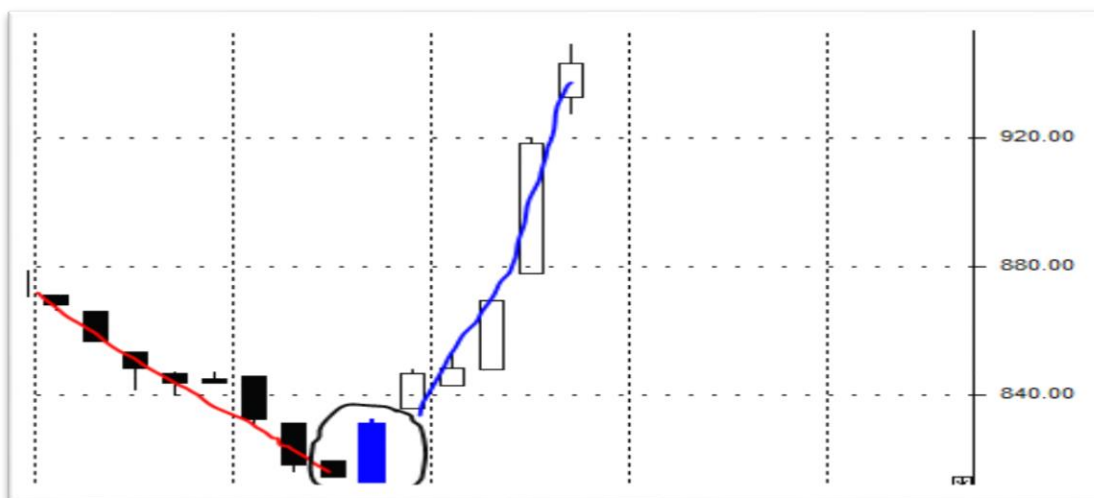

### 012. Mercury's Retrograde, Direct & Nifty's Key Dates –

Mercury is the nearest planet to the Sun. At no time is it more than 26 degree away from the Sun. When it is combusting, it is malefic in nature and when it is not combusting, it is benefice in nature. Its average motion is about  $1\frac{1}{4}$  degree a day. Most of the time Mercury retrograde three times a year.

Mercury produce its result many time on Nifty when Mercury turns direct after a retrograde period. Or retrograde after a direct period. I got many Key dates from Mercury's behaviour in the past.

Please check the above image a, here you can see Nifty try to make a bullish form after going Mercury retrograde.

Now please look the above image, here you can see Nifty try to make a bullish form after going Mercury direct.

In the past, I got more than 100 example, where Mercury's retrograde or direct day act like as Key Date.

Now please keep your eyes on above image, here you can see Nifty try to make a bearish form after going Mercury retrograde.

But remember, do not believe only on Mercury retrograde or direct day dates. Always find another combination too, if you want to make a good trade in Nifty.

### **013. Mercury Retrograde Position & 3 Day rally**

I feel very proud to introduce this astro combination to you. This combination was founded by George Bayer in 1936 for Wheat trading. From the past 9 years, I continue use this astro combination in my trading. In this combination, we use Mercury's position now it turns retrograde.

This combination is very one of the kind, which is hard to explain by words. So, I am try to explain this combination from the past performance.

Example 1: On 27 Dec 2009, Mercury turn retrograde at 21°46" in Capricorn zodiac sign. Or you can say 292° on zodiacal path. After that 1 year from the same date 27 Dec 2010 we got three-day rally in Nifty.

Example 2: On 19 April 2010, Mercury turn retrograde at 12°35" in Taurus zodiac sign. Or you can say 43° on zodiacal path. After that 1 year from the same date 19 April 2011 we got three-day rally in Nifty.

Example 3: On 21 Aug 2010, Mercury turn retrograde at 19°13" in Virgo zodiac sign. Or you can say 169° on zodiacal path. After that 1 year from the same date 21 Aug 2011 we got three-day rally in Nifty. Here I want to tell you on 21 Aug 2011 NSE Closed, but after this day we got 2 day's rally in Nifty.

Example 4: On 11 Dec 2010, Mercury turn retrograde at 05°54" in Capricorn zodiac sign. Or you can say 276° on zodiacal path. After that 1 year from the same date 11 Dec 2011 we got a bearish rally in Nifty. [\*Here I want to tell you here Mercury conjunct with one outer planet Pluto\*](#). In financial astrology, we know that Pluto always reverse the result which may generate by Mercury. And Pluto have a powerful strength compare then Mercury.

Example 5: On 31 March 2011, Mercury turn retrograde at 24°21" in Aries zodiac sign. Or you can say 24° on zodiacal path. After that 1 year from the same date 31 March 2012 we got three-day rally in Nifty. Here I want to tell you on 31 March & 01 April 2012 NSE Closed, but after this day we got 2 day's rally in Nifty.

Example 6: On 04 Aug 2011, Mercury turn retrograde at 1°10" in Virgo zodiac sign. Or you can say 151° on zodiacal path. After that 1 year from the same date 04 Aug 2012 we made a gap upward on that day, and finally we got three-day rally.

Example 7: On 25 Nov 2011, Mercury turn retrograde at 20°04" in Sagittarius zodiac sign. Or you can say 260° on zodiacal path. After that 1 year from the same date 25 Nov 2012 we got three-day rally.

Example 8: On 13 March 2012, Mercury turn retrograde at 06°46" in Sagittarius zodiac sign. Or you can say 7° on zodiacal path. After that 1 year from the same date 13 March 2013, we made a gap upward on that day but after that bear run in Nifty due to other powerful astro combination. I'll illustrate "that" combination latter.

Example 9: On 15 July 2012, Mercury turn retrograde at 13°33" in Leo zodiac sign. Or you can say 133° on zodiacal path. After that 1 year from the same date 15 July 2013, Nifty open below from the previous day close value and sharply moved toward previous day's high mark. On the next day, Nifty again opened in negative gap and sharply move to the upward. And after that Nifty continue made good difference.

Example 10: On 07 Nov 2012, Mercury turn retrograde at  $4^{\circ}18''$  in Scorpio zodiac sign. Or you can say  $244^{\circ}$  on zodiacal path. After that 1 year from the same date 07 July 2013, Nifty continues fall from the upper levels. What the reason behind this, be truly I have no idea.

Example 11: On 24 Feb 2013, Mercury turn retrograde at  $19^{\circ}50''$  in Pisces zodiac sign. Or you can say  $350^{\circ}$  on zodiacal path. After that 1 year from the same date 24 Feb 2014 we got three-day rally in Nifty according to the combination probability.

We note that the dates given are gradually moving backwards in the calendar. The difference amounts to about 16 – 18 days from 1 year to the next year.

#### **014. Mercury Retrograde Position & Its Zodiacal Value at That Time Compared to the Same Mercury Position a Year Ago**

This astro combination is another complex combination. We use the same position as given in previous combination, each time planet Mercury turns retrograde. Instead of using the date in the calendar. This is a very complex combination, I have no words to explain this combination in words. So I am presenting some examples to show you “How can you use this combination in your trading?”

**Example 1:** On 22 Feb 2000, Mercury turn retrograde at  $17^{\circ}09''$  in Pisces zodiac sign. Or you can say  $347^{\circ}$  on zodiacal path. This very same place is passed by Mercury again on 29 March 2001.

29 March 2001 is a Key Date

Please note – Key Date is an important date, where you can get any one reversal direction.

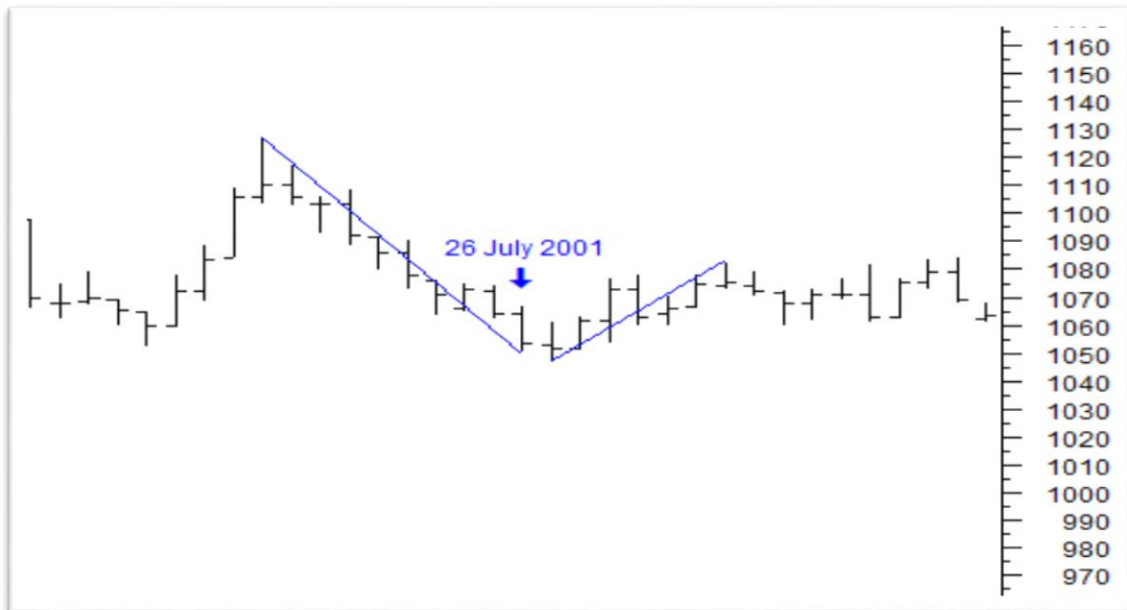

2001 Nifty's daily chart.

Before the Key Date Nifty continue run in positive frame after a local low and after Key Date Nifty again turn in Negative frame. So, you can easily Assis the coming probability from this Key Date.

**Example 2:** On 24 June 2000, Mercury turn retrograde at  $19^{\circ}56''$  in Cancer zodiac sign. Or you can say  $110^{\circ}$  on zodiacal path. This very same place is passed by Mercury again on 26 July 2001.

26 July 2001 is a Key Date

2001 Nifty's daily chart.

Before the Key Date Nifty continue run in negative frame and after Key Date Nifty again try to turn in positive frame. So, you can easily Assis the coming probability from this Key Date.

2001 Nifty's daily chart.

**Example 3:** Please see the above Image, On 19 Aug 2000, Mercury turn retrograde at  $15^{\circ}47''$  in Scorpio zodiac sign. Or you can say  $226^{\circ}$  on zodiacal path. This very same place is passed by Mercury again on 19 Nov 2001. So, 19 Nov 2001 is a Key Date. According to the combination probability we can see a reversal point on this date. Now please see the Image 003, where you can clearly watch after a positive phase Key Date turns Nifty's trend in a consolidation phase.

**Example 4:** On 04 Feb 2001, Mercury turn retrograde at  $00^{\circ}42''$  in Pisces zodiac sign. Or you can say  $331^{\circ}$  on zodiacal path. This very same place is passed by Mercury again on 13 March 2002. So, 13 March 2002 is a Key Date. According to the combination probability we can see a reversal point on this date.

2002 Nifty's daily chart.

**Latest example5:** On 19 May 2015, Mercury turn retrograde at  $13^{\circ}09''$  in Gemini zodiac sign. Or you can say  $73^{\circ}$  on zodiacal path. This very same place is passed by Mercury again on 22 June 2016. So, 22 June 2016 is a Key Date. According to the combination probability we can see a reversal point on this date.

2016 Nifty's daily chart.

We do not get any reaction on the Key Date and, but after 1 trading session we got a good correction in Nifty.

In the past 9 Year, I got 12 time satisfactory results out of 19 time. I am very satisfied with this combination. If trader mix with technical analysis studies with this combination then he may get precise result from this combination.

#### 015. Mercury Pass 281° from Zodiacal Path (Geocentric Method)

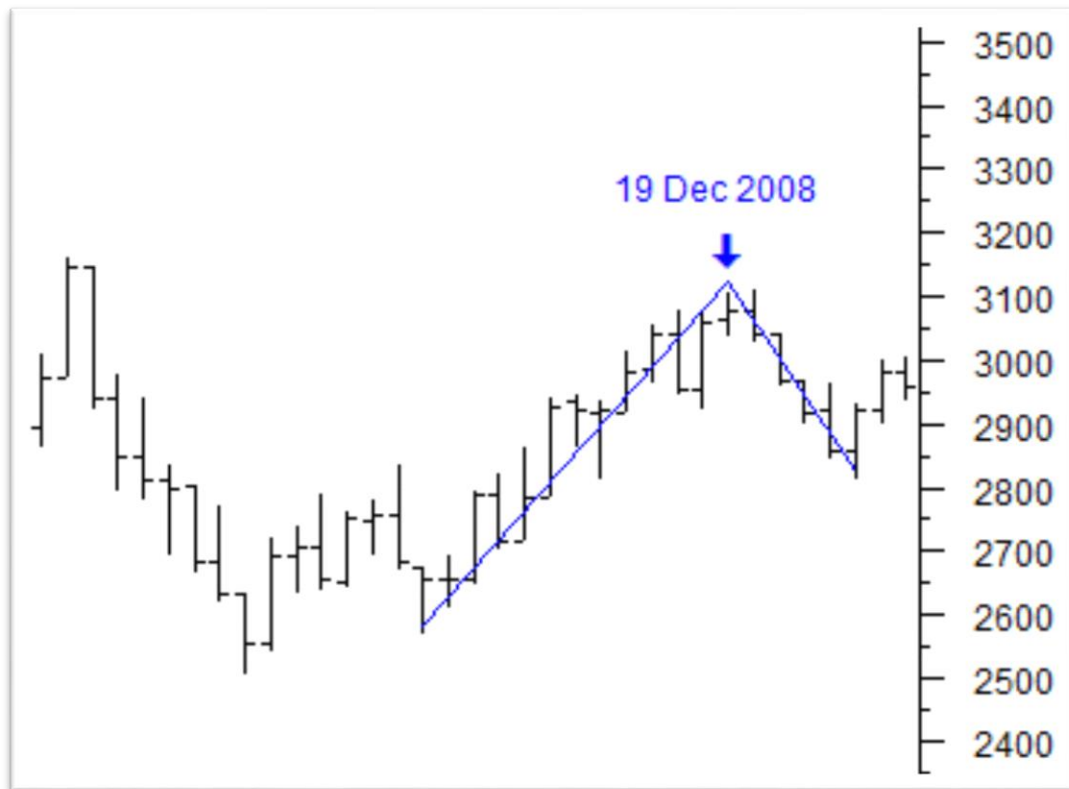

Every year Mercury pass 281° on zodiacal path, 281° is the same exact point 11°11" in Capricorn. This point is a very important point for Nifty traders. Most of the time when Mercury pass this point Nifty face some weakness automatically. I found this combination in 2007.

**Example 1:** On 19 Dec 2008, Mercury pass 281° on zodiacal path.

Please look here all planets very carefully –

|     |     |     |     |     |     |     |     |     |     |     |     |
|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|
| ☉   | ☽   | ☿   | ♀   | ♂   | ♂   | ♂   | ♂   | ♂   | ♂   | ♂   | ♂   |
| 268 | 174 | 281 | 313 | 264 | 296 | 172 | 349 | 322 | 271 | 310 | 130 |

Here you can see, Mercury is all alone here and pass the 281° zodiacal path. Due to this combination, we got a clear probability “**Nifty may slip toward downside after this combination**”

2008 Nifty's daily chart.

**Example 2:** 14 Dec 2009, Mercury pass 281° on zodiacal path.

Please look here all planets very carefully –

|     |     |     |     |     |     |     |     |     |     |     |     |
|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|
| ☿   | ☽   | ♂   | ♀   | ♂   | ♂   | ♂   | ♂   | ♂   | ♀   | ♂   | ♂   |
| 262 | 235 | 282 | 255 | 139 | 323 | 184 | 353 | 324 | 273 | 291 | 111 |

Here you can see, Mercury is all alone here and pass the 281° zodiacal path. Due to this combination, we got a clear probability “**Nifty may slip toward downside after this combination**”

2009 Nifty's daily chart.

**Example 3:** 22 Jan 2011, Mercury pass  $281^\circ$  on zodiacal path.

Please look here all planets very carefully –

|     |     |     |     |     |     |     |     |     |     |     |    |
|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|----|
| ☉   | ☾   | ♂   | ♀   | ♂   | ♂   | ♂   | ♂   | ♂   | ♂   | ♂   | ♂  |
| 302 | 153 | 281 | 255 | 305 | 360 | 197 | 358 | 327 | 276 | 272 | 92 |

2011 Nifty's daily chart.

Here you can see, Mercury is all alone here and pass the 281° zodiacal path. Due to this combination, we got a clear probability “**Nifty may slip toward downside after this combination**”. NSE Closed on 22 & 23 Jan 2011, but after that we show a proper reaction.

**Example 4:** 16 Jan 2012, Mercury pass 281° on zodiacal path.

Please look here all planets very carefully –

|     |     |     |     |     |    |     |   |     |     |     |    |
|-----|-----|-----|-----|-----|----|-----|---|-----|-----|-----|----|
| ☉   | ☽   | ♂   | ♀   | ♂   | ♂  | ♂   | ♂ | ♂   | ♀   | ♂   | ♂  |
| 295 | 202 | 281 | 332 | 173 | 31 | 209 | 1 | 329 | 278 | 253 | 73 |

2012 Nifty's daily chart.

Here you can see, we do not get result as per “probability” what is the reason behind this? please look at the planet position one more time. Only 3-degree difference between Mercury & Pluto. That’s mean when this combination generates one another combination also prissiest in the sky. Which one? Off course... Mercury Conjunct (♂) Pluto.

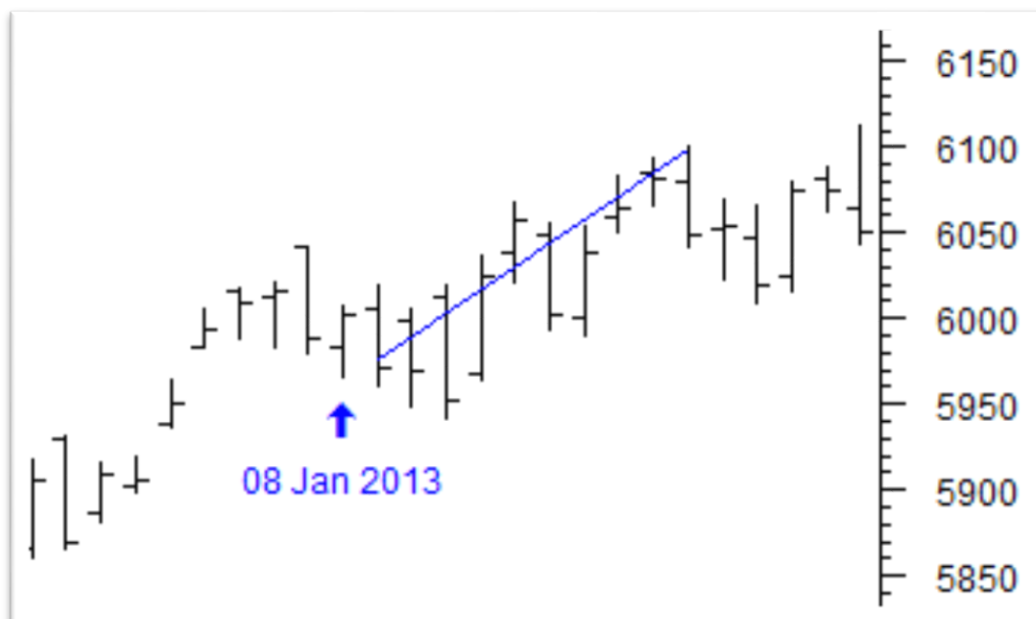

In financial astrology, we know that Pluto always reverse the result which is generate by Mercury. So, anyone can Assis the probability. How?

We know that when Mercury pass 281° zodiacal path in the sky Nifty face some weakness automatically. But if Pluto create any combination (like as conjunction or opposition) with mercury now then Pluto always reverse the result.

**Example 5:** 08 Jan 2013, Mercury pass 281° on zodiacal path.

Please look here all planets very carefully –

|     |     |     |     |     |    |     |   |     |     |     |    |
|-----|-----|-----|-----|-----|----|-----|---|-----|-----|-----|----|
| ☉   | ☽   | ☿   | ♀   | ♂   | ♂  | ♂   | ♂ | ♂   | ♂   | ♂   | ♂  |
| 288 | 237 | 282 | 269 | 310 | 67 | 220 | 5 | 331 | 280 | 235 | 55 |

2013 Nifty's daily chart.

Here you can see, we do not get result as per “probability” what is the reason behind this? please look at the planet position one more time. Only 2-degree difference between Mercury & Pluto.

**Example 6:** 31 Dec 2013, Mercury pass 281° on zodiacal path.

Please look here all planets very carefully –

|     |     |     |     |     |     |     |   |     |     |     |    |
|-----|-----|-----|-----|-----|-----|-----|---|-----|-----|-----|----|
| ☉   | ☽   | ☿   | ♀   | ♂   | ♂   | ♂   | ♂ | ♂   | ♂   | ♂   | ♂  |
| 280 | 261 | 281 | 297 | 191 | 106 | 230 | 9 | 333 | 281 | 216 | 36 |

2013 Nifty's daily chart.

Here you can see, Mercury is conjunct with Pluto and pass through  $281^{\circ}$  zodiacal path. According to the combination we'll get a bullish sentiment here because Pluto may reverse its original result. But we not got this result why?

Keep your eye on planetary patch where you can see Mercury & Pluto is conjunct with each other but one another planet is also available their Sun. Sun is also conjunct with Mercury & Pluto here. We called this type of conjunction "Giant Conjunction". We know Sun the biggest planet in our solar system as per astrology. (Even Sun is a star) but in astrology we identify Sun as planet. We know that When Sun & Mercury conjunct with each other they try produce Key Date (reversal date) for Nifty.

Here we can get 3 probability –

1. Mercury pass  $281^{\circ}$  zodiacal path produce negative move in Nifty.
2. Mercury conjunct with Pluto and pass  $281^{\circ}$  zodiacal path try to reverse the original factor.
3. Sun & Mercury conjunct with each other produce a Key Date (reversal date). From the past 7 or days Nifty continue run in bullish phase. So, we can say here after Key Date we can see a negative movement in Nifty.

Now when we calculate all these 3 probability then we get two probability shows negativity in the Nifty for coming sessions. And we got.

### 016. Mercury Pass 101° from Zodiacal Path (Geocentric Method)

Every year Mercury pass 101° on zodiacal path 281° is the same exact point 11°09" in Capricorn. This point is a very important point for Nifty traders. Most of the time when Mercury pass this point Nifty face some **bull period** automatically. I found this combination in 2007. This point is exact opposite point 281° zodiacal path.

**Example 1:** 10 July 2009, Mercury pass 101° on zodiacal path.

Please look here all planets very carefully –

|     |     |     |    |    |     |     |     |     |     |     |     |
|-----|-----|-----|----|----|-----|-----|-----|-----|-----|-----|-----|
| ☉   | ☾   | ☿   | ♀  | ♂  | ♂   | ♂   | ♂   | ♂   | ♀   | ♂   | ♂   |
| 108 | 318 | 103 | 65 | 59 | 326 | 167 | 357 | 326 | 272 | 300 | 120 |

2009 Nifty's daily chart.

Here you can see, Mercury is all alone here and pass the 101° zodiacal path. Due to this combination, we got a clear probability **"Nifty try to go positive after this combination"**

**Example 2:** 1 July 2010, Mercury pass 101° on zodiacal path.

Please look here all planets very carefully –

|    |     |     |     |     |    |     |   |     |     |     |     |
|----|-----|-----|-----|-----|----|-----|---|-----|-----|-----|-----|
| ☉  | ☾   | ☿   | ♀   | ♂   | ♂  | ♂   | ♂ | ♂   | ♀   | ♂   | ♂   |
| 99 | 331 | 102 | 139 | 163 | 03 | 179 | 1 | 328 | 274 | 282 | 102 |

2010 Nifty's daily chart.

Here you can see, Mercury is conjunct with Sun and pass through 101° zodiacal path. According to the combination we'll get a bullish sentiment here.

Here we can get 2 probability –

1. Mercury pass 101° zodiacal path produce positive move in Nifty.
2. Sun & Mercury conjunct with each other produce a Key Date (reversal date). From the past 7 - 10 days Nifty continue run in bearish phase. So, we can say here after Key Date we can see a positive movement in Nifty.

Now when we calculate all these 3 probability then we get two probability shows positive phase in the Nifty for coming sessions. And we got.

**Example 3:** 23 June 2011, Mercury pass 101° on zodiacal path.

Please look here all planets very carefully –

|    |     |     |    |    |    |     |   |     |     |     |    |
|----|-----|-----|----|----|----|-----|---|-----|-----|-----|----|
| ☿  | ☽   | ♂   | ♀  | ♂  | ♂  | ♂   | ♂ | ♂   | ♀   | ♂   | ♂  |
| 91 | 358 | 103 | 77 | 61 | 34 | 191 | 4 | 331 | 276 | 263 | 83 |

Here you can see, Mercury is all alone here and pass the 101° zodiacal path. Due to this combination, we got a clear probability **“Nifty try to go positive after this combination”**.

2011 Nifty's daily chart.

**Example 4:** 10 June 2013, Mercury pass  $101^\circ$  on zodiacal path.

Please look here all planets very carefully –

|    |    |     |    |    |    |     |    |     |     |     |    |
|----|----|-----|----|----|----|-----|----|-----|-----|-----|----|
| ☉  | ☽  | ♂   | ♀  | ♂  | ♂  | ♂   | ♂  | ♂   | ♂   | ♂   | ♂  |
| 79 | 96 | 103 | 99 | 67 | 86 | 215 | 12 | 335 | 281 | 227 | 47 |

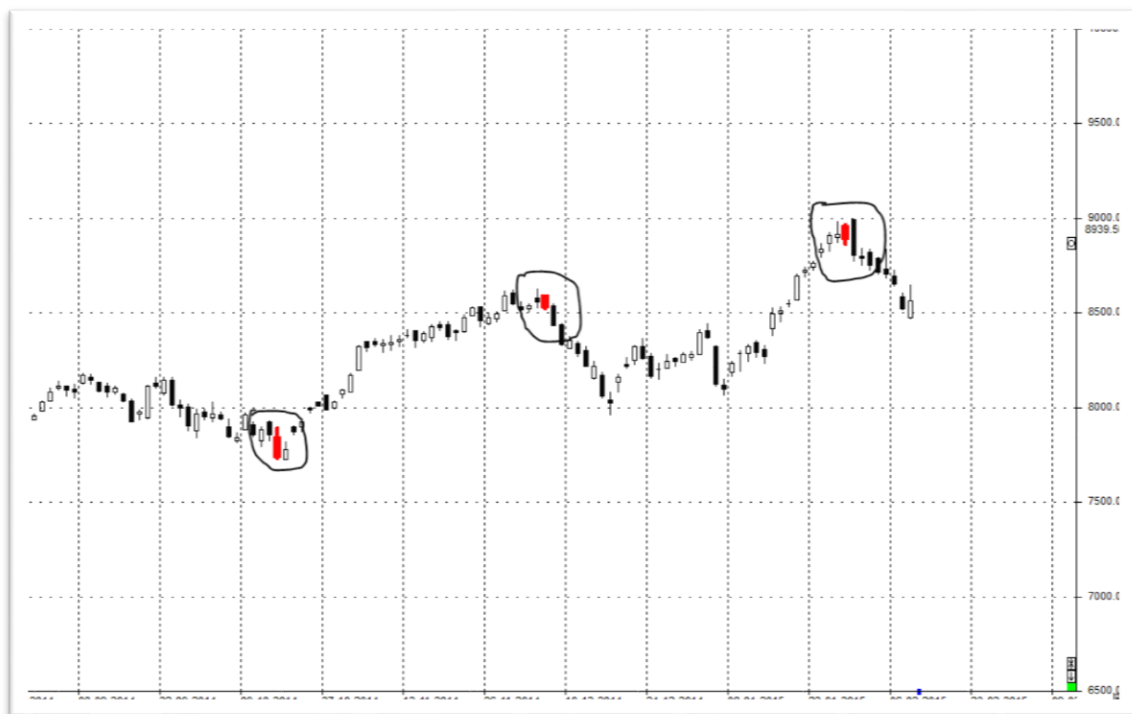

2013 Nifty's daily chart.

Here you can see, we do not get result as per “probability” what is the reason behind this? please look at the planet position one more time. Pluto made an opposition aspect with Mercury and we know Pluto always try to make reverse probability which was generated by Mercury.

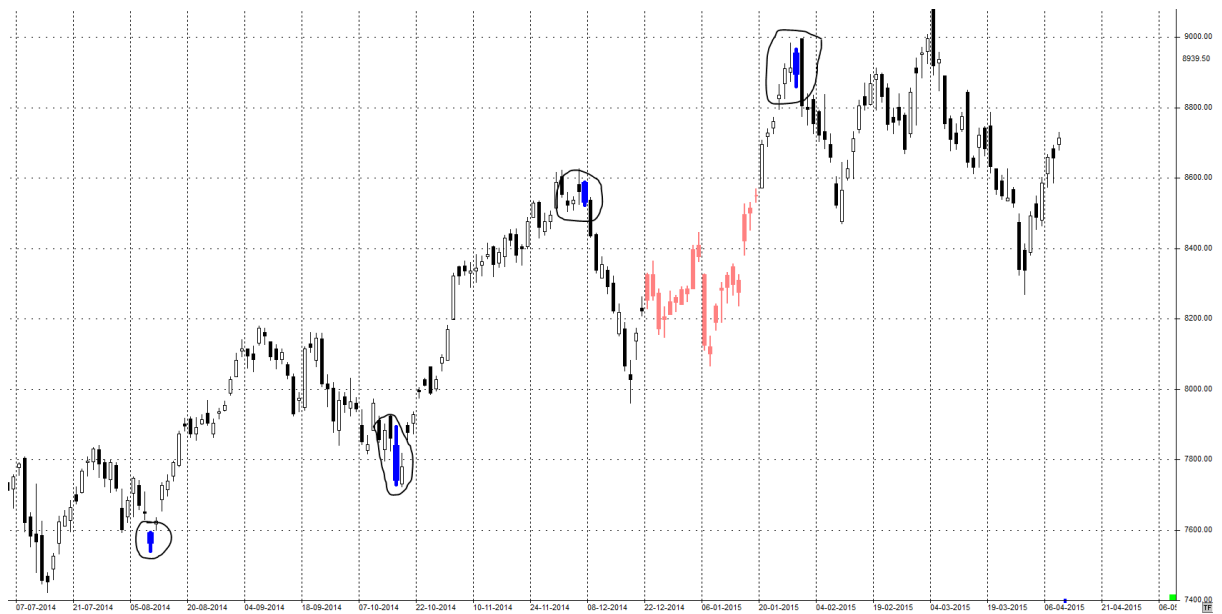

### 017. Sun – Mercury Conjunction (Geocentric Method)

This combination is a very important combination in financial world. Every year Mercury made many time conjunction with Sun. Sometime inferior sometime superior and most off the time this conjunction day represent identical Key date.

This combination is very reliable, if trader mix this combination with technical analysis indicators like as MACD, SAR or TSA.

2013 Nifty's daily chart.

2014 - 2015 Nifty's daily chart.

### 007. Mercury pass through $63^\circ$ on its zodiacal path.

This combination is not so reliable, but you need to know about this combination. In this combination, you need to know why I chose this “cordial point”. Because  $63^\circ$  is the mid heaven point on Nifty's natal chart.

In 2008 & in 2013 I got very precious results from this combination.

2008 Nifty's daily chart.

2013 Nifty's daily chart.

### 018. Venus - Mercury Conjunction (Geocentric Method)

Mercury and Venus are the nearest planets to the Sun and they are also near to each other. At no time are Mercury and Venus at more than 68 degrees from each other. Therefore, the important aspects formed between them only:

Conjunction  
Semi – Square  
and Sextile

Conjunction aspect is the only preferable combination here. Because I feel this is the only aspect which'll give you a satisfactory result.

Most of the time When this combination persists on the Aries, Leo, Libra & Aquarius zodiacal path, we show a 3-day bearish rally in Nifty. I want to tell you here ***“most of the time not every time”***

Example 1: On 25 Aug 1998, Mercury start to be made a conjunction with Venus in Leo sign and 26 Aug 1998, this conjunction completed. After that we show a 3-day bear rally in Nifty.

1998 Nifty's daily chart.

Example 2: On 27 Aug 1999, Mercury start to be made a conjunction with Venus in Leo sign and 28 Aug 1999, this conjunction completed. After that we show a 3-day bear rally in Nifty.

1999 Nifty's daily chart.

Example 3: On 27 April 2000, Mercury start to be made a conjunction with Venus in Leo sign and 28 April 2000, this conjunction completed. After that we show a 3-day bear rally in Nifty.

2000 Nifty's daily chart.

Example 4: On 08 April 2001, Mercury start to be made a conjunction with Venus in Leo sign and 09 April 2001, this conjunction completed. After that we show a 3-day bear rally in Nifty.

2001 Nifty's daily chart.

Example 5: On 30 Oct 2001, Mercury start to be made a conjunction with Venus in Leo sign and 30 Oct 2001, this conjunction completed. But we do not get any desired result. Why because we got one another combination here with this combination, Eris made an opposition aspect with Mercury & Venus.

2001 Nifty's daily chart.

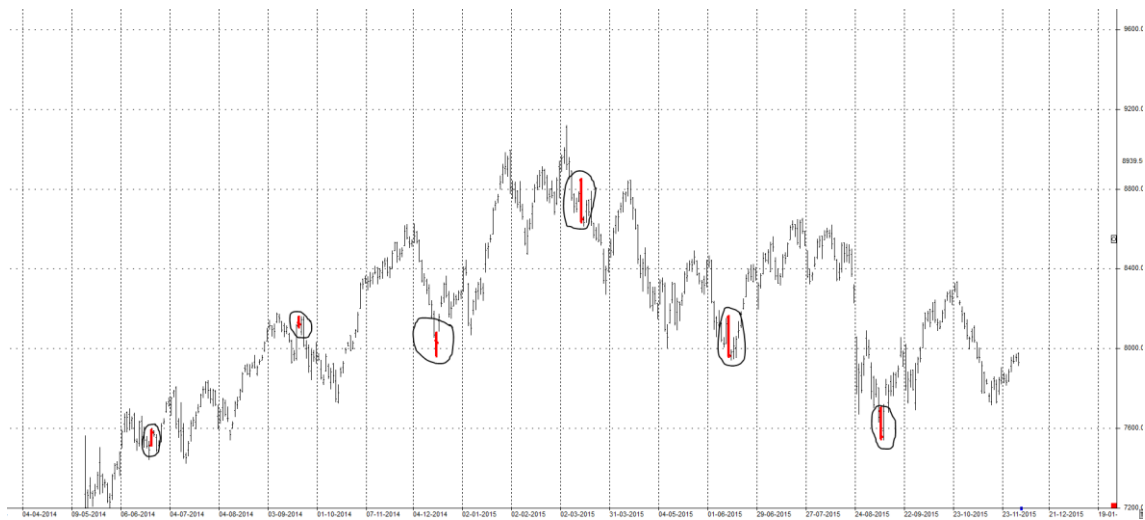

Example 6: On 06 Aug 2015, Mercury start to be made a conjunction with Venus in Leo sign and 07 Aug 2015, this conjunction completed. After that we show a 3-day bear rally in Nifty.

2015 Nifty's daily chart.

### 019. Mercury - Pluto Conjunction (Heliocentric Method)

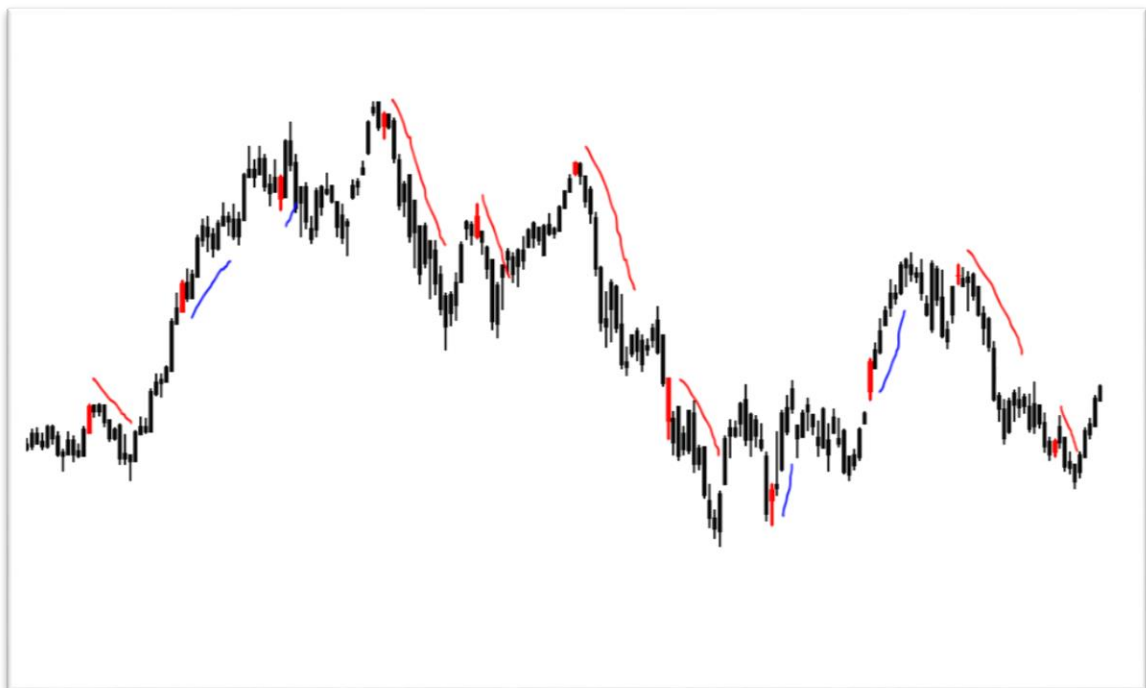

In the past I got many precious Key dates by Mercury – Pluto conjunction aspect. In 2015, every time I got a reversal points due to this combination.

2014 - 2015 Nifty's daily chart.

## 020. Moon Conjunction Pluto (Geocentric Method)

Moon made a conjunction with Pluto one a time every month. Most of the time Nifty face some weakness.

2011 Nifty's daily chart.

2012 Nifty's daily chart.

2013 Nifty's daily chart.

2014 Nifty's daily chart.

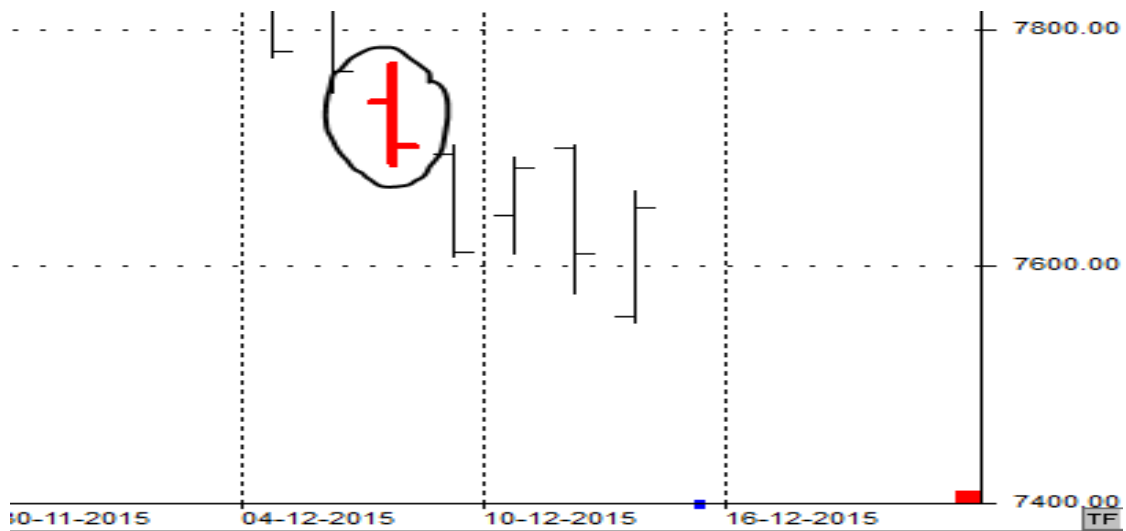

### **021. Mercury Pass 257° from Zodiacal Path (Geocentric Method)**

As we already know 257° is a very important point on the zodiacal path. Because we know this is the galactic centre point. When Mercury pass, this point Nifty try to make 2 day's one side rally bullish either bearish.

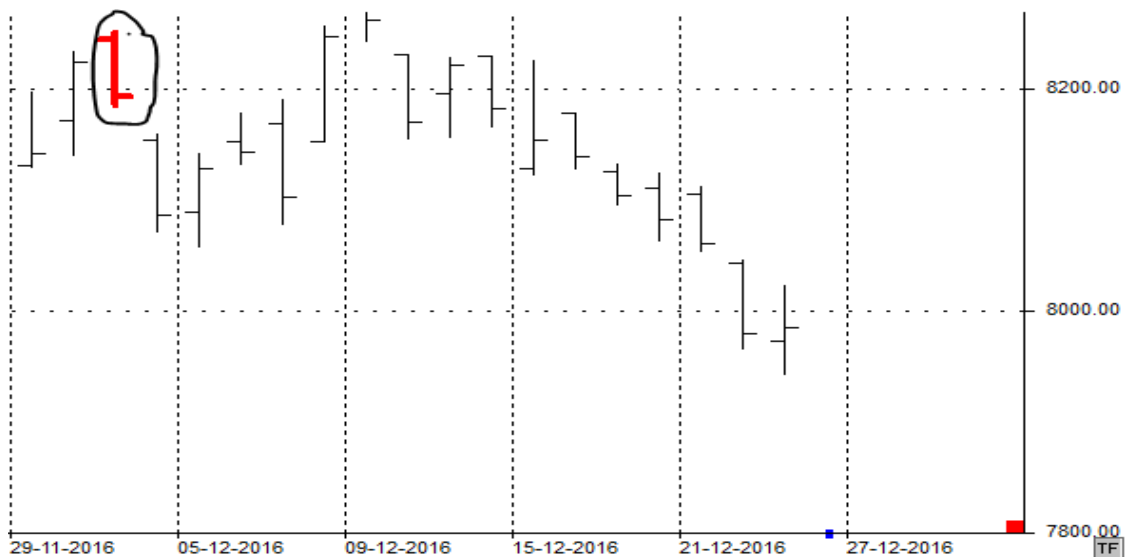

You cannot judge but you can get. If you want to use this combination always keep your eye on 1 hour bar chart and the MACD indicator.

If you get a proper bullish or bearish indicator on 1 hour bar chart by MACD indicator than you can act as need. I don't have enough data to show you example here on 1 hour chart, so I put here daily chart.

Please make a note here, if you want to use this combination in your trading than use 1 hour bar chart. Do not make your any decision on daily chart. And use MACD indicator not any other. In the past I got 9 precious result from this combination. So, keep these words in your mind.

2015 Nifty's daily chart.

2016 Nifty's daily chart.

## 022. Mercury Conjunction with Transpluto (Geocentric Method)

*Transpluto is a hypothetical planet outside of the orbit of Pluto. Astronomers have been searching for an explanation of Pluto's irregular orbit since Pluto was first discovered, and one of the most popular theories is that there is a 10th planet, one outside of the orbit of Pluto, whose gravitational pull distorts the orbit of Pluto. Several years ago, astrologers seized on this, and generally called the new "planet" Transpluto (because it was beyond the orbit of Pluto).*

*The position of Transpluto is mathematically calculated, and again, the planet is entirely hypothetical: as far as our current knowledge goes, this planet does not exist.*

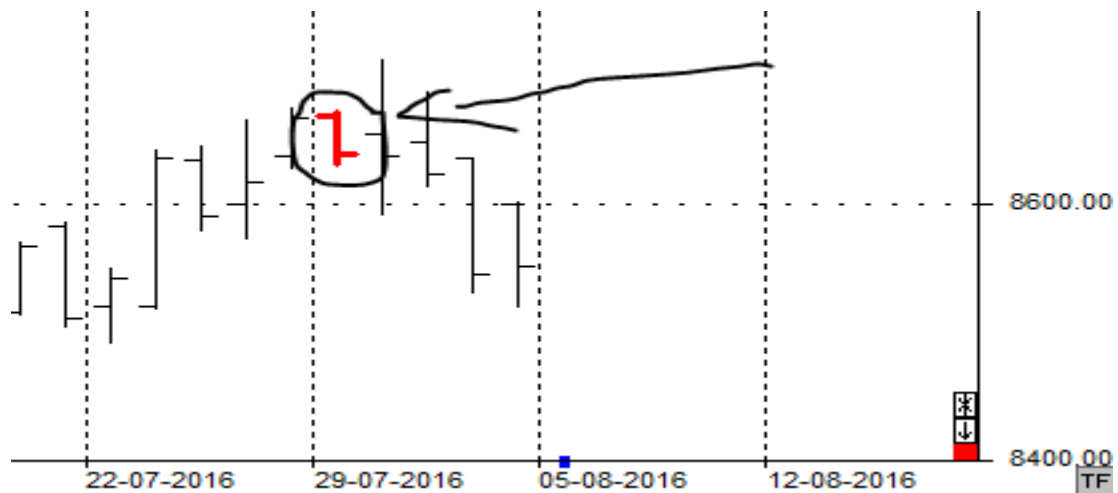

*Because Trans Pluto's theoretical orbit is beyond Pluto's orbit, Transpluto moves extremely slowly—far more slowly than even Pluto—and has been placed in the sign of Leo for decades.*

*Each time a new planet is discovered, the interpretations of the planets change somewhat. Before the discovery of Uranus, Saturn was the planet that oversaw all the “serious stuff” including death, destruction, ruin, etc. With the discovery of each subsequent planet, Saturn began to lose some of its ruler ship; Pluto became the planet that had to do with destruction and death.*

*The prevailing theory about Transpluto was that it would take over some of the “duties” of Pluto; Transpluto would assume all the rebirth and regeneration elements of Pluto, and Pluto would simply become the great destroyer. To know more about Transpluto please follow this url –*

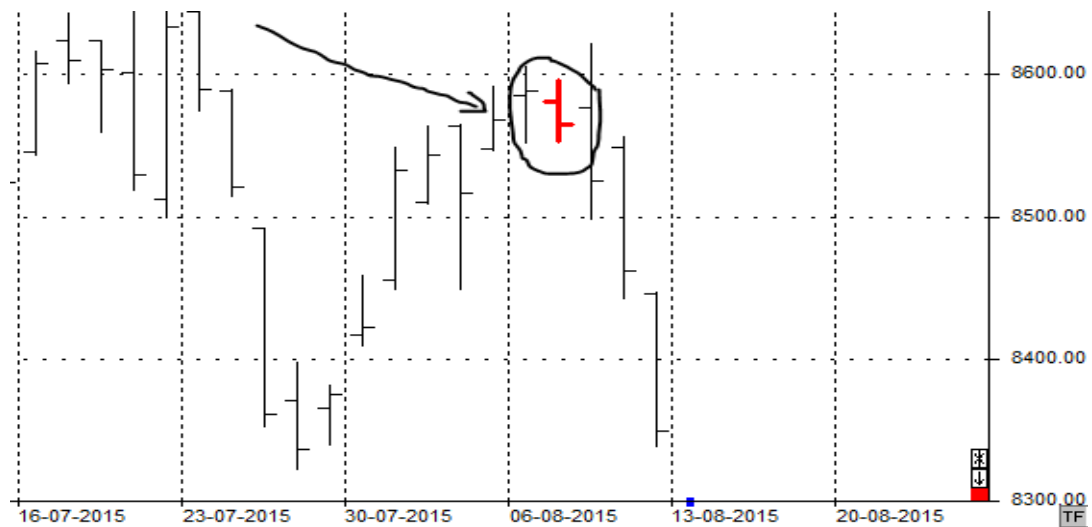

<http://www.lynnkoiner.com/astrology-articles/transpluto-is-real>

When Mercury made a conjunction with TRANSPLUTO, most of the time Nifty's down move rally start for the next 3 days. Please make a note here most of the time not every time.

2016 Nifty's daily chart.

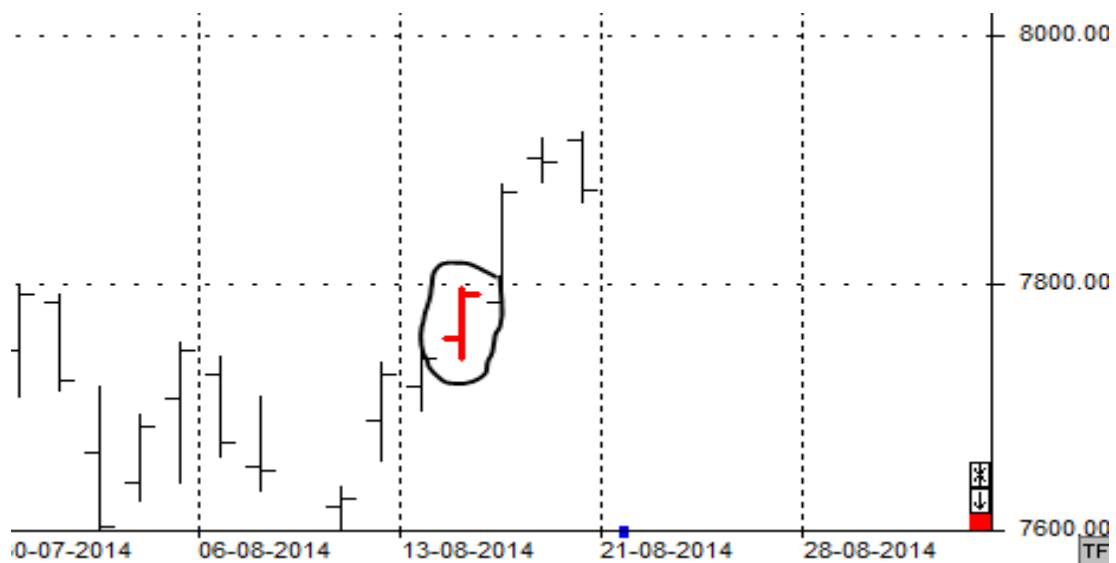

In 2016, we got our desired result and we show 3 day down move rally in Nifty

2015 Nifty's daily chart.

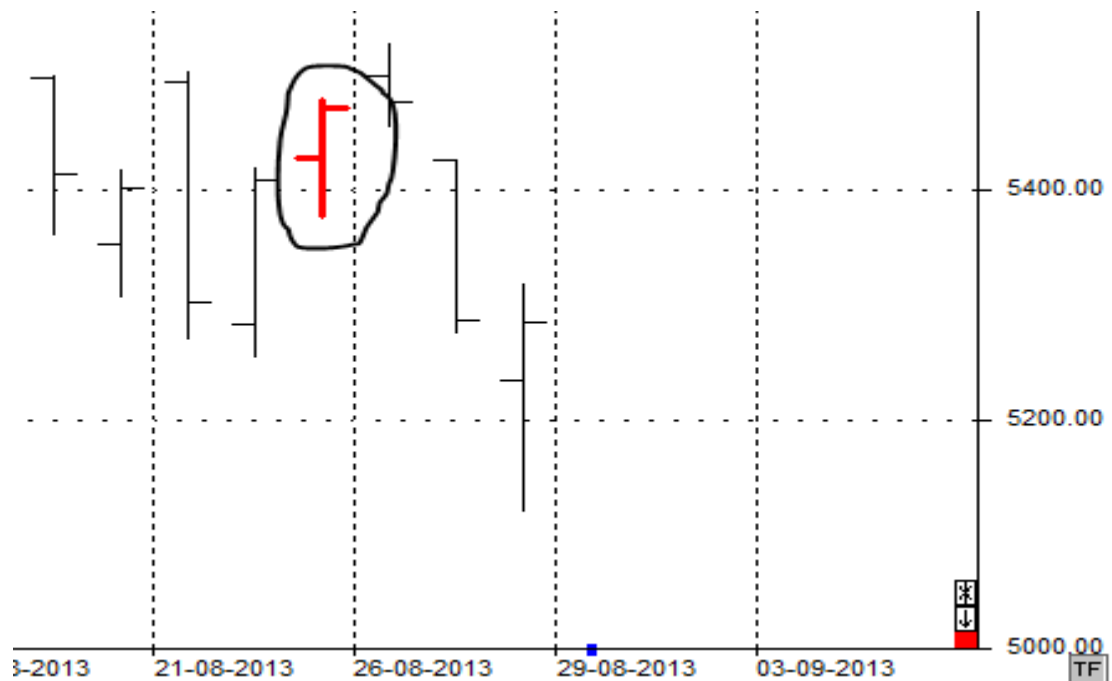

In 2015, we got our desired result and we show 3 day down move rally in Nifty

\*\*\*\*\* You can find all Mercury Transpluto conjunction dates in *Astronomical Ephemeris for Stock Market*.

2014 Nifty's daily chart.

In 2014, we do not get our desired result and we show 2 day up move rally in Nifty.

2013 Nifty's daily chart.

In 2013, we got our desired result and we show 3 day down move rally in Nifty.

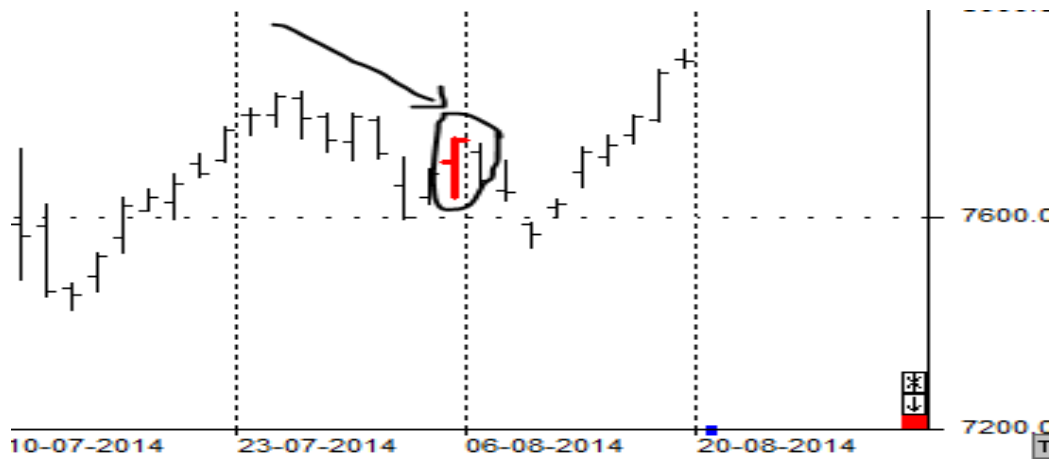

In the past years, we got 70 percent good result from this combination.

### 023. Mercury Conjunction with Jupiter (Heliocentric Method)

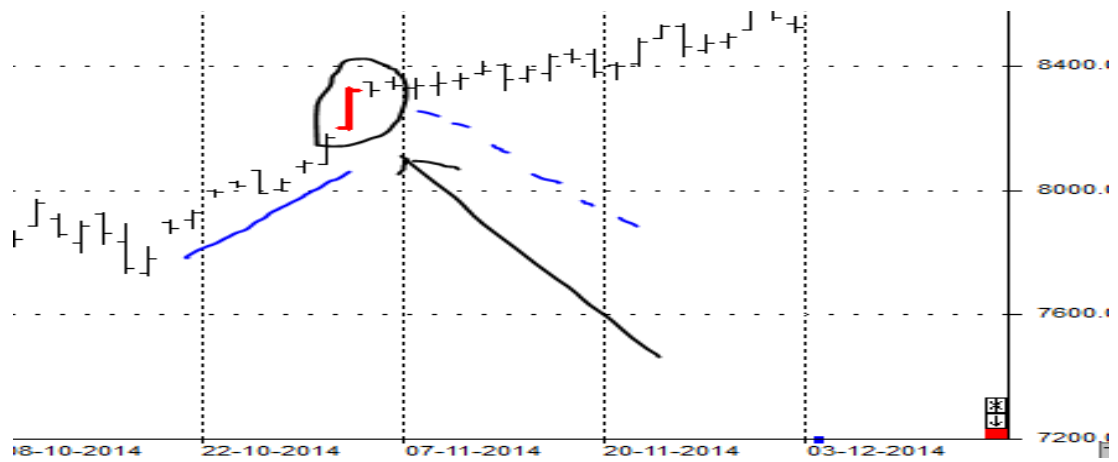

When Mercury made a conjunction with Chiron, most of the time, we got a precious key dates (turning dates).

2014 Nifty's daily chart.

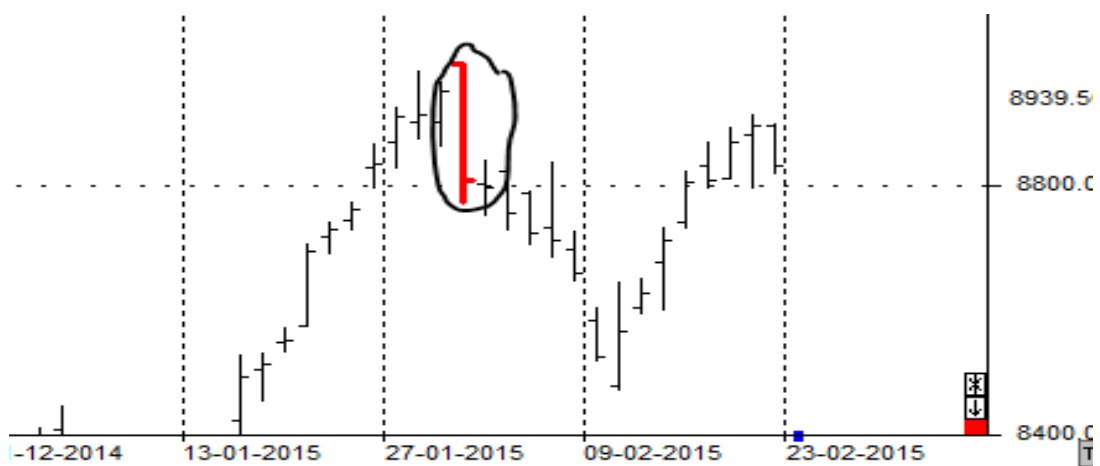

2014 Nifty's daily chart.

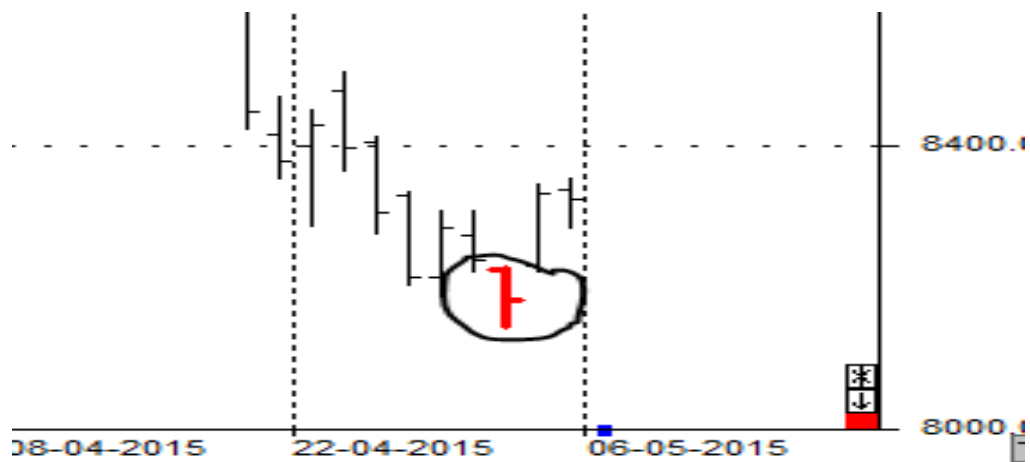

2014 Nifty's daily chart.

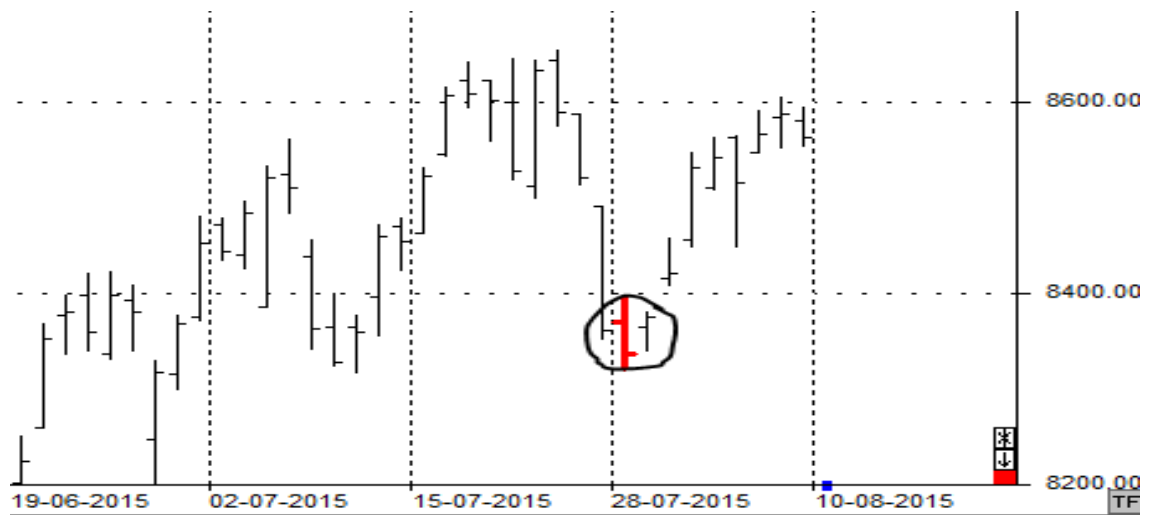

In Nov 2014, we do not get our desired result.

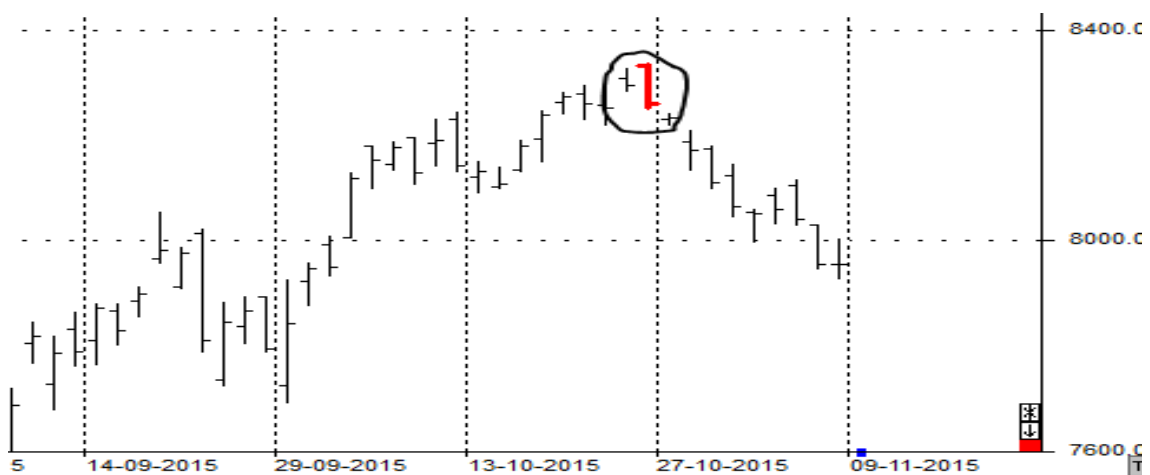

2015 Nifty's daily chart.

2015 Nifty's daily chart.

2015 Nifty's daily chart.

2015 Nifty's daily chart.

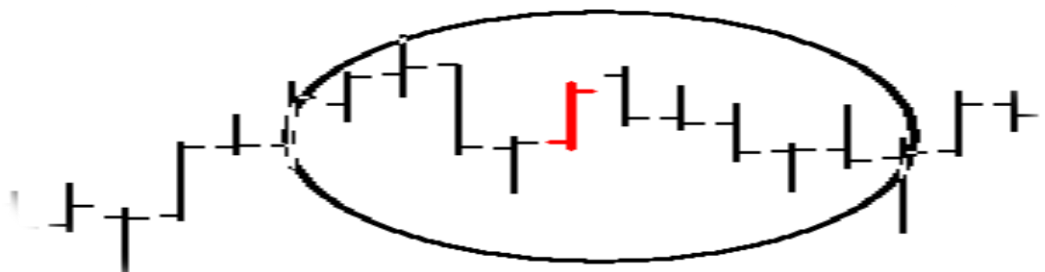

Now I hope you understand why you need this combination. This combination produce to you a key date where you can see a reversal trend in Nifty.

**024. Mercury pass 41° on zodiacal path or pass 11° from the Taurus.**

I got many 3 days down move rally in Nifty, when Mercury pass 41° on zodiacal path or pass 11° from the Taurus. This combination is not so reliable, but I got many good trade by this combination.

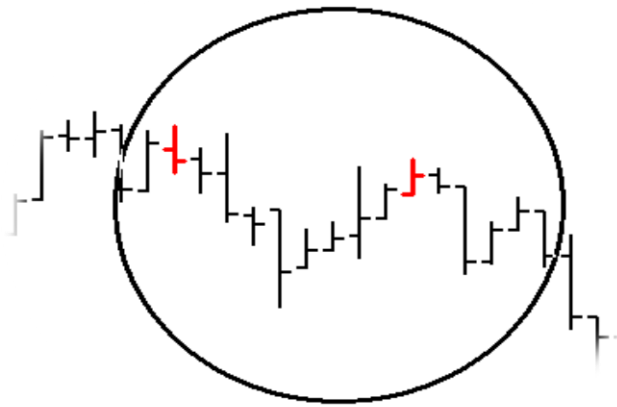

2006 Nifty's daily chart.

2007 Nifty's daily chart.

In 2010 Mercury pass 2 time, 1 in direct motion and 1 in retrograde motion.

2010 Nifty's daily chart.

### **025. Sun – Mercury Conjunction plus 60° in Geocentric Position**

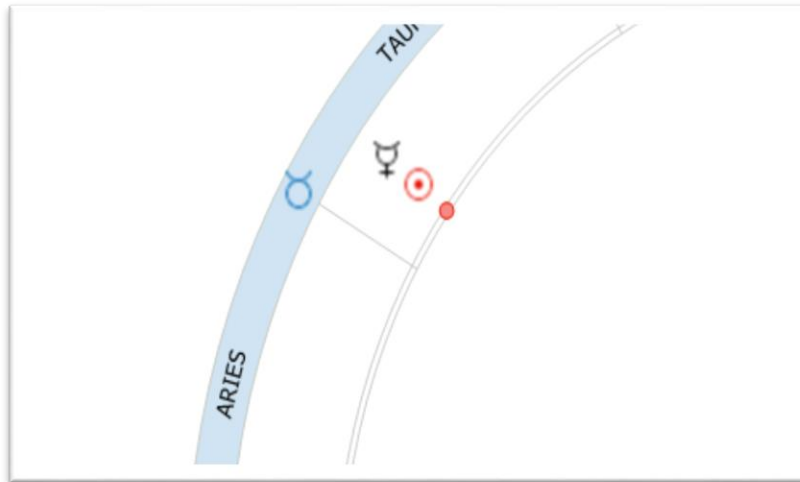

I found this combination in Talaska's book which was written in 1909 for Dow Jones prediction. When I test this combination, mostly time I found incredible results.

According to this combination "We'll get 5 – 7 day really in Nifty"

Conjunctions of the interior planets Mercury and Venus are of two kinds: the superior conjunction and inferior conjunction. When the planet is direct moving as it crosses the Sun and the inferior conjunction at which time the planet is retrograding over the Sun.

In this combination, we take a conjunction of Sun and Mercury whether inferior or superior. However, we have located the day of the conjunction of the conjunction, we should look up the degree of the conjunction on zodiacal path and note down the degree and add additional 60 degree on the paper. And point out that degree on the zodiacal path.

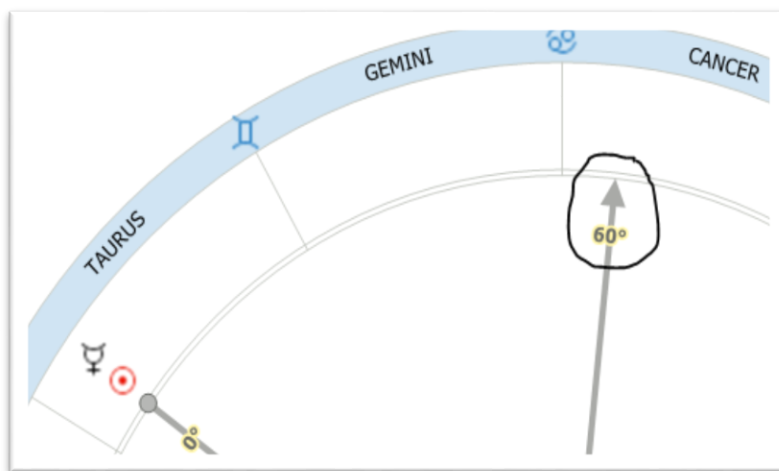

For example – On 26 April 2014 we got one Sun and Mercury conjunction on zodiacal path at 36° or you can say 6° in Taurus sign.

When we add additional 60° in the grabbed degree then we get a new figure.

$$36^{\circ} + 60^{\circ} = 96^{\circ}$$

And when we place this result on the zodiacal path that is here.

Now when we noted the result degree on zodiacal path then we wait and look up when Mercury pass this point.

Mercury pass this point on 19 July 2007.

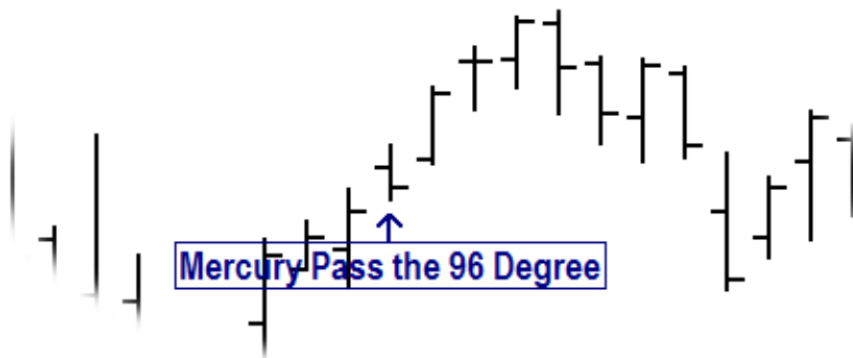

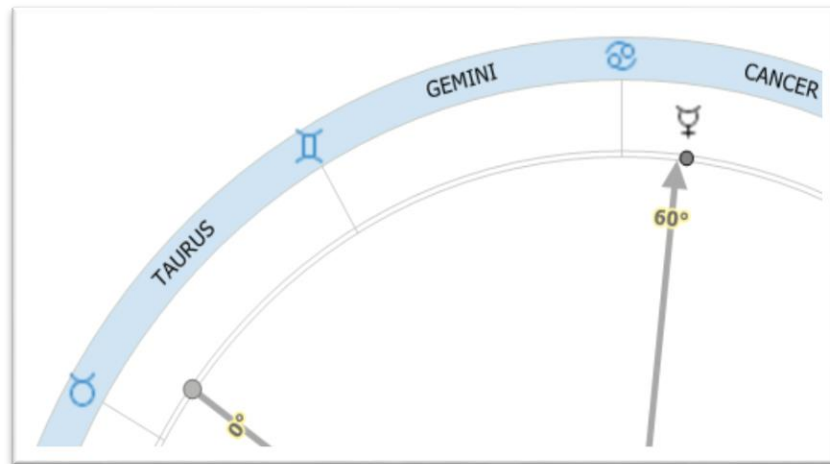

Image 042

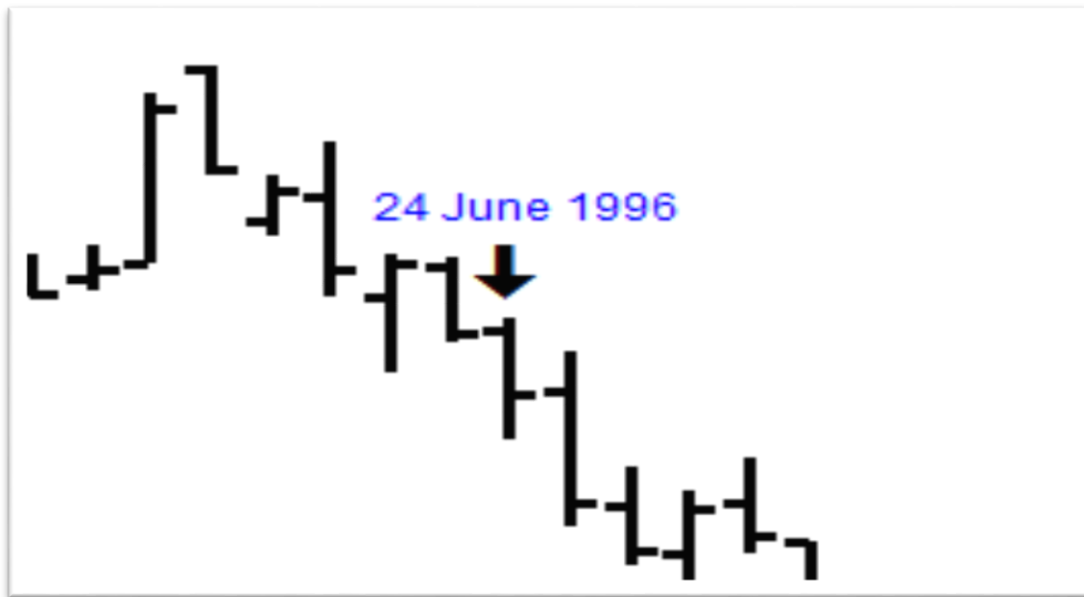

However, we are not interested in this case what happen at the moment of the conjunction and what we get “any result” from the conjunction. This is treated in another combination.

Most of the time I got my desired result, but many time I do not get any result. So, try to place a stop loss.

### 026. Mercury – Venus Conjunction in Gemini

When Mercury made a conjunction with Venus in Gemini sign Nifty slid toward negative very next day. I read this combination in George Bayer’s book. After that when I tried this combination in Nifty I got precious result.

Example 1: On 23 June 1996, Mercury made a conjunction with Venus in Gemini sign, very next day Nifty opened its high mark and slid toward negative.

1996 Nifty's daily chart.

Example 2: On 20 June 2003, Mercury made a conjunction with Venus in Gemini sign, on 21 & 22 June NSE closed but after very next day Nifty negative.

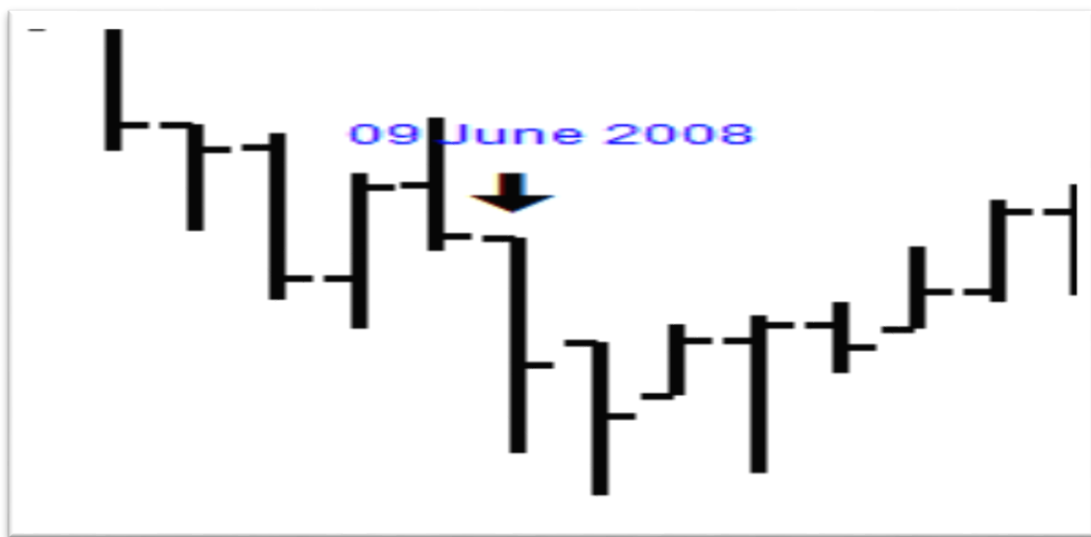

2003 Nifty's daily chart.

Example 3: On 23 June 2004, Mercury made a conjunction with Venus in Gemini sign, very next day Nifty opened its high mark and slid toward negative.

2004 Nifty's daily chart.

Example 4: On 8 June 2008, Mercury made a conjunction with Venus in Gemini sign, very next day Nifty opened its high mark and slid toward negative.

2008 Nifty's daily chart.

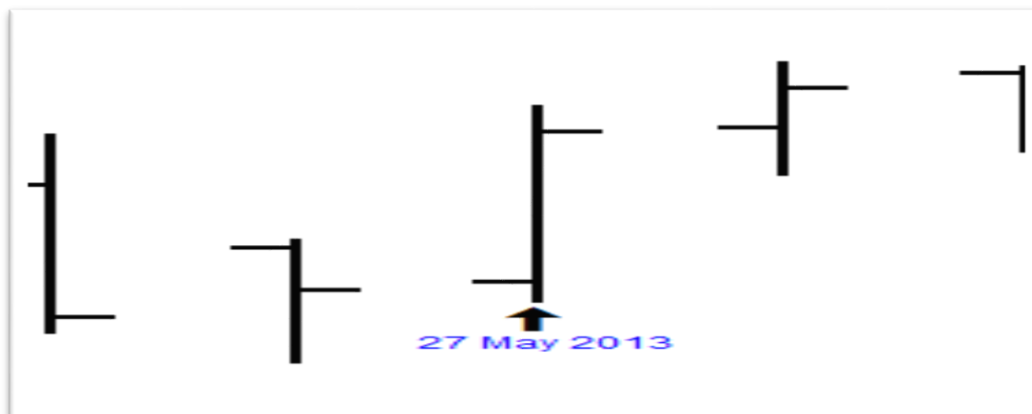

Example 5: On 2 June 2012, Mercury made a conjunction with Venus in Gemini sign, on 3 June NSE closed but after very next day Nifty open with a 50 points negative gap.

2012 Nifty's daily chart.

Example 5: On 24 May 2013, Mercury made a conjunction with Venus in Gemini sign, on 25 & 26 May NSE closed but after very next day Nifty sharply gain. We do not get our desired result. Why?

Because one another strong combination persist here on 27 May 2013. **Pallas** made a conjunction with **Admetos**. You can read about this combination in my other title "NIFTY ASTRO ANALYSIS"

2013 Nifty's daily chart.

*Some ideas of planetary speed usage in financial astrology came from Bayer's book.*

027. "Big tops and big major bottoms are when Mercury's speed in Geocentric longitude is 59 minutes or 1 degree 58 minutes."

028. "Trend goes down within 3 days when the speed difference between Mars and Mercury is 59 minutes."

### 029. Earth transits through Gemini sign (Heliocentric Method)

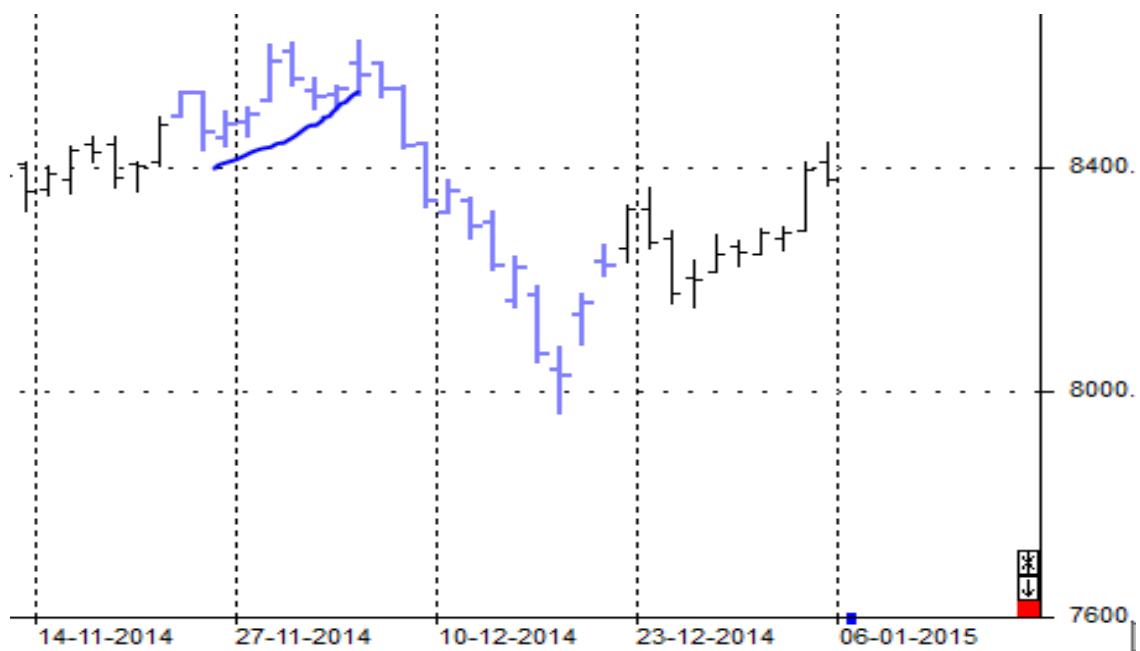

When earth transits through Gemini sign most of the time Nifty face some bullish pressure in the first half.

2012 Nifty's daily chart.

2013 Nifty's daily chart.

2014 Nifty's daily chart.

2015 Nifty's daily chart.

2016 Nifty's daily chart.

### 030. Earth conjunct with Mercury (Heliocentric Method)

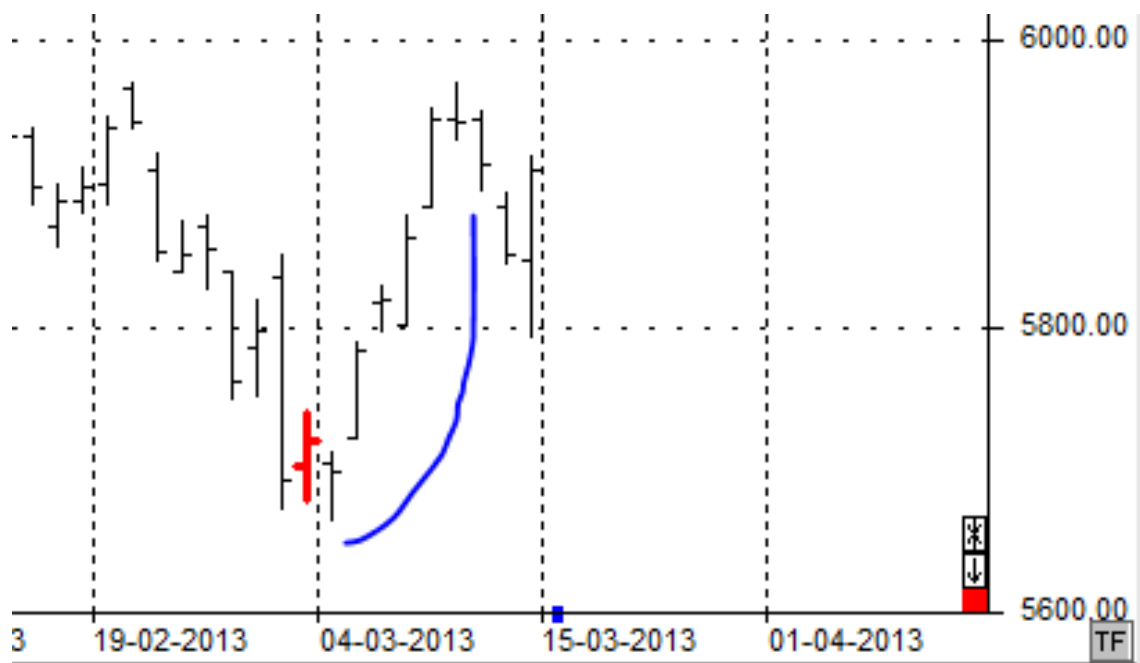

When Earth conjunct with Mercury, most of the time Nifty try to make a positive rally. In the past I got 76.3 percent accurate result between 2000 – 2016.

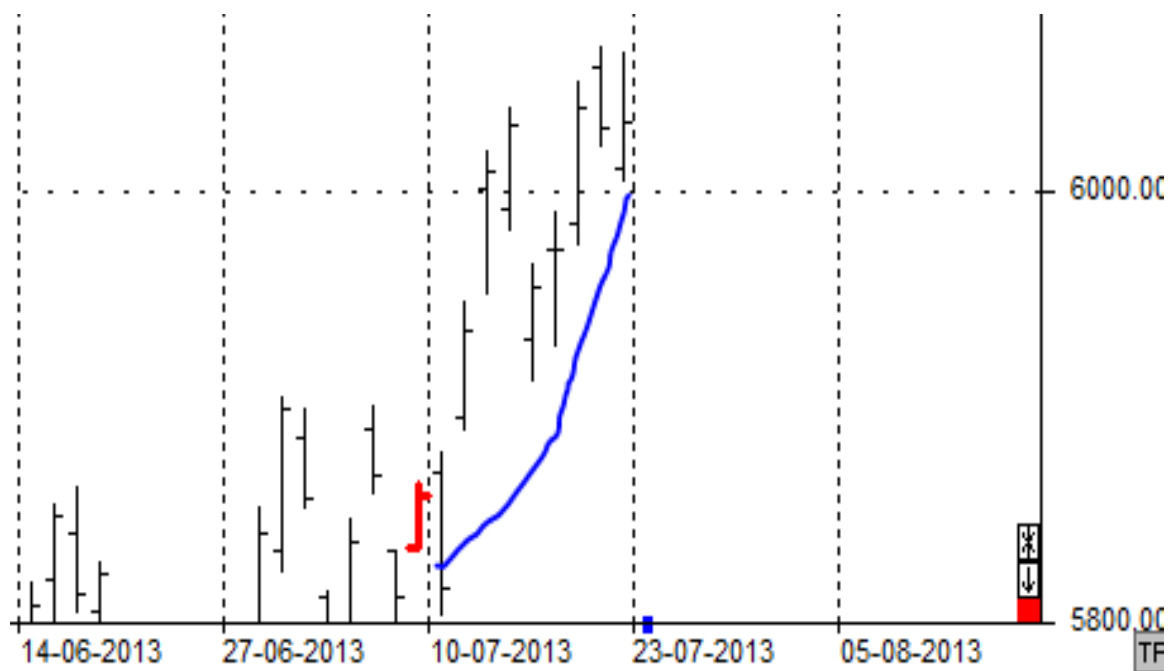

2012 Nifty's daily chart.

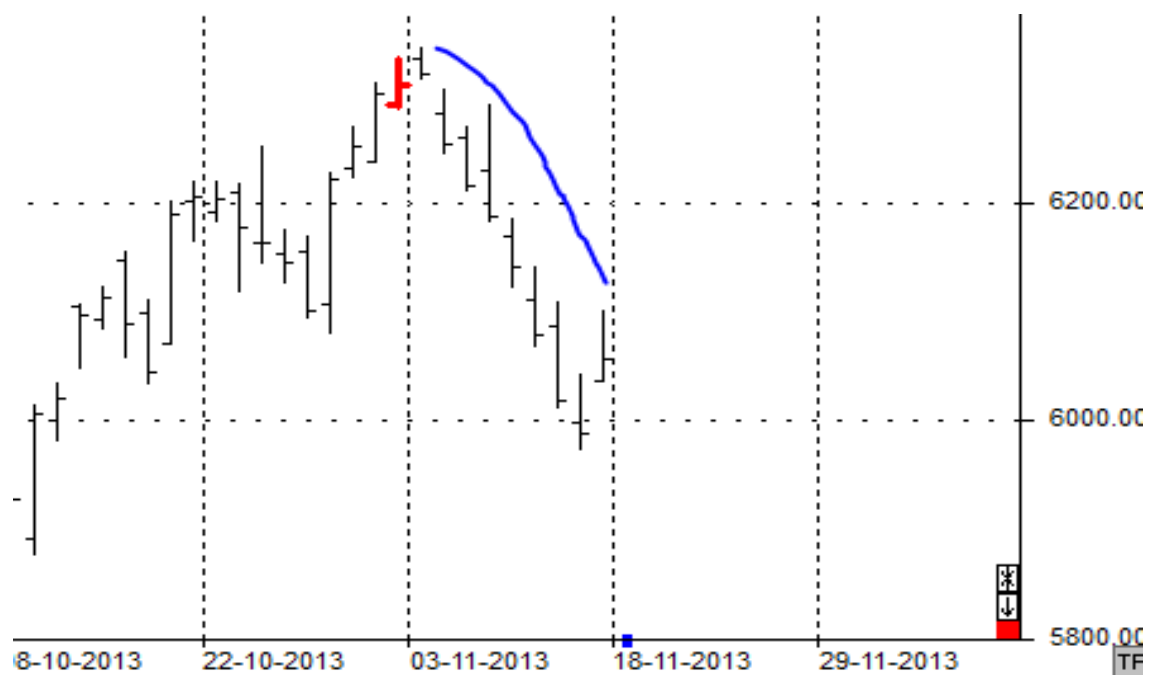

2012 Nifty's daily chart.

2013 Nifty's daily chart.

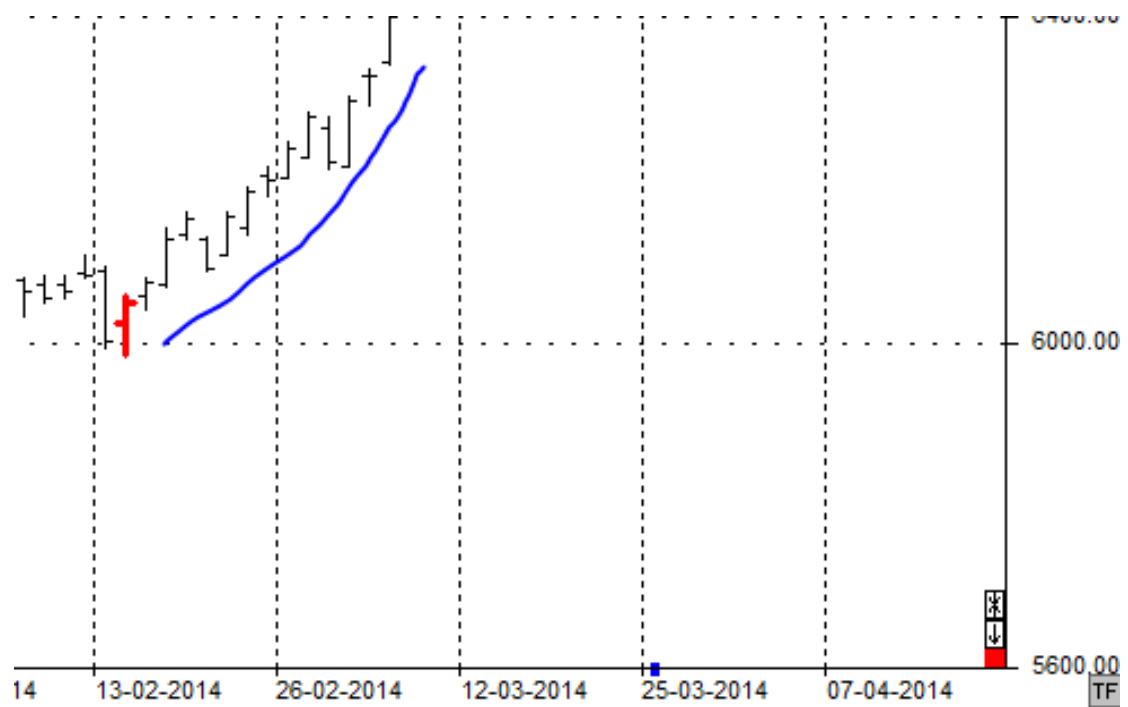

2013 Nifty's daily chart.

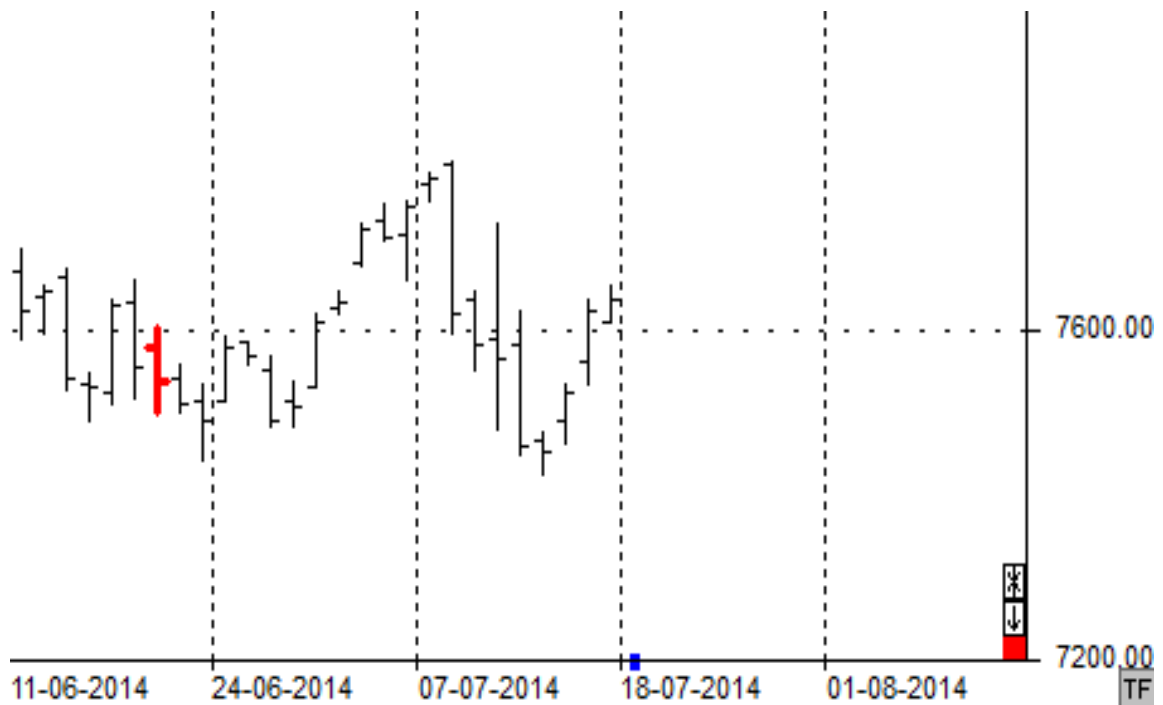

2013 Nifty's daily chart.

Here we do not get a desired result.

2014 Nifty's daily chart.

2014 Nifty's daily chart.

2014 Nifty's daily chart.

In 2015, Earth made conjunct aspect with Mercury 4 time and we got only one desired result. Three times we got wrong result.

In 2016, Earth made conjunct aspect with Mercury 4 time and we got three time our desired result.

### 031. Earth conjunct with Jupiter (Heliocentric Method)

Not so reliable combination, but this combination produces many good Key dates. Even I want to tell you here, in the past I got only 50 – 50 results from this combination. But I made money. Do you know how?

I created a strategy for this combination. Please keep your warm eye on my strategy here.

First I always note the “Key date” which was generated by this combination. After that I look the previous trend before this date. If market went positive mode around 14 – 7 days before this key date then I try to make a short after this date below the low of the date.

i.e.

Example 1: Please keep your eye on the picture, which is available on the next page. In 2010 I got one Key date which was generated by this combination; I noted the previous trend is completely positive. So, I think the coming trend will

be negative after this key date. On 20 Sep 2010, Earth made a conjunction with Jupiter on zodiacal path (Heliocentric Method) On 20 Sep Nifty's low was 5885. So, I tried to make a short below this mark but Nifty not breach my trigger level. So, I do not make any trade that time.

2010 Nifty's daily chart.

Example 2: In 2011, I got one Key date which was generated by this combination; I noted the previous trend is completely positive. So, I think the coming trend will be negative after this key date. On 28 Oct 2011, Earth made a conjunction with Jupiter on zodiacal path (Heliocentric Method) On 28 Oct Nifty's low was 5322. So, I tried to make a short below this mark and the very next day Nifty breach my trigger level and I make a sell position.

2011 Nifty's daily chart.

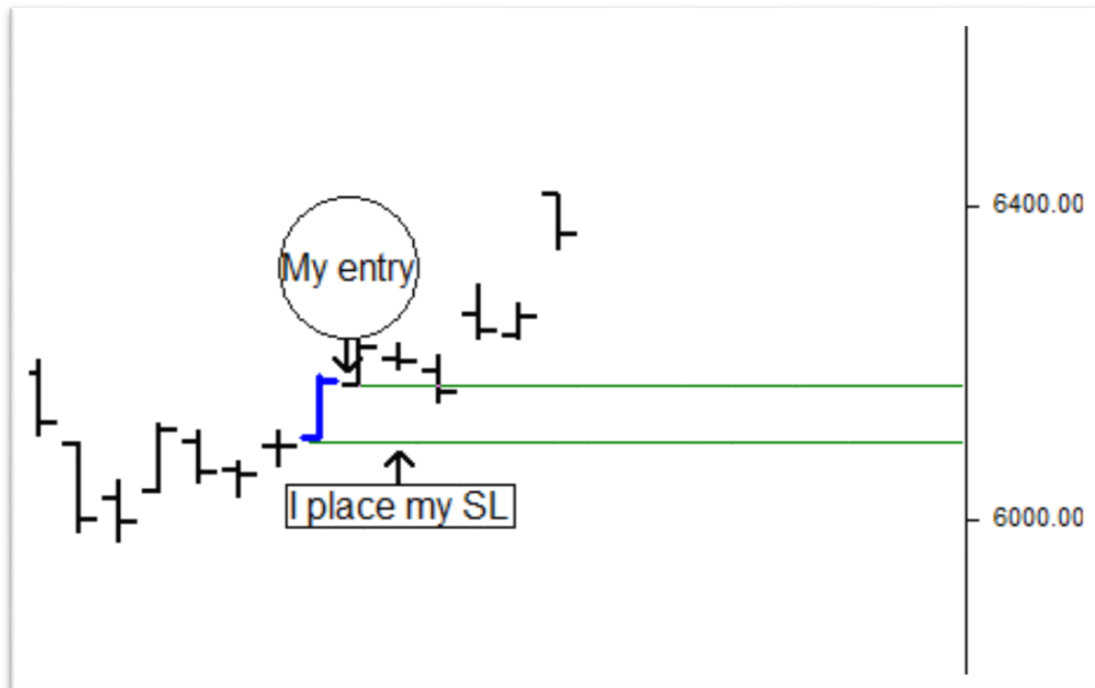

### 032. Earth pass 67° (Heliocentric) on zodiacal path

When earth pass 66° (Heliocentric) on zodiacal path, most of the time Nifty try to make a bullish sentiment.

Example: I made many trade on this combination, here I present my last trade explanation –

Earth pass 66° (Heliocentric) on zodiacal path on 29 Nov 2013. On that we do not get any other important astro combination.

So, I decided to make a positive position in Nifty. Very next day (02 Dec 2013) made a positive position in Nifty at the opening price.

I place many successful trades on this combination, but always remember here, if you get another combination on particular day than don't make trade on this combination.

### **According astrology zodiacal sign divided into 4 different classifications**

Fiery, Earthy, Airy and Watery

Fire signs (The Inspirational and Physically Active Group) Aries, Leo and Sagittarius

Earth signs (The Practical and Productive Group) Taurus, Virgo and Capricorn

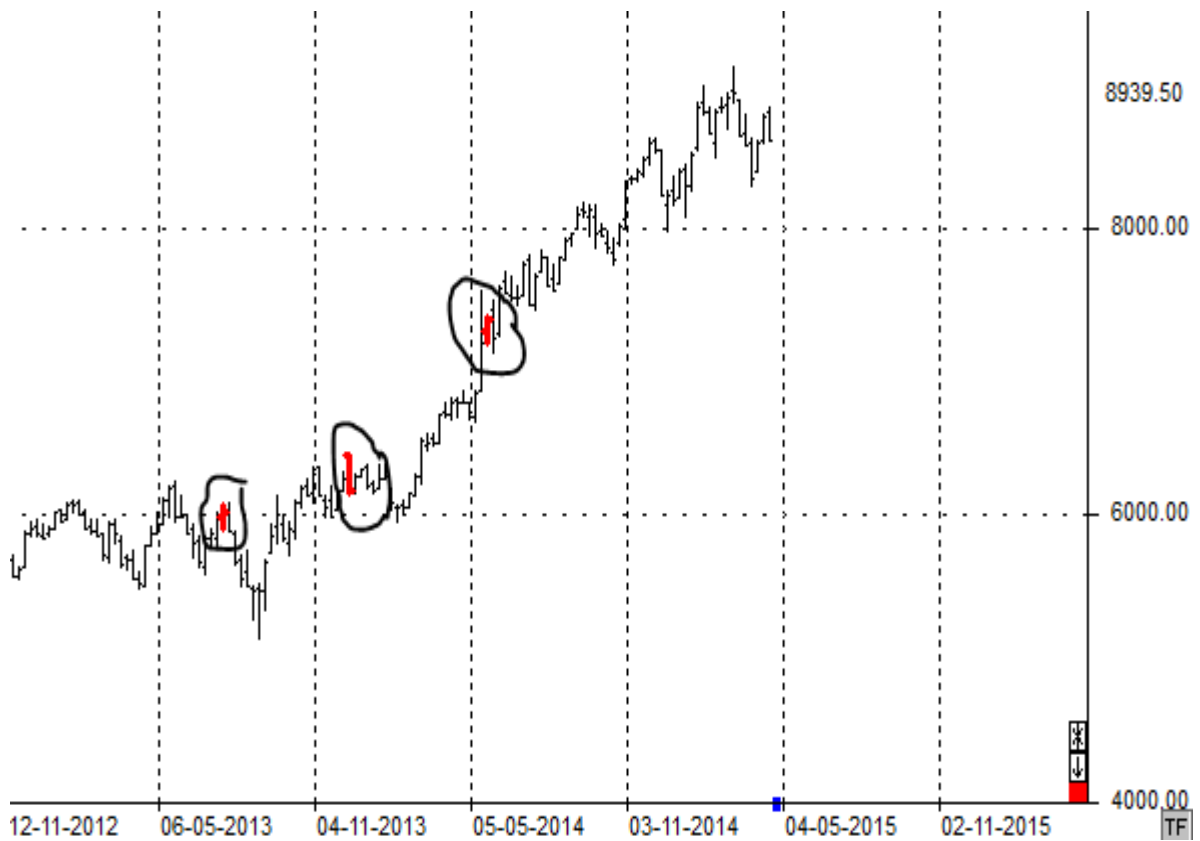

Air signs (The Mental and Socially Oriented Group) Gemini, Libra and Aquarius

Water signs (The Emotional and Family Oriented Group) Cancer, Scorpio, and Pisces.

These combinations are very important to those Investor who want to invest in the Stock Market for a long run. I analyse this combination on DJIA because we have no enough date to practises on Nifty.

But I got precious result on Nifty. As I already told you we are doing our entire work here on Sayana System. So, you need to explore all combination on Sayana System.

**033. When Jupiter made a Trine aspect with Saturn in Watery sign, Nifty's always try to make a new height with doubtable bounds.**

2012 – 2013 Nifty's Weekly Chart

In 2013, we got this combination in 2013 & 2014. Every time we got a doubt and some new highs.

**034. When Jupiter made a Trine aspect with Saturn in Fiery sign, Nifty's always try to make a new height.**

2007 Nifty's Weekly Chart

In 2007, we got this combination and we got a precious result. Many astrologer make their own not on these combinations (033, 034 & 035) but due to the insufficient data no one verify these combinations.

**035. When Jupiter made a Trine aspect with Saturn in Earthy sign, Nifty face a corrective wave.**

2008 Nifty's Weekly Chart

In 2007, we got this combination and we got a precious result.

*You need to check these combinations on DJIA data before act on this combination. Because only DJIA have a sufficient data for this purpose.*

### **036. Jupiter Trine Pluto**

I found this combination in very old American script (Astrology & Market: Written by -J.S. Pluera / Published in 1939) and in 2011 I tried this combination very first time in Indian market. I got precious result from this combination. In 2011& 2012 I got 3-time this combination and made 3-time money from this combination but in 2016 I got 3-time this combination and 1 time loss and 2-time no trade.

*According to the script – When Jupiter made a trine aspect with Pluto. Leading industries face some deep weakness for the rest next two months.*

2011 Nifty's daily chart.

2011 Nifty's Chart

2012 Nifty's Chart

### 037. Jupiter Quadrature Mars

I found this combination in very old American script (Astrology & Market: Written by -J.S. Pluera / Published in 1939). According to the script **When Jupiter made a Quadrature aspect with Mars leading industry's price move one side** (Bullish or Bearish anyone).

Nifty's trader can use this combination on 1 hour chart mix with leading indicator MACD. If trader gets a bearish sign on MACD after aspect they can go to the down move and if they get a bullish sign on MACD then they can try to make a positive position. I use this combination in Nifty many times.

### 038. Solar Radio flux –

The term "radio flux" is used to describe a solar rhythm that can be forecast as much as 27 days in advance. **When the solar radio flux index rises above 50. There is increase market activity.** This is valuable advance information for the frequent or daily trader. Such information can be found at

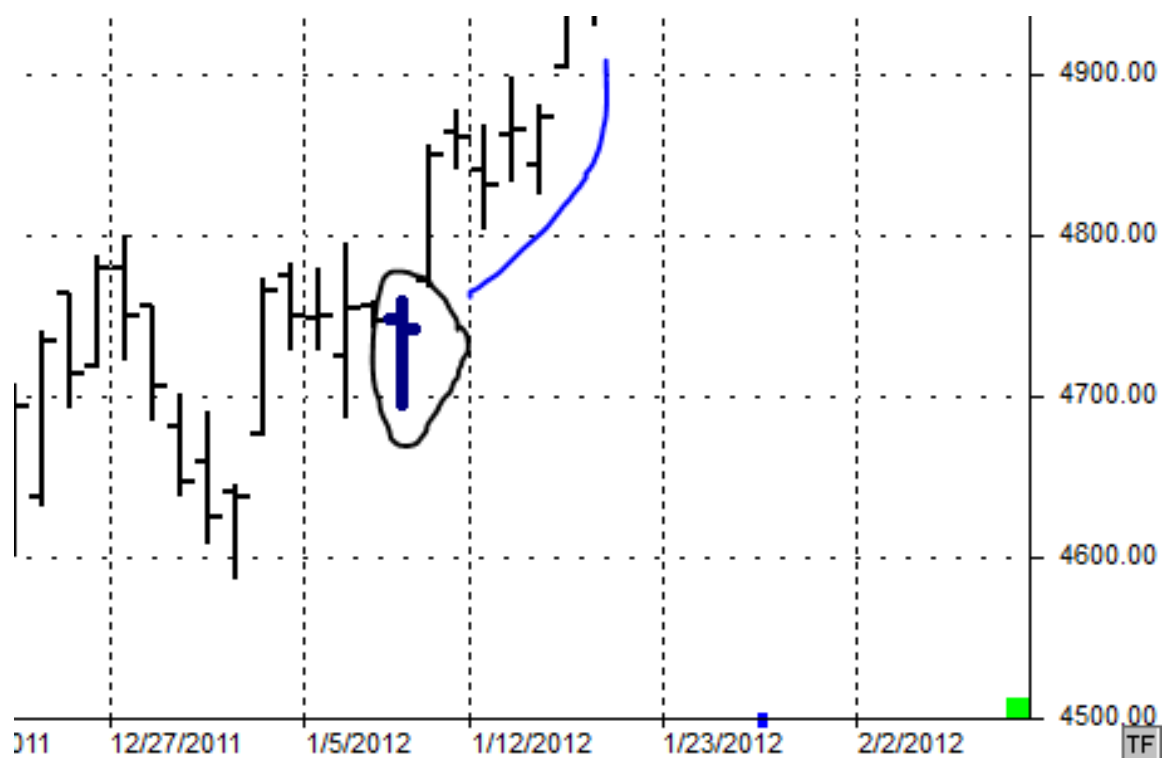

[www.spaceweather.com](http://www.spaceweather.com).

**039. A report was commissioned by a major London bank that utilized lunar trading techniques about the UK's FTSE index. This was an interesting report in that it considered various trading options. It compared purchase and sale at various stages of the soli-lunar cycle. The report demonstrated that had £10001 been invested in the FTSE in 1984.**

**The investor who simply held position would have seen growth to 4130 over a set period. It compared this to the £12,116 that would have been earned had the investor bought at each New Moon and sold at the Full Moon. I have no research work for Nifty for this combination. But in past I show many good returns in set of bunches.**

### 040. When Mercury pass 271° on zodiacal path (Geocentric Method)

Every year Mercury pass 271° on zodiacal path, 271° is the same exact point 1° in Capricorn. This point is a very important point for Nifty traders. Most of the time when Mercury pass this point we can see a 3-day rally in Nifty.

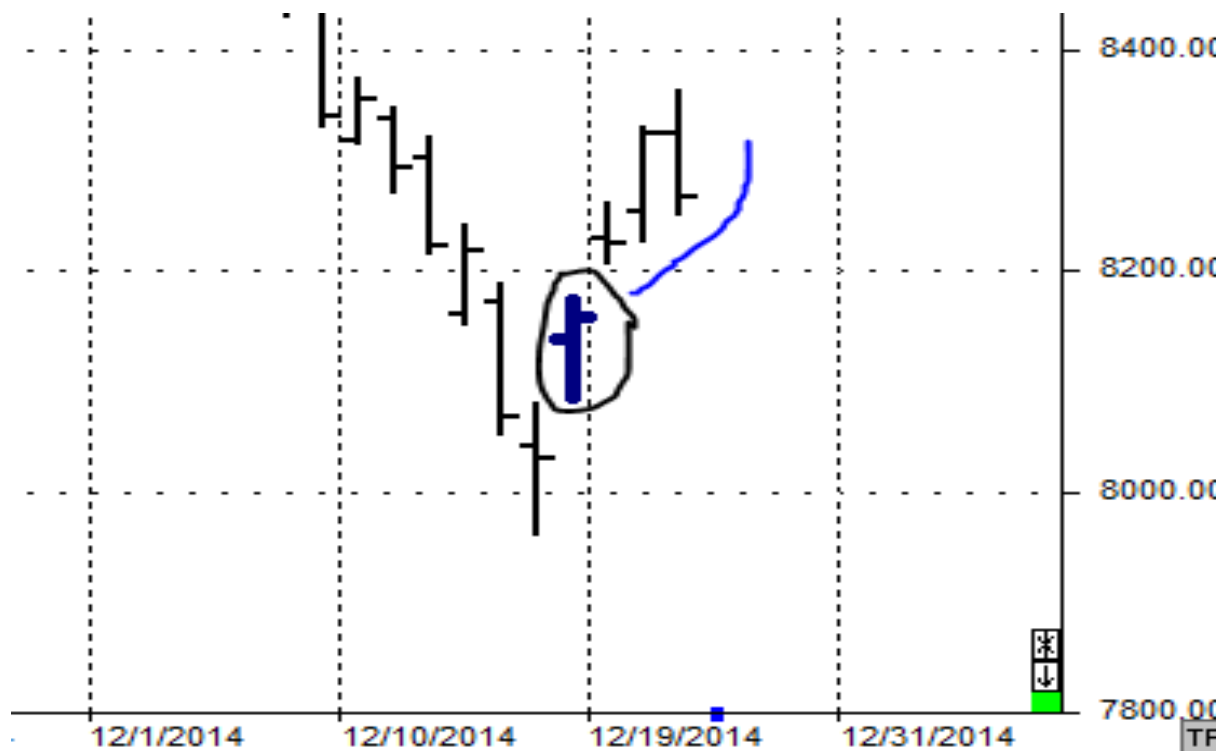

2012 Nifty's daily chart.

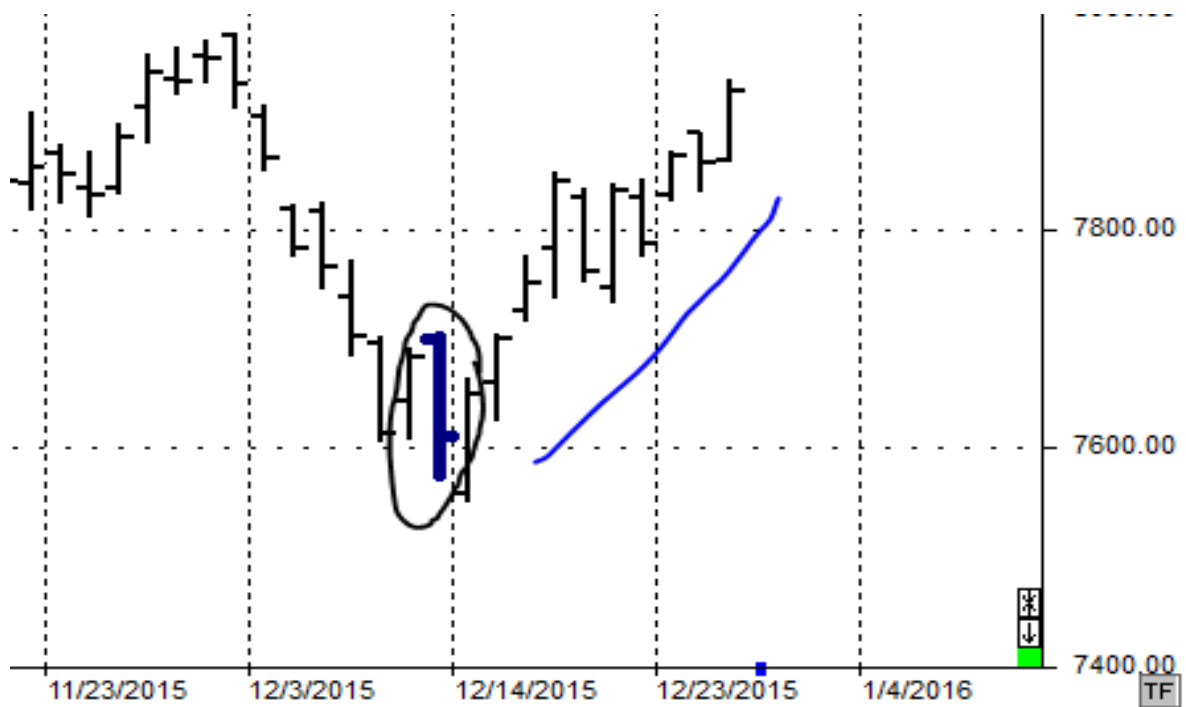

2013 Nifty's daily chart.

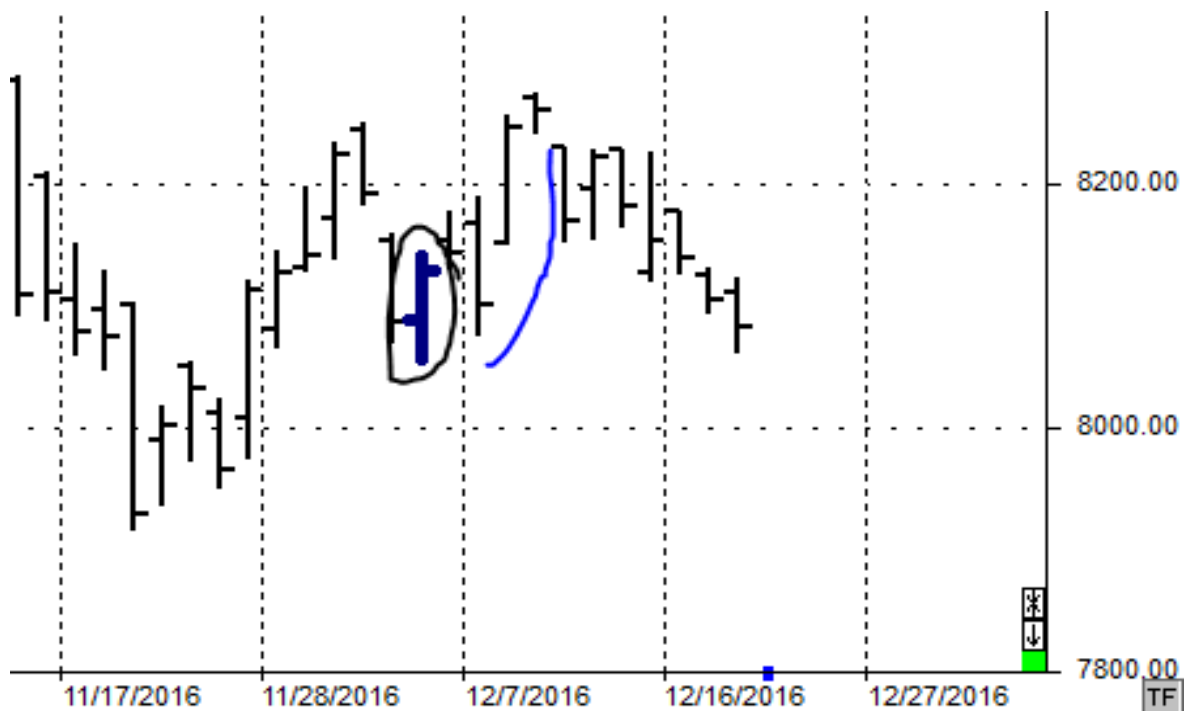

2013 Nifty's daily chart.

2014 Nifty's daily chart.

2015 Nifty's daily chart.

2016 Nifty's daily chart.

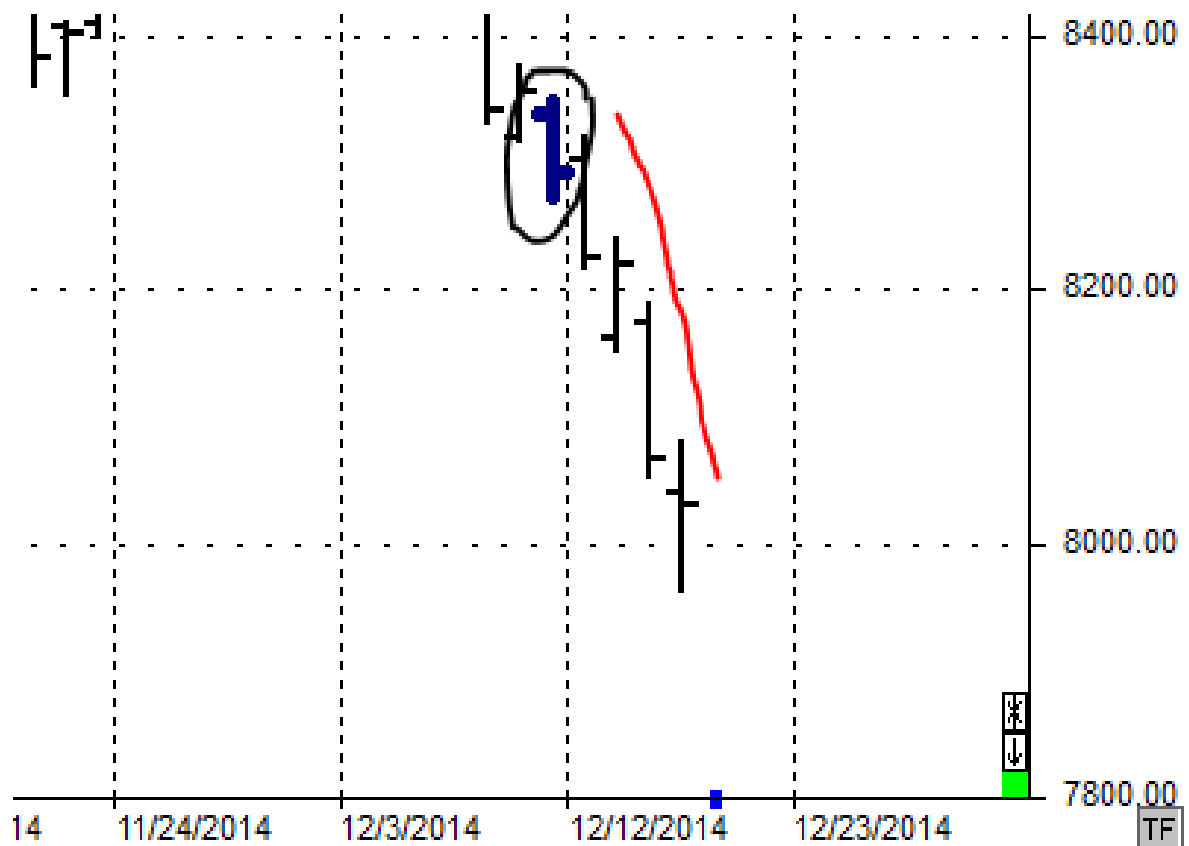

In the past, I got many time this combination and I got every time a good response.

#### 041. When Venus pass 271° on zodiacal path (Geocentric Method)

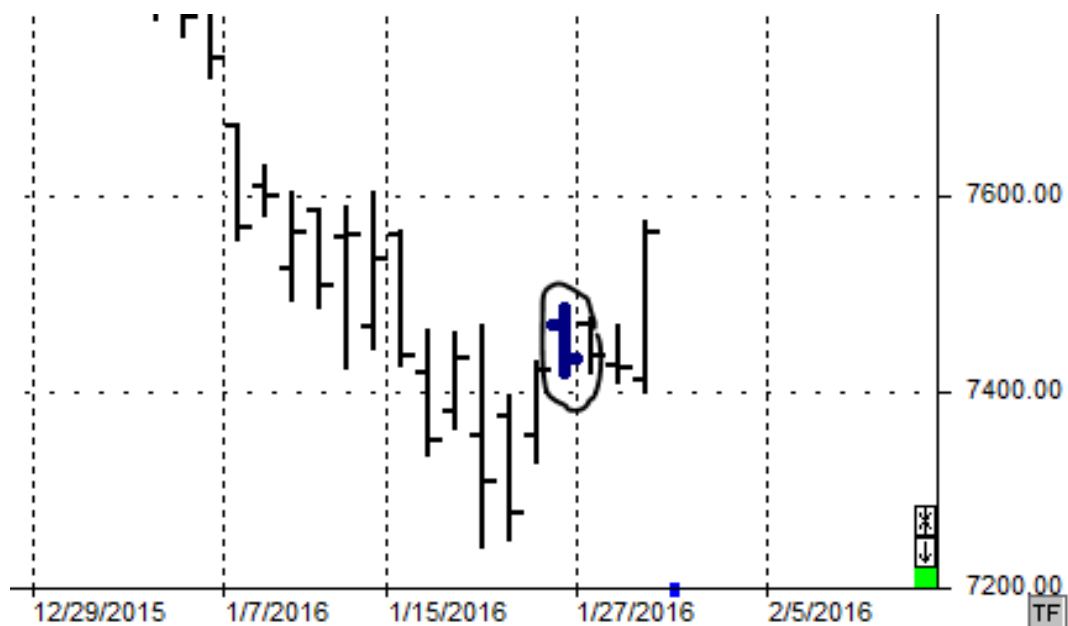

Every year Venus pass 271° on zodiacal path, 271° is the same exact point 1° in Capricorn. This point is a very important point for Nifty traders. **Most of the time** when Venus pass this point we can see a 2 - 7 day down move in Nifty.

In the past I got many satisfactory results from this combination, but not every time. Overall performance is 73 percent.

In 2014, when I got this combination I got very precious result. But In 2016, when I got this combination I do not get my desired result. Even I got many precious results in the past on paper.

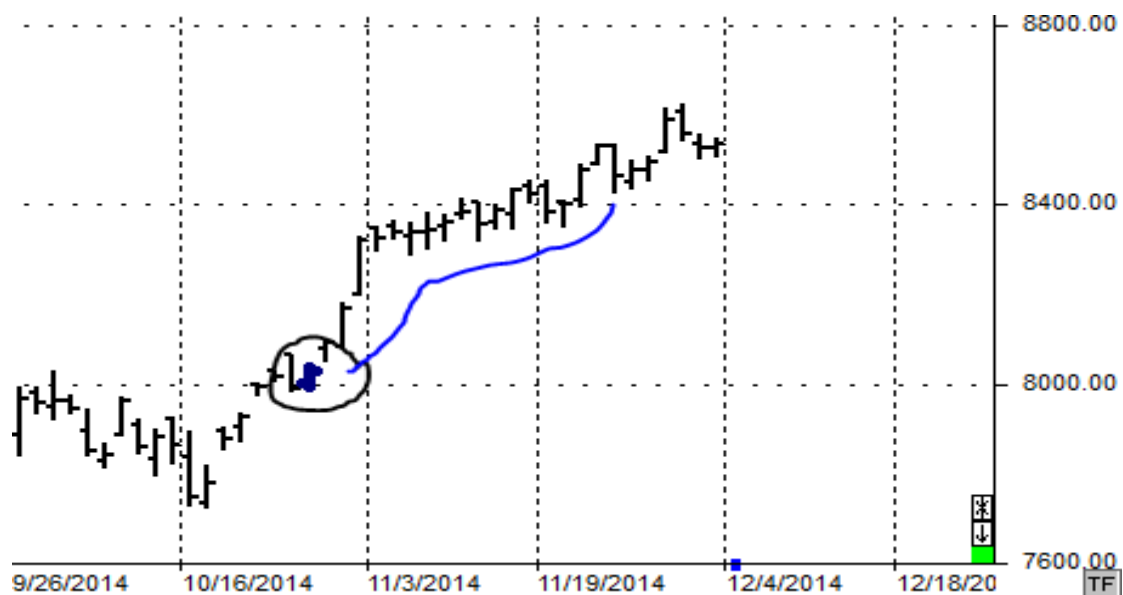

2014 Nifty's daily chart.

2016 Nifty's daily chart.

#### 042. When Mars pass $271^\circ$ on zodiacal path (Geocentric Method)

Every year Mars pass  $271^\circ$  on zodiacal path,  $271^\circ$  is the same exact point  $1''$  in Capricorn. This point is a very important point for Nifty traders. Most of the time when Mars pass this point we can see a 3– 5-day rally in Nifty.

2014 Nifty's daily chart.

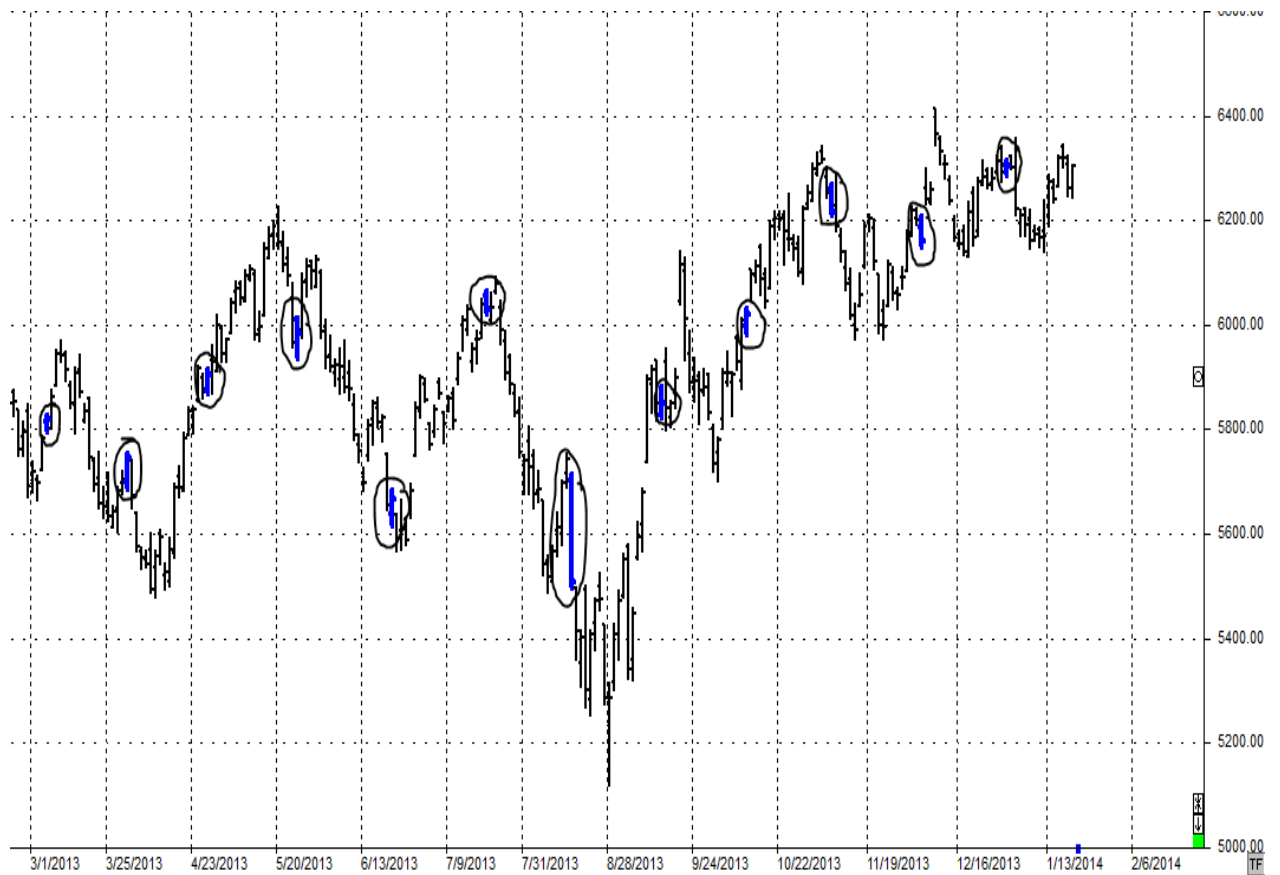

2016 Nifty's daily chart.

#### 043. Mars Opposition T. Node (Rahu)

I found this combination in very old American script (Astrology & Market: Written by -J.S. Pluera / Published in 1939). According to the script **When Mars made an Opposition aspect with T. Node leading industry's price move one side (Bullish or Bearish anyone). Most of the time Nifty try to make a bearish sentiment.**

Nifty's trader can use this combination on 1 hour chart mix with leading indicator MACD. If trader gets a bearish sign on MACD after aspect they can go to the down move and if they get a bullish sign on MACD then they can try to make a positive position. I use this combination in Nifty many times.

**044. Moon & Pluto Conjunction is also a great conjunction to get a Key Date for Nifty's trading.**

2013 Nifty's daily chart.

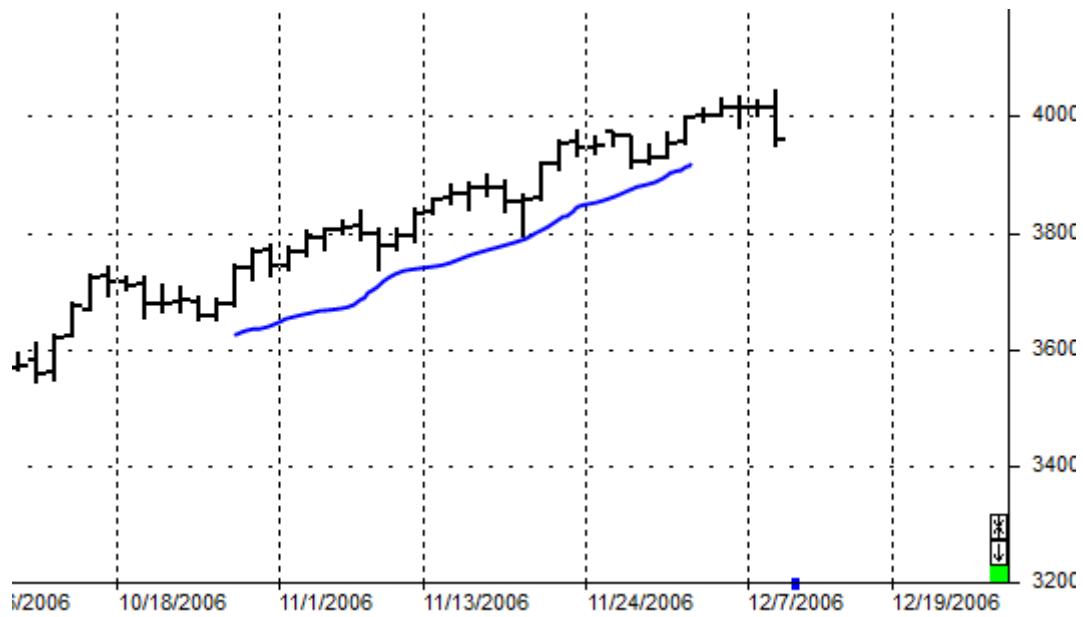

In the past, we got many great Key dates for Nifty by this combination.

#### 045.Mars Trine Neptune

I found this combination in very old American script (Astrology & Market: Written by -J.S. Pluera / Published in 1939). According to the script **When Mars made Trine aspect with Neptune leading industry's price move one side** (Bullish or Bearish anyone).

Nifty's trader can use this combination on 1 hour chart mix with leading indicator MACD. If trader gets a bearish sign on MACD after aspect they can go to the down move and if they get a bullish sign on MACD then they can try to make a positive position. I use this combination in Nifty many times.

**046. When many planets are in bullish zodiac signs (Taurus, Cancer, Scorpio and Pisces), this astro combination produce a great positive activity in Nifty. The volume of business broadens and prices of shares appreciate all around.**

2016 Nifty's daily chart.

On 25 Oct 2006, Sun, Mars, Venus enter in Scorpio sign and Jupiter & Mercury already there after that Nifty made a sharp gain.

**047. When the planets, in bullish signs, receive favourable aspects like Sextile, Trine etc., of the other planets, the rise in prices of shares is pronounced. But if they receive unfavourable aspects of other planets like Semi-square of Square etc., the rise in prices is halted and there is little rise in values of shares. Therefore always take care of that.**

I found this combination in Butaney's book.

**048. When many planets are in bullish zodiac signs with a Pluto (Taurus, Cancer, Scorpio and Pisces) there is a great negative activity in Nifty.**

I found this combination in Butaney's book.

**049. When Jupiter transits Cancer, Scorpio and Pisces and specially during that year when Sun, Moon, Mercury, Venus and Mars transit the above zodiacal signs making either conjunction with Jupiter or having Trine aspect of Jupiter Nifty try to enter in bullish mode.**

I found this combination in Butaney's book.

**050. When Mercury, Venus and Mars happen to retrograde in Cancer, Scorpio and Pisces signs and either keep company with Jupiter, it indicates an extended period of bullishness in Nifty.**

I found this combination in Butaney's book.

**051. Apart from Jupiter, even when Saturn transits Cancer. Scorpio and Pisces and the other planets join Saturn in the above signs. Shares rise in values overall with good falls on many occasions when they come close in longitudinal degree. When Mars joins Saturn in the above sign there is a positivity activity in the Nifty, and prices of Shares rise. But when they come close in the longitudinal degree, tops curvy conditions prevail in Share values for some days. Then again prices rise. If Mars happens to retrograde in these signs and keeps company with Saturn in the above zodiacal signs, it spells an extended period of bullishness in the Share market.**

I found this combination in Butaney's book.

**052. When the majority of the planets transit the barren sign (i.e. Aries, Gemini, Leo, Libra & Aquarius) this astro combination produce a great negative activity in Nifty.**

I found this combination in Butaney's book.

**053. When the majority of the planets transit the barren sign (i.e. Aries, Gemini, Leo, Libra & Aquarius) & they receive favourable aspect like Trine, Sextile from other planets, then this astro combination produce minor fall in Nifty.**

I found this combination in Butaney's book.

**054. When the majority of the planets transit the barren sign (i.e. Aries, Gemini, Leo, Libra & Aquarius) & they receive non favourable aspect like Trine, Sextile from other planets, then this astro combination produce major fall in Nifty.**

I found this combination in Butaney's book.

**055. When Jupiter and Saturn transit either Aries or Gemini or Leo or Libra or Aquarius, this astro combination produce a negative impact on Nifty.**

I found this combination in Butaney's book.

**056. When Jupiter and Saturn transit either Aries or Gemini or Leo or Libra or Aquarius, and during that period whenever Sun, Moon, Mercury, Venus and Mars either join them in the above zodiacal signs or oppose them from the opposite zodiacal signs, then this astro combination produce major negative impact on Nifty. (I found this combination in Butaney's book.)**

**057. When Jupiter and Saturn transit either Aries or Gemini or Leo or Libra or Aquarius, and during that period whenever Sun, Moon, Mercury, Venus and Mars either join them in the above zodiacal signs or oppose them from the opposite zodiacal signs, and if they happen to retrograde in the above signs and keep company with either Jupiter or Saturn in the above signs or oppose them from the opposite zodiacal signs, then this astro combination produce major negative impact on Nifty.**

I found this combination in Butaney's book.

**057. If both Jupiter and Saturn are in barren, it is best to short sell and do it all temporary rises due to the transits of the Sun, Mercury, Venus and Mars in fruitful (Taurus, Cancer, Scorpio, Sagittarius & Pisces) sign.**

I found this astro combination in Partho Ghose's Astrology for Stock Market (Published in 2003).  
I never use this astro combination in my trading.

**058. If Jupiter is in Fruitful I.e. Bullish zodiacal sign and Saturn is in Barren I.e. Bearish zodiacal sign, during that year, there will be bouts of bullishness and bearishness in leading Shares values mainly dependent on the transits of the Sun. the Moon. Mercury, Venus and Mars in Fruitful or Barren zodiacal signs.**

I found this astro combination in Partho Ghose's Astrology for Stock Market (Published in 2003).  
I never use this astro combination in my trading.

**059. Whenever Jupiter and Saturn transit Barren I.e. Bearish zodiacal signs at one time, and the other planets oppose them from the opposite zodiacal signs during their transits. there is good depression in share values. But if they happen to retrograde in them and specially if Mars happens to retrograde in them opposing Jupiter and Saturn, it spells an extended period of fall in prices of Shares.**

I found this astro combination in Partho Ghose's Astrology for Stock Market (Published in 2003).

**060. Whenever Jupiter and Saturn transit Barren signs at one time and the other planets oppose them from the opposite zodiacal signs during their transits. there is good depression in share values. But if they happen to retrograde in them and specially if Mars happens to retrograde in them opposing Jupiter and Saturn, it spells an extended period of fall in prices of Shares.**

I found this astro combination in Partho Ghose's Astrology for Stock Market (Published in 2003).

**061.The conjunction of Mars and Uranus produces sudden and unexpected changes in Share values. Share values fall heavily if the conjunction takes place in Aries, Leo, Libra and Aquarius. The same thing holds good, if Saturn and Uranus, and Jupiter and Uranus make conjunction in the above signs or oppose each other from the opposite zodiacal signs.**

I found this astro combination in Partho Ghose's Astrology for Stock Market (Published in 2003).

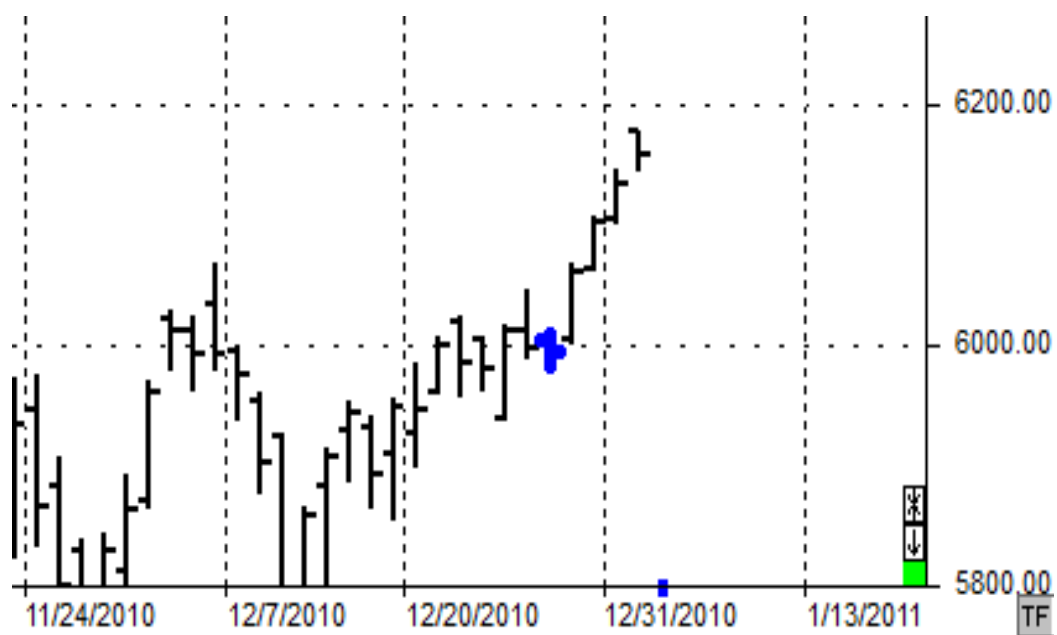

**062.The conjunction of Mars and Saturn produces severe depression in Share values if it takes place in Aries, Taurus, Leo, Libra, Aquarius and Capricorn the ruling sign of India. Their conjunction in Cancer, Scorpio and Pisces produces great falls in prices at times when they come close in the longitudinal degree but the tendency would be decidedly bullish in Share values.**

I found this astro combination in Partho Ghose's Astrology for Stock Market (Published in 2003).  
I never use this astro combination in my trading.

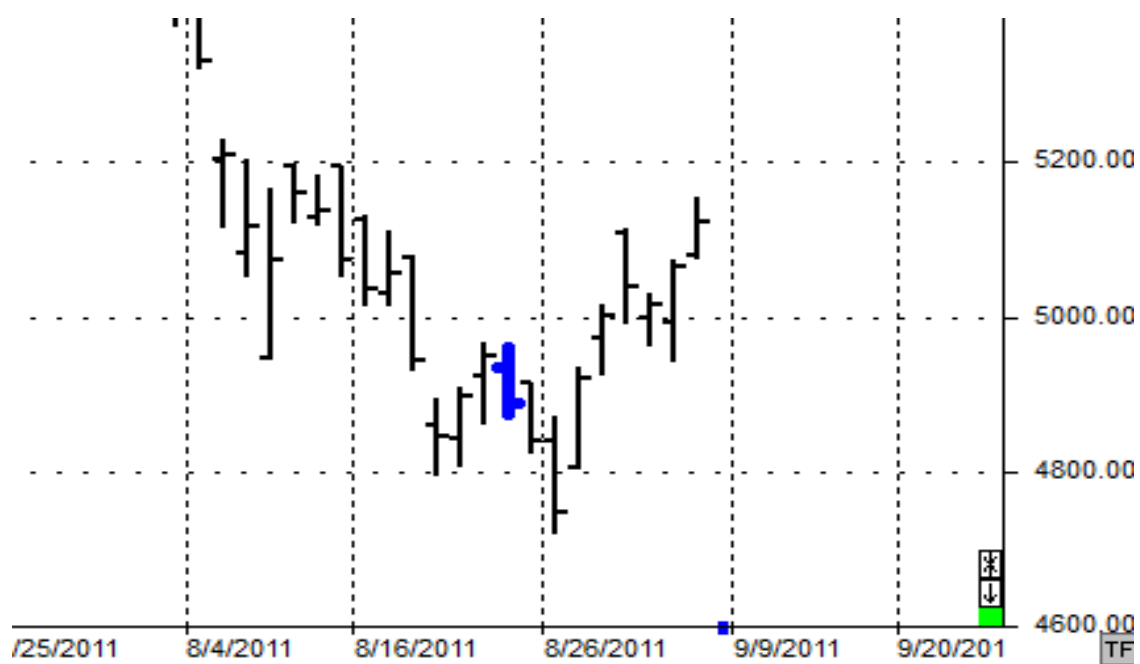

**063. The Square aspects of Mars and Saturn to the other planets produce full in Share values.**

I found this astro combination in Partho Ghose's Astrology for Stock Market (Published in 2003).

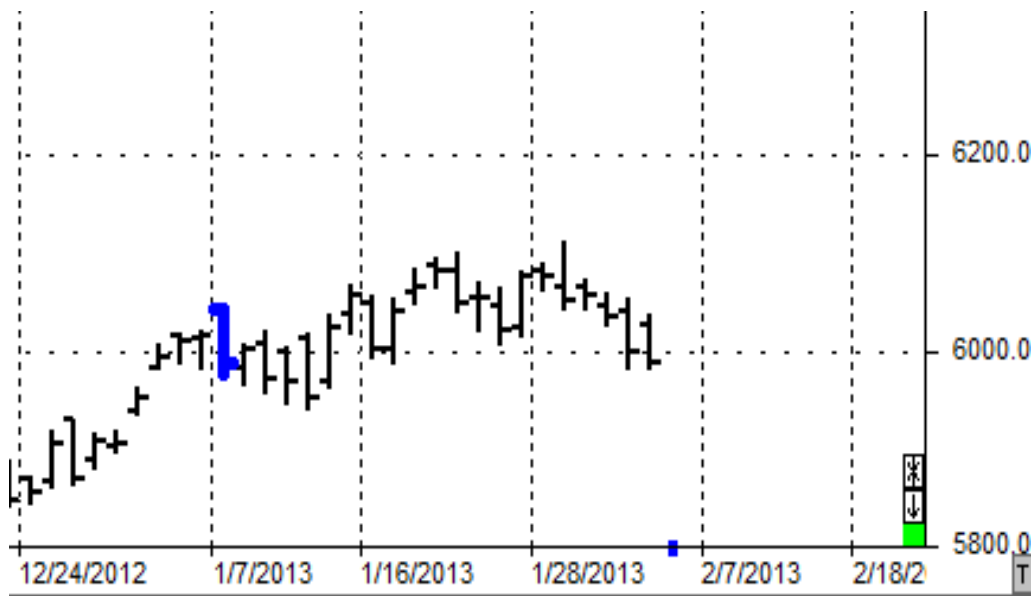

**064. When Mars is in the clockwise direction of Saturn and makes Square aspect with Mars, it is a very strong mutual Square aspect between them. because Mars aspects the 4th house from itself very powerfully and Saturn aspects the 10th house from itself very powerfully. Most of the time this astro combination produce bullishness period possibly next 3 – 7 days.**

2015 Nifty's daily chart.

2015 Nifty's daily chart.

### 065. Venus Mars transits through Scorpio in a same time.

I found this combination in very old American script (Astrology & Market: Written by -J.S. Pluera / Published in 1939). According to the script **When Venus & Mars transits through Scorpio sign in a same time leading industry's price move one side** (Bullish or Bearish anyone). Even I do not find any combination like this after 2010 but before this I show much combination in Nifty.

Nifty's trader can use this combination on 1 hour chart mix with leading indicator MACD. If trader gets a bearish sign on MACD after aspect they can go to the

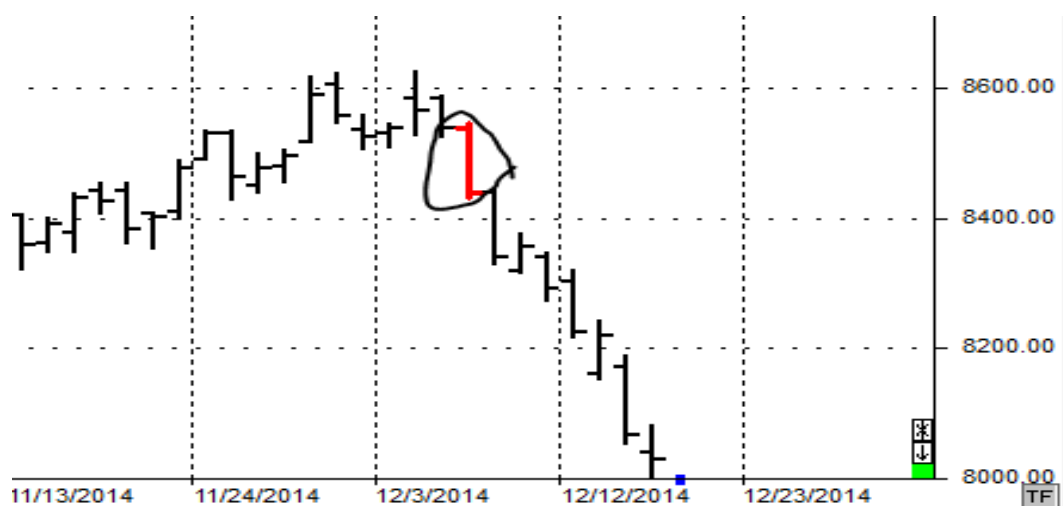

down move and if they get a bullish sign on MACD then they can try to make a positive position. I use this combination in Nifty many times.

2010 Nifty's daily chart.

### 066. Jupiter Retrograde

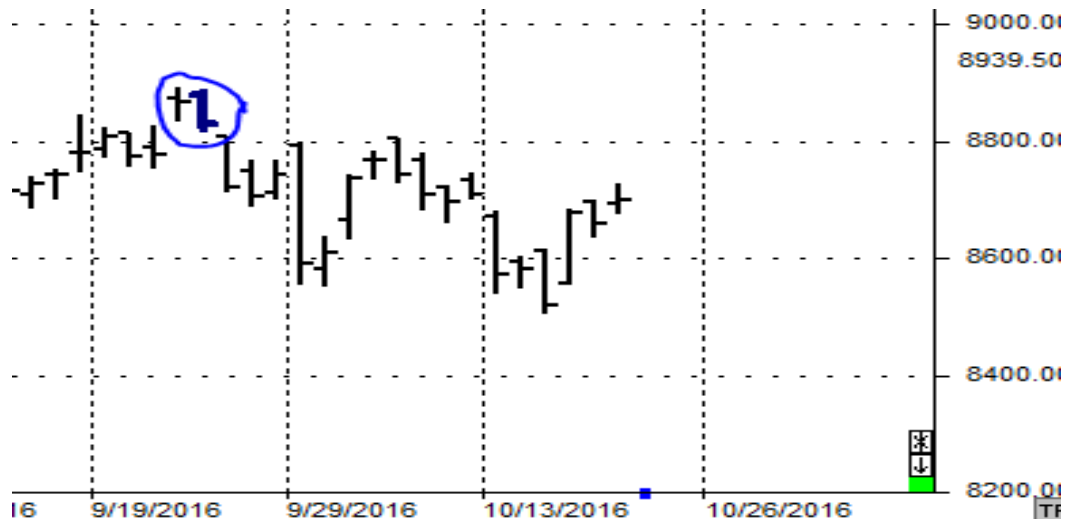

*Jupiter has a retrograde period each year. Stocks which lose value sharply at the retrograde station often recover as quickly when Jupiter turns direct. Indeed, the watchful trader can build profit by purchasing at a low (perhaps derived through technical analysis) during Jupiter's retrograde period. In the past I used this combination in Nifty also.*

2014 Nifty's daily chart.

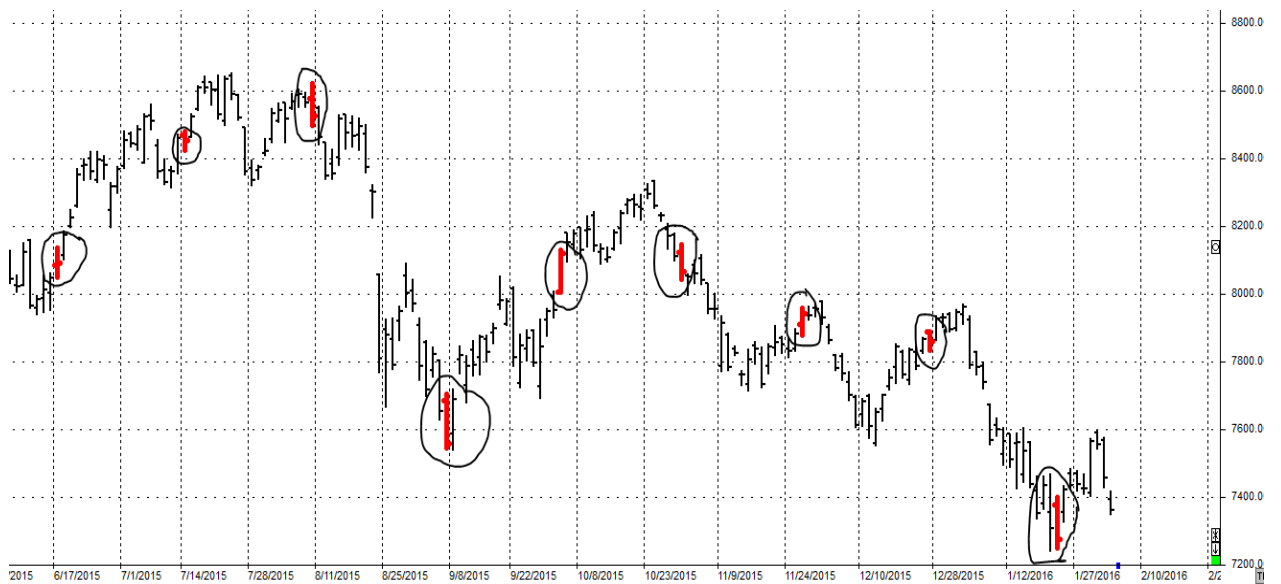

### 067. Jupiter Sun Conjunction

This combination produce, most of the time (Not every time) negative impact on Nifty.

2016 Nifty's daily chart.

068. When Sun reach at its Max North Latitude, this astro combination produce a Key date (Reversal Point) for Nifty.

2015 Nifty's daily chart.

Nifty's trader can use this combination on 1 hour chart mix with leading indicator MACD. If trader gets a bearish sign on MACD after aspect they can go to the

down move and if they get a bullish sign on MACD then they can try to make a positive position. I use this combination in Nifty many times.

**069. When Mercury is combust in Taurus, Cancer, Virgo, Scorpio, Sagittarius, Capricorn and Pisces, most of the time rise in price of Nifty is quite good.**

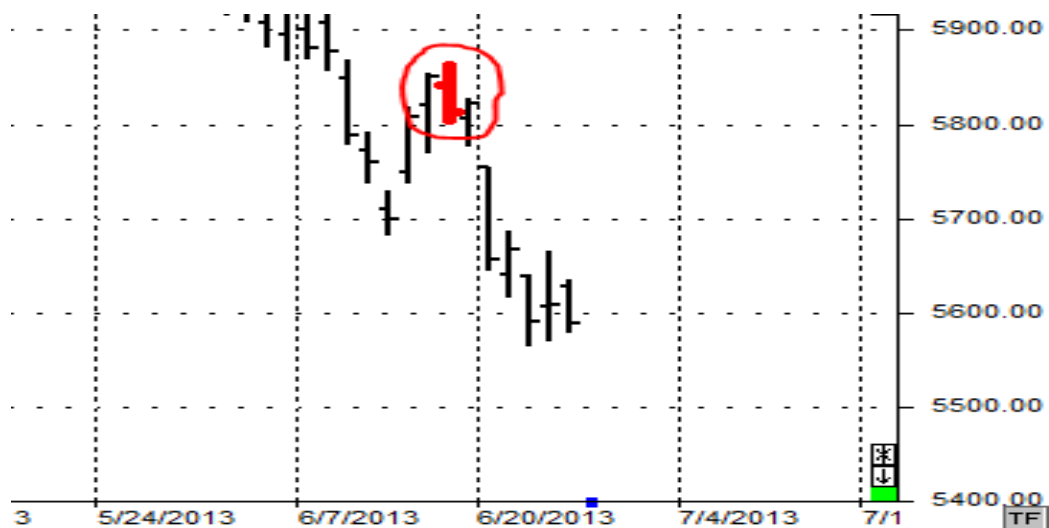

**070. When Mercury is combust in Taurus, Cancer, Virgo, Scorpio, Sagittarius, Capricorn and Pisces and Mercury & Sun receive a favourable aspects of the other planet, most of the time rise in price of Nifty is quite sharply.**

**071. When Mercury is retrograde, there will be some sudden change in Nifty's trend. Before Mercury becomes Direct and Retrograde, it is slow in motion. During that period Nifty's trend, some bull when Mercury made an aspect with Mars.**

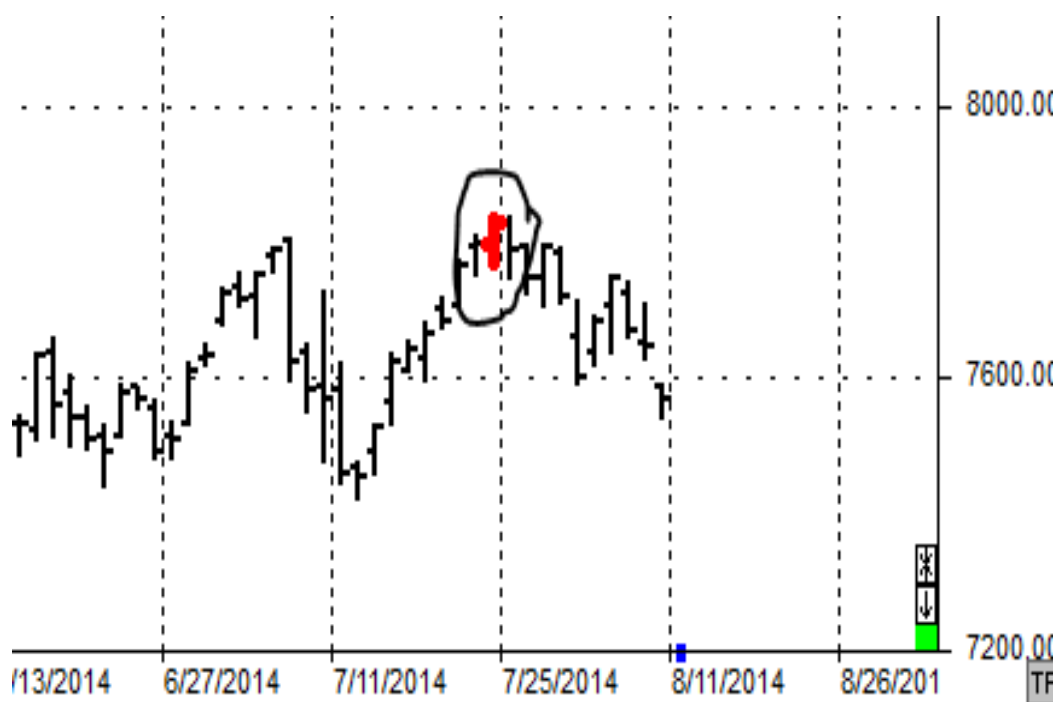

**072. In the morning, If Nifty open with a negative gap and Sun made an conjunction aspect with Moon around at 11:00 AM (Orb:3°) then Nifty recover itself from the lower level when Moon come behind Sun in the Orb area and in the Next 3 hour (If time remain to market close) Nifty made a double gain. (The difference and X2 between previous day's closing price and today's low) till the closing.**

**073. Jupiter 180° Earth (Heliocentric Method)**

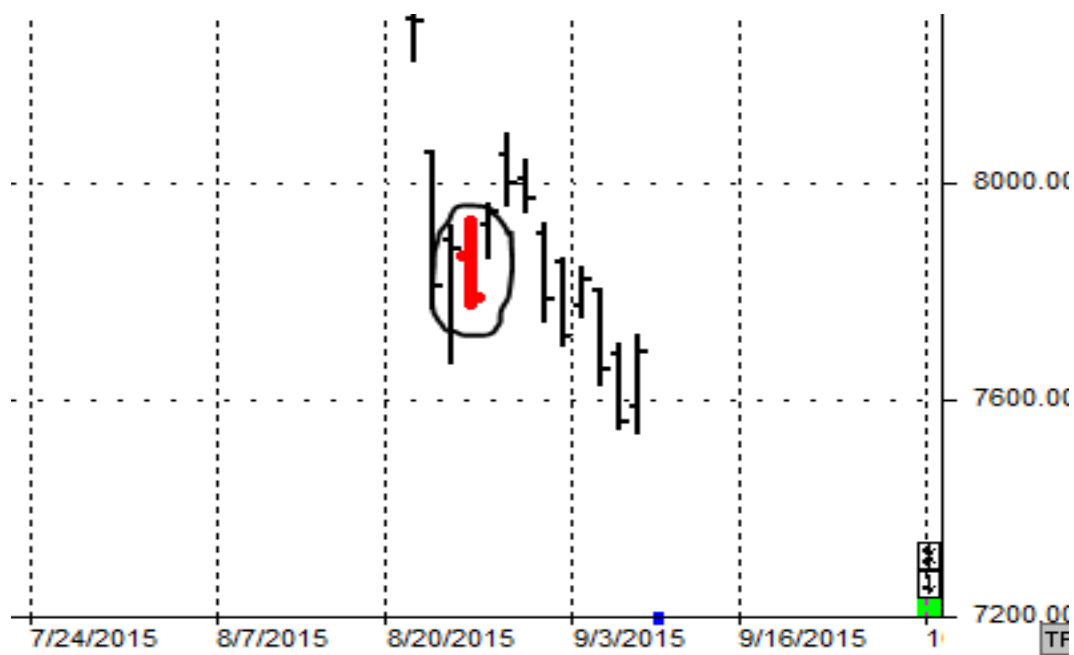

**Most of the time Nifty slip towards negative zone after this aspect.**

2013 Nifty's daily chart.

2014 Nifty's daily chart.

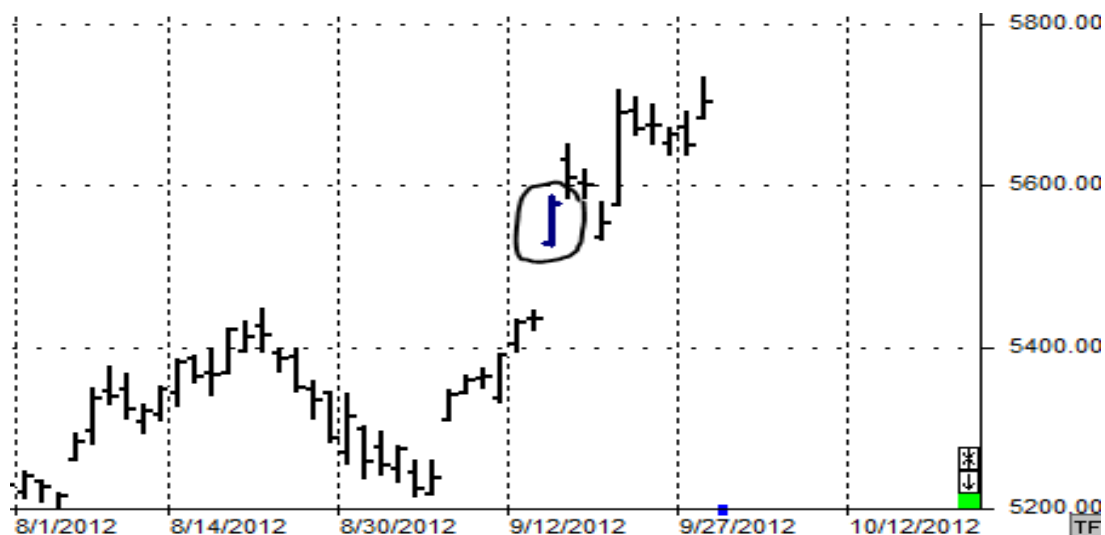

2015 Nifty's daily chart.

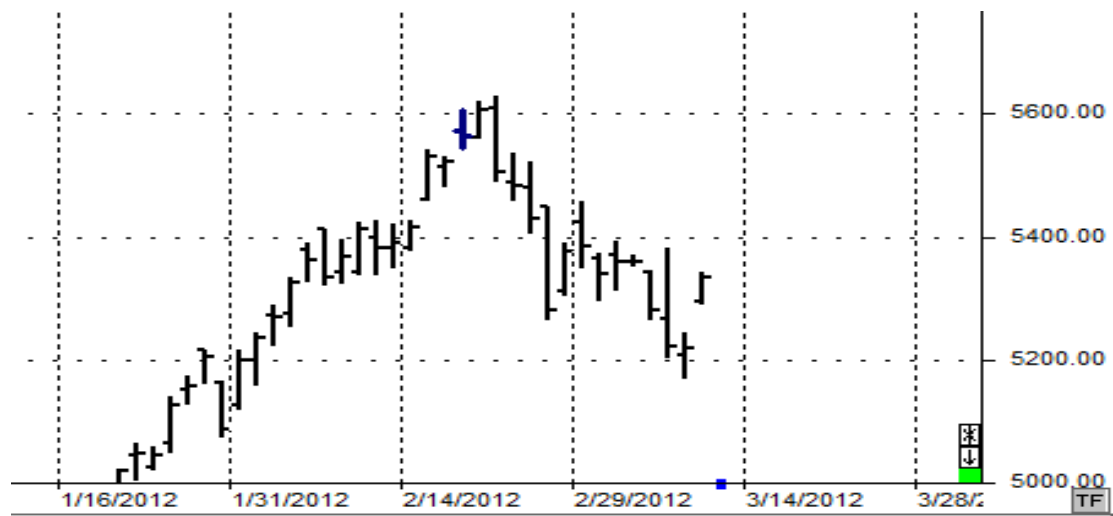

2016 Nifty's daily chart.

**074. When Mars & Saturn made an aspect of  $46^\circ$  on zodiacal path (Heliocentric Method), Most of the time we can see 3 - 9-day rally after this astro combination in Nifty.**

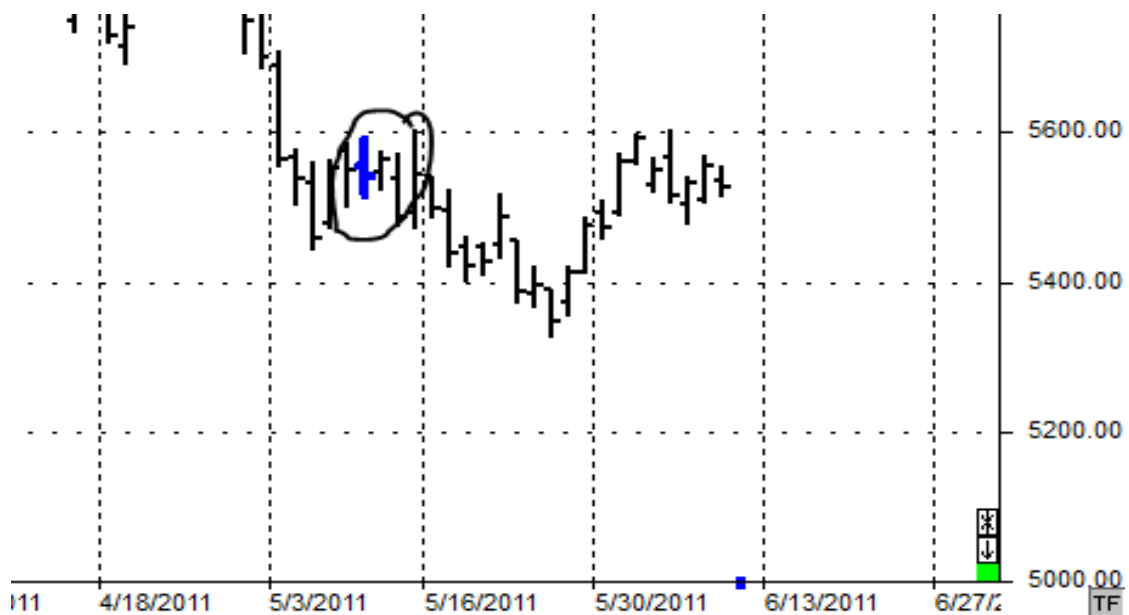

2012 Nifty's daily chart.

**075. When Mars & Saturn made an aspect of  $46^\circ$  on zodiacal path (Heliocentric Method) & Sun made any aspect with any Transpluto planets, most of the time we can see a major downfall in Nifty.**

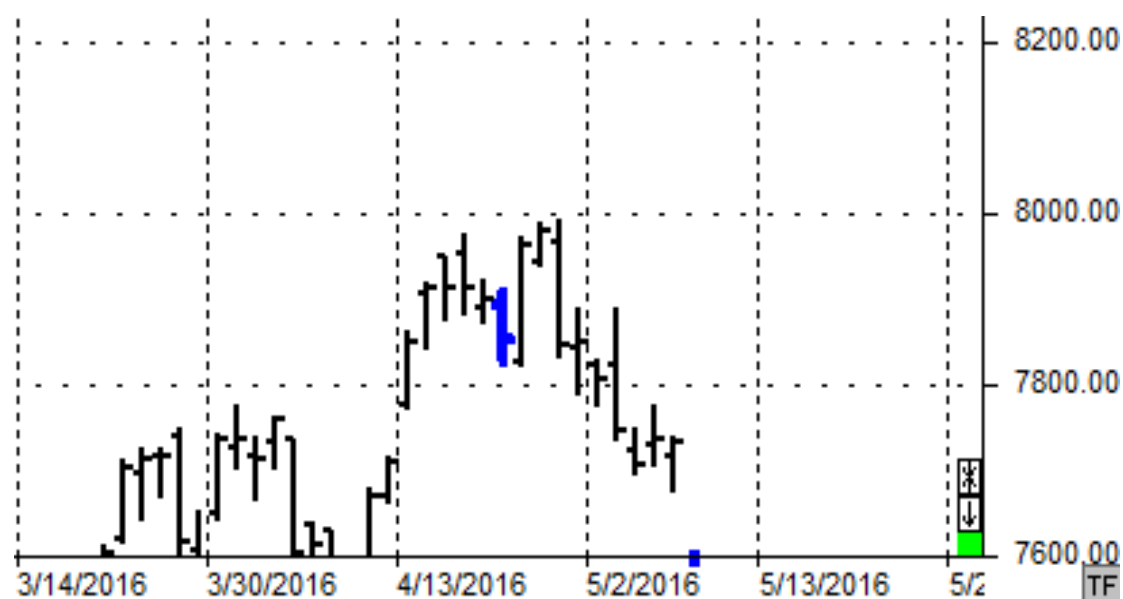

2012 Nifty's daily chart.

**076. When Venus pass  $23^\circ$  on zodiacal path (Heliocentric Method) Most of the time Nifty fall towards negative zone with heavy volume. I got many combinations like that.**

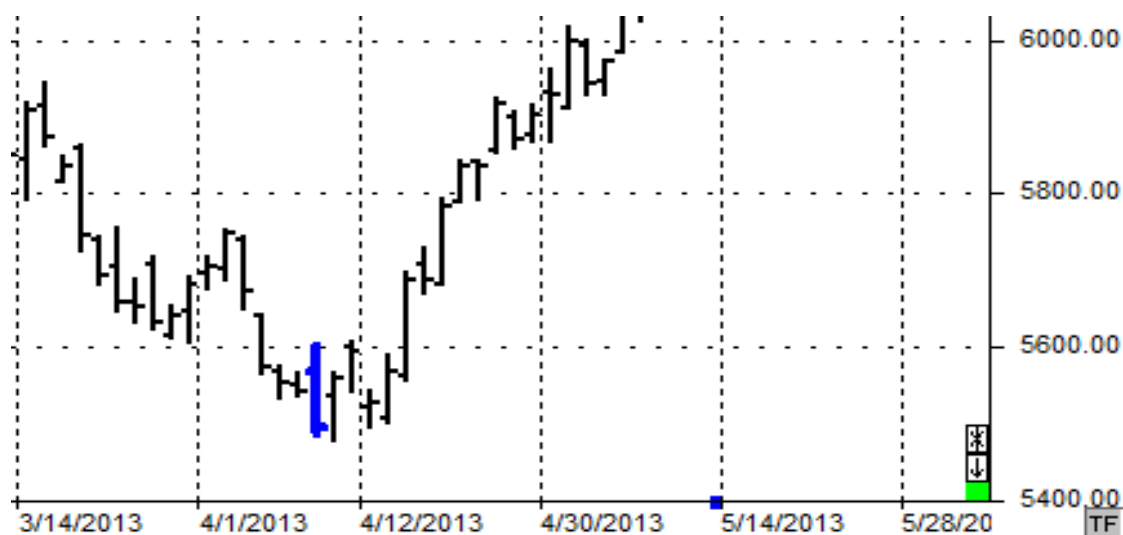

2011 Nifty's daily chart.

2016 Nifty's daily chart.

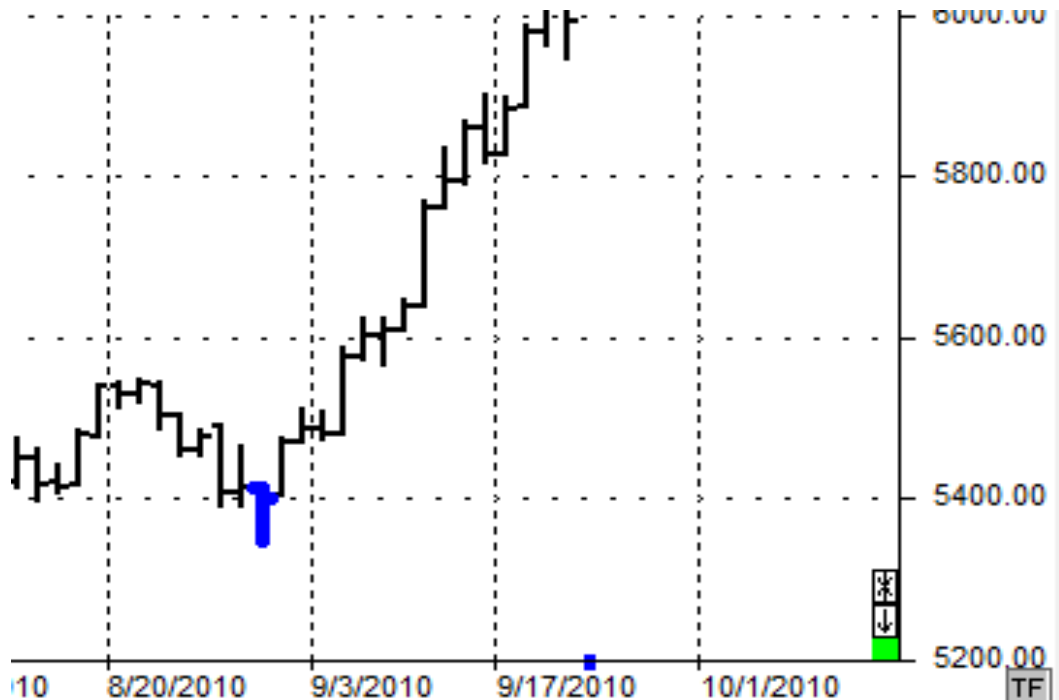

**077. When Venus pass  $23^\circ$  on zodiacal path (Heliocentric Method) & Venus made any aspect with any Transpluto planets Most of the time Nifty try to enter in a new bullish zone with heavy volume. I got many combinations like that in DJAI too. But I got only 2 time a reactive action in Nifty's trading.**

2013 Nifty's daily chart.

**078. When Jupiter transits through barren signs and Mars transits through bullish sign, Nifty run in zig - zag mode.**

**079. When Uranus made a double Trine aspect with any planets, Nifty enter in a new bullish zone.**

2010 Nifty's daily chart.

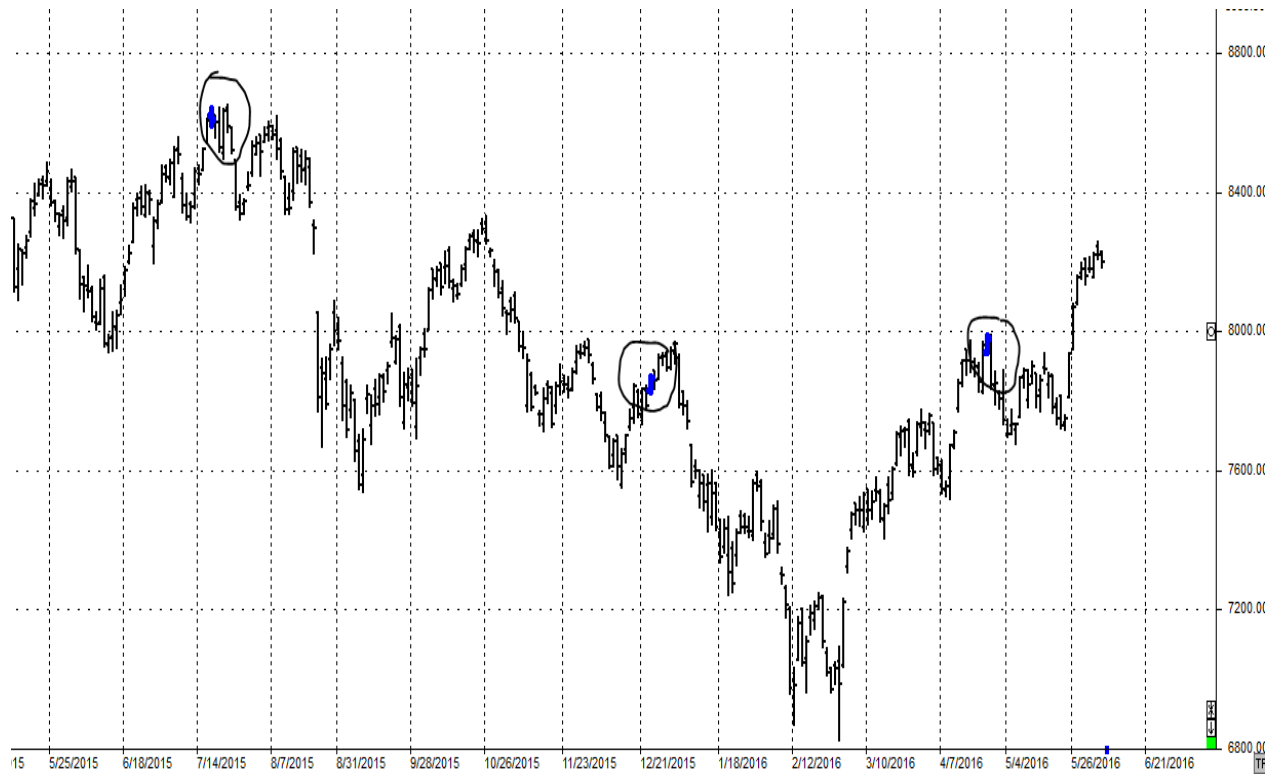

**080. When any two inner planets made any strong aspect (Trine, Conjunction, Opposition or Square) on New Moon's day. Most of the time Nifty try to reversal from the running trend.**

**081. Venus & Mercury never make any 90° aspect on geocentric system, but on heliocentric system these two planets made this aspect. When Venus & Mercury 90° aspect then this combination produce beneficial Key date. Nifty trader can use this Key date in there trading.**

2009 - 2010 Nifty's daily chart.

**082. Venus & Mercury never make any 180° aspect on geocentric system, but on heliocentric system these two planets made this aspect. When Venus & Mercury 180° aspect then this combination produce beneficial Key date. Nifty trader can use this Key date in there trading.**

2015 – 2016 Nifty's daily chart.

### 083. - Mercury Trine with Transpluto (Geocentric Method)

This combination not produce any rally, this combination produce Key date or reversal date for Nifty. Even this combination is too reliable but notable of course yes notable.

2014 - 2015 Nifty's daily chart.

In the 2014, last or in the starting of 2015 I got 2 very precious Key dates from this combination.

Some other Important astro combination to find Nifty's Key Dates (Reversal Dates) –

### 084. Moon Semi square with Uranus. (Orb: 1°) (Geocentric Method)

If this aspect begins in the early trading hour, then this astro combination produce strong turning point.

### 085. Mercury Semi Square Uranus. (Orb: 1°) (Geocentric Method)

### 086. Earth Opposite Saturn (Orb: 3°) (Heliocentric Method)

### 087. Earth Conjunction Saturn (Orb: 6°) (Heliocentric Method)

### 088. Earth Semi Square Jupiter (Orb: 1°) (Heliocentric Method)

### 089. Earth Square Jupiter (Orb: 2°) (Heliocentric Method)

### 090. Earth Trine Jupiter (Orb: 3°) (Geocentric Method)

**091. Earth Opposite Jupiter (Orb: 3°) (Heliocentric Method)**

**092. Earth Conjunction Jupiter (Orb: 6°) (Heliocentric Method)**

**093. Mercury pass Saturn (Heliocentric Method)**

**093. Saturn pass 01° Virgo on zodiacal path. (Geocentric Method) (Orb: 4°)**

This astro combination produce a negative impact on Nifty (according to the theory), I do not use this combination ever. I found this combination in Dec 2015 in an old script.

**094. Jupiter pass 01° Virgo on zodiacal path. (Geocentric Method) (Orb: 4°)**

This astro combination produce a positive impact on Nifty (according to the theory), I do not use this combination ever. I found this combination in Dec 2015 in an old script.

**095. Mars pass 01° Virgo on zodiacal path. (Geocentric Method)**

This astro combination produce Key date for Nifty (according to the theory), I do not use this combination ever. I found this combination in Dec 2015 in an old script.

**096. Saturn pass 01° Pisces on zodiacal path. (Geocentric Method) (Orb: 4°)**

This astro combination produce a positive impact on Nifty (according to the theory), I do not use this combination ever. I found this combination in Dec 2015 in an old script.

**097. Jupiter pass 01° Pisces on zodiacal path. (Geocentric Method) (Orb: 4°)**

This astro combination produce a negative impact on Nifty (according to the theory), I do not use this combination ever. I found this combination in Dec 2015 in an old script.

**098. Mars pass 01° Pisces on zodiacal path. (Geocentric Method)**

This astro combination produce Key date for Nifty (according to the theory), I do not use this combination ever. I found this combination in Dec 2015 in an old script.

**099. Moon 150° with Eris. (Orb: 1°) (Geocentric Method)**

**If this aspect begins in the early trading hour, then this astro combination produce strong turning point.**

**100. Jupiter pass 230° on zodiacal path. (Geocentric Method) (Orb: 4°)**

This astro combination produce a negative or positive (One side movement) impact on Nifty (according to the theory), I do not use this combination ever. I found this combination in Dec 2015 in an old script.

**101. Mars 60° Uranus. (Orb: 1°) (Geocentric Method)**

This astro combination produce Key date for Nifty (according to the theory), I do not use this combination ever. I found this combination in Dec 2015 in an old script.

To find astro combinations you need Raphael's Astronomical Ephemeris or Astronomical Ephemeris for Stock Market.

You can buy this Raphael's Astronomical Ephemeris from Amazon.in

Or you can buy Astronomical Ephemeris for Stock Market form Attriforecasting.com

If you have any computer software to find Planets daily position or another basic astrological alphabet than you do not need to buy any Ephemeris.
